TEMOLA TN10

TEMOLA Portable Tire Inflator User Manual

Model: TN10

1. INTRODUCTION

Thank you for choosing the TEMOLA Portable Tire Inflator. This manual provides essential information for the safe and efficient operation, maintenance, and troubleshooting of your new device. Please read it thoroughly before use and keep it for future reference.

2. PRODUCT OVERVIEW

The TEMOLA Portable Tire Inflator is a versatile and compact air compressor designed for quick and convenient inflation of various items. Its cordless design, dual power supply, and intelligent features make it an indispensable tool for automotive and recreational use.

Key Features:

- **Simple and Fast Inflation:** Inflates a 195/55/R15 auto tire from 0 to 35psi in approximately 5 minutes with automatic shut-off at preset pressure.
- **Dual Power Supply:** Features a built-in rechargeable 2000mAh*2 battery for cordless use and a 12V DC power cord for emergency road rescue.
- **Multi-Accessories:** Includes various nozzles for cars, SUVs, motorcycles, bicycles, sports balls, air mattresses, and pool toys.
- **Digital Display & LED Light:** Displays pressure in PSI, BAR, KPA, and KG/CM² with an ultra-bright LED light for night-time operation and emergency use.
- **Portable Design:** Compact (6.9 * 3 * 2.2 inches) and lightweight for easy storage in backpacks, pockets, or vehicles.
- **USB Output Port:** Can be used as an emergency power bank for mobile phones.

3. COMPONENTS INCLUDED

The package includes the following items:

- Air Inflator Unit

- Air Tube
- User Manual
- Storage Bag
- Valve Adapter (Presta to Schrader)
- Air Nozzle Cones
- Needle Valve Adapter
- USB Charging Cable
- 12V Car Power Supply Cable
- Replacement Fuse

PACKING INCLUDES

1. Air Inflator

5. Valve Adapter

2. Air Tube

6. USB Charging Cable

3. User Manual

7. 12V Car Power Supply Cable

4. Storage Bag

8. Safety Hammer

4. SETUP

Initial Charging:

Before first use, fully charge the internal battery using the provided USB charging cable. Connect the USB cable to the inflator's USB-C input port and the other end to a compatible USB power adapter (not included). The display will indicate

charging status.

Connecting the Air Tube:

Screw the flexible air tube securely into the designated port on the top of the inflator unit.

5. OPERATING INSTRUCTIONS

Basic Inflation Steps:

1. Connect the air tube to the tire valve. Ensure a secure connection to prevent air leakage.
2. Press and hold the power button to turn on the inflator. The digital display will illuminate, showing the current pressure and battery level.
3. Select the desired inflation mode (car, motorcycle, bicycle, or ball) by pressing the mode button.
4. Use the '+' and '-' buttons to set the target pressure.
5. Press the power button again to start inflation. The pump will automatically stop once the preset pressure is reached.

Figure 5.1: Easy-to-use inflation steps.

Dual Power Supply Mode:

The inflator can be powered by its internal battery or by connecting it to a 12V DC power source using the included car power cord. This provides flexibility for use in various situations, especially during roadside emergencies when the internal battery might be low.

Figure 5.2: Dual power supply options: Battery Supply and 12V DC Supply.

Real-Time Pressure Monitoring:

The bright LED screen provides real-time monitoring of tire pressure and battery level, ensuring accurate inflation and preventing over-inflation.

Figure 5.3: Real-time pressure monitoring display.

LED Light Function:

The integrated LED light can be activated independently for illumination during night-time inflation or as an emergency signal (SOS mode).

Versatile Inflation:

The inflator is suitable for various items, including:

- Car Tires
- Motorcycle Tires
- Bicycle Tires
- Sports Balls

- Air Mattresses
- Pool Toys

6. MAINTENANCE

Charging:

To ensure optimal performance, fully charge the inflator's internal battery regularly, especially before extended periods of non-use. Use only the provided USB charging cable or the 12V DC car power cord.

Cleaning and Storage:

Wipe the device with a soft, dry cloth. Do not use abrasive cleaners or immerse the unit in water. Store the inflator and its accessories in the provided storage bag in a cool, dry place, away from direct sunlight and extreme temperatures.

7. TROUBLESHOOTING

If you encounter issues with your TEMOLA Portable Tire Inflator, please refer to the following common troubleshooting steps:

- **Device Not Turning On:** Ensure the battery is sufficiently charged. If using the 12V DC cable, ensure it is properly connected to a working power outlet in your vehicle.
- **Inflation Not Starting:** Verify that the air tube is securely connected to both the inflator and the tire valve. Check that a target pressure has been set and the correct mode is selected.
- **Inaccurate Pressure Reading:** Ensure the air tube connection to the valve is tight. Slight variations may occur, but significant discrepancies might indicate a faulty connection or a need to recalibrate (refer to specific instructions in the full manual if available).

- **Automatic Shut-off Issues:** The device is designed to automatically shut off when the preset pressure is reached. If it shuts off prematurely, check for blockages in the air tube or ensure the target pressure is set correctly.
- **Device Overheating:** Continuous operation for extended periods can cause the device to heat up. Allow it to cool down before resuming use.

8. SPECIFICATIONS

Feature	Specification
Brand	TEMOLA
Model Name	Tire Inflator Portable (TN10)
Voltage	12 Volts
Power Source	Battery Powered / 12V DC
Maximum Operating Pressure	35 PSI (for auto tires)
Battery Type	Lithium Ion (2000mAh*2)
Product Dimensions	8.31"L x 5.67"W x 3.11"H
Item Weight	1.57 pounds
Special Features	AC & DC Adaptable, LED Light, Cordless, Digital, Automatic Shut-Off

9. WARRANTY AND SUPPORT

TEMOLA products are manufactured to high standards and rigorously tested. For any product-related inquiries, technical support, or warranty claims, please contact TEMOLA customer service.
