3. Setup

3.1 Connecting Your iPhone

1. **Prepare Your iPhone:** Ensure your iPhone's Lightning port is clean and free of debris. Lint or dirt can interfere with the connection.
2. **Screen Protector Check:** If your iPhone has a screen protector thicker than 1mm, it may need to be removed to ensure a secure and proper connection with the controller.
3. **Insert iPhone:** Gently slide your iPhone into the leadjoy M1B controller, aligning the Lightning port with the controller's connector. The controller is designed for a snug fit.
4. **Use Adapter (if necessary):** The controller includes a small rubber adapter. If your iPhone feels loose or does not connect properly, use this adapter to ensure a secure fit.
5. **Verify Connection:** Once connected, your iPhone should recognize the controller automatically. Most games with controller support will detect the M1B without additional setup.

3.2 VLead App (Optional)

While the controller is generally plug-and-play, some functionalities or updates might be available through the VLead App. Search

for "VLead App" or "Leadjoy App" on the App Store to check for availability and additional features.

4. Operating the Controller

4.1 Controls and Features

The leadjoy M1B is equipped with high-performance controls for a responsive gaming experience:

- **Hall Effect Analog Triggers:** Provide precise and smooth input for actions like acceleration or braking.
- **Mechanical Buttons:** Offer tactile feedback and durability, rated for 5 million clicks with a 0.3mm actuation distance and 70 GF actuation force.
- **Analog Joysticks:** For accurate movement and camera control.
- **D-Pad:** For directional input.

4.2 Passthrough Charging

The M1B controller features passthrough charging, allowing you to charge your iPhone while gaming. Connect your Lightning charging cable to the port on the controller. This ensures uninterrupted gameplay during extended sessions.

Image 4.2: Passthrough charging in action.

4.3 Capture Button

Easily record and share your gaming moments using the dedicated capture button:

- **Double Press:** Take a screenshot of your current gameplay.
- **Long Press:** Start or stop recording a video of your gameplay.

Image 4.3: Capture button functionality.

5. Maintenance

To ensure the longevity and optimal performance of your leadjoy M1B controller, follow these general maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe the controller. Avoid abrasive cleaners or solvents. For hard-to-reach areas, a cotton swab can be used.
- **Storage:** Store the controller in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Handle the controller with care. Avoid dropping it or subjecting it to strong impacts.
- **Port Care:** Regularly check and clean your iPhone's Lightning port to prevent connection issues.

6. Troubleshooting

Issue	Possible Cause	Solution
Controller not recognized by iPhone	Loose connection, dirty Lightning port, incompatible iOS version.	Ensure iPhone is securely seated. Clean iPhone's Lightning port. Verify iOS version is 13 or above.
Controller disconnects during gameplay	Unstable connection, phone shifting, screen protector interference.	Re-seat the iPhone firmly. Use the provided rubber adapter for a tighter fit. Check if screen protector is too thick.
Passthrough charging is slow	High power consumption by iPhone/game, charger limitations.	Ensure you are using a high-quality charger and cable. Note that intensive gaming may consume power faster than it charges.
Phone feels loose in the controller	Incorrect phone size, missing adapter.	Ensure your iPhone model is compatible. Use the small rubber adapter included with the controller to secure the phone.
Buttons feel sticky or unresponsive	Debris under buttons, manufacturing defect.	Gently clean around the buttons. If the issue persists, contact customer support.

7. Specifications

- **Model:** leadjoy M1B
- **Manufacturer:** leadjoy
- **Connectivity:** Lightning Port (Direct connection)
- **Compatibility:** iPhones with Lightning port running iOS 13 and above
- **Triggers:** Hall Effect Analog Triggers
