MoNiBloom A41-HUT-011-GY

MoNiBloom Wooden Tortoise Habitat House User Manual

Model: A41-HUT-011-GY | Brand: MoNiBloom

1. Introduction

Thank you for choosing the MoNiBloom Wooden Tortoise Habitat House. This enclosure is designed to provide a versatile and comfortable living space for various small animals, including tortoises, lizards, geckos, and snakes. It features a durable fir wood construction, mesh windows for observation and ventilation, and a waterproof bottom for easy cleaning. This manual will guide you through the assembly, operation, and maintenance of your new habitat.

2. Key Features

- **Versatile Reptile Cage:** Features 2 mesh visible windows on two sides for easy observation. Suitable for indoor and outdoor use, providing proper heat and light or natural sunlight.
- **Durable Construction:** Made from good quality fir wood, suitable for raising small animals. Equipped with a denser and stronger top wire lid.
- **Waterproof & Easy Clean Bottom:** The bottom is fully surrounded to prevent dirt from falling through and is upgraded with a waterproof and easy-to-clean surface to manage moisture.
- **Enrichment Opportunities:** Provides space for hiding spots, climbing structures, and toys to keep pets mentally stimulated and active.
- **Socialization:** Allows multiple tortoises to socialize and interact, promoting their mental health and well-being.

3. Setup Instructions

Follow these steps to assemble your MoNiBloom Tortoise Habitat. It is recommended to have a screwdriver for assembly.

Official Assembly Video: This video provides a comprehensive guide to assembling the MoNiBloom Wooden Tortoise Habitat,

demonstrating each step from unboxing to final setup.

Step 1: Begin by attaching the side panels to the base of the habitat. Ensure all screws are securely fastened.

Step 2: Install the internal divider to create separate run and resting areas. This piece slides into designated grooves.

Step 3: Secure the mesh lid to the main compartment using the provided hinges and screws. This allows for ventilation and observation.

Step 4: Attach the solid wooden lid to the resting area, also using hinges. This provides a secure and private space for your pet.

Step 5: Install the security latches on both lids to ensure they remain closed and secure.

Step 6: Perform a final check to ensure all components are correctly assembled and all screws are tightened. The habitat is now ready for use.

4. Operating Instructions

The MoNiBloom Tortoise Habitat is designed for flexibility, allowing both indoor and outdoor use. It features distinct areas to cater to your pet's needs.

Spacious Design: The habitat is divided into two main areas: a 'Run Area' with a mesh top for light and ventilation, and a 'Resting Area' with a solid wooden top for privacy and warmth. An accessible hole connects these two sections, allowing your pet to move freely between them.

Indoor Use: When used indoors, ensure the habitat is placed in a stable location away from direct drafts. Provide appropriate heating and lighting elements (not included) as required by your pet's species. The mesh top allows for easy placement of heat lamps or UV lights.

Outdoor Use: For outdoor use, place the habitat in a secure, shaded area to prevent overheating, especially during peak sun hours. The mesh top allows for natural sunlight exposure, which is beneficial for many reptiles. Always monitor your pet and the habitat's temperature when outdoors.

Access and Security:

- Both the mesh and solid wooden lids are hinged and can be opened for easy access to your pet and for cleaning.
- Secure the lids using the metal latches to prevent accidental opening and ensure your pet's safety.
- The mesh windows on the sides allow for additional observation without disturbing your pet.

5. Maintenance

Regular maintenance is crucial for the health and well-being of your pet and the longevity of the habitat.

- **Cleaning:** The waterproof bottom makes cleaning simple. Remove all substrate and waste regularly. Wipe down the interior surfaces with a pet-safe disinfectant. Allow to dry completely before adding fresh substrate and returning your pet.
- **Wood Care:** The fir wood is durable, but prolonged exposure to excessive moisture can cause warping or damage. If used outdoors, consider placing it under a covered area during heavy rain. Periodically check the wood for any signs of wear or damage.
- **Mesh Maintenance:** Inspect the wire mesh regularly for any signs of damage or corrosion. Clean the mesh with a soft brush to remove any debris and ensure proper airflow.
- **Hardware:** Check all screws, hinges, and latches periodically to ensure they are tight and functioning correctly. Tighten any loose hardware as needed.

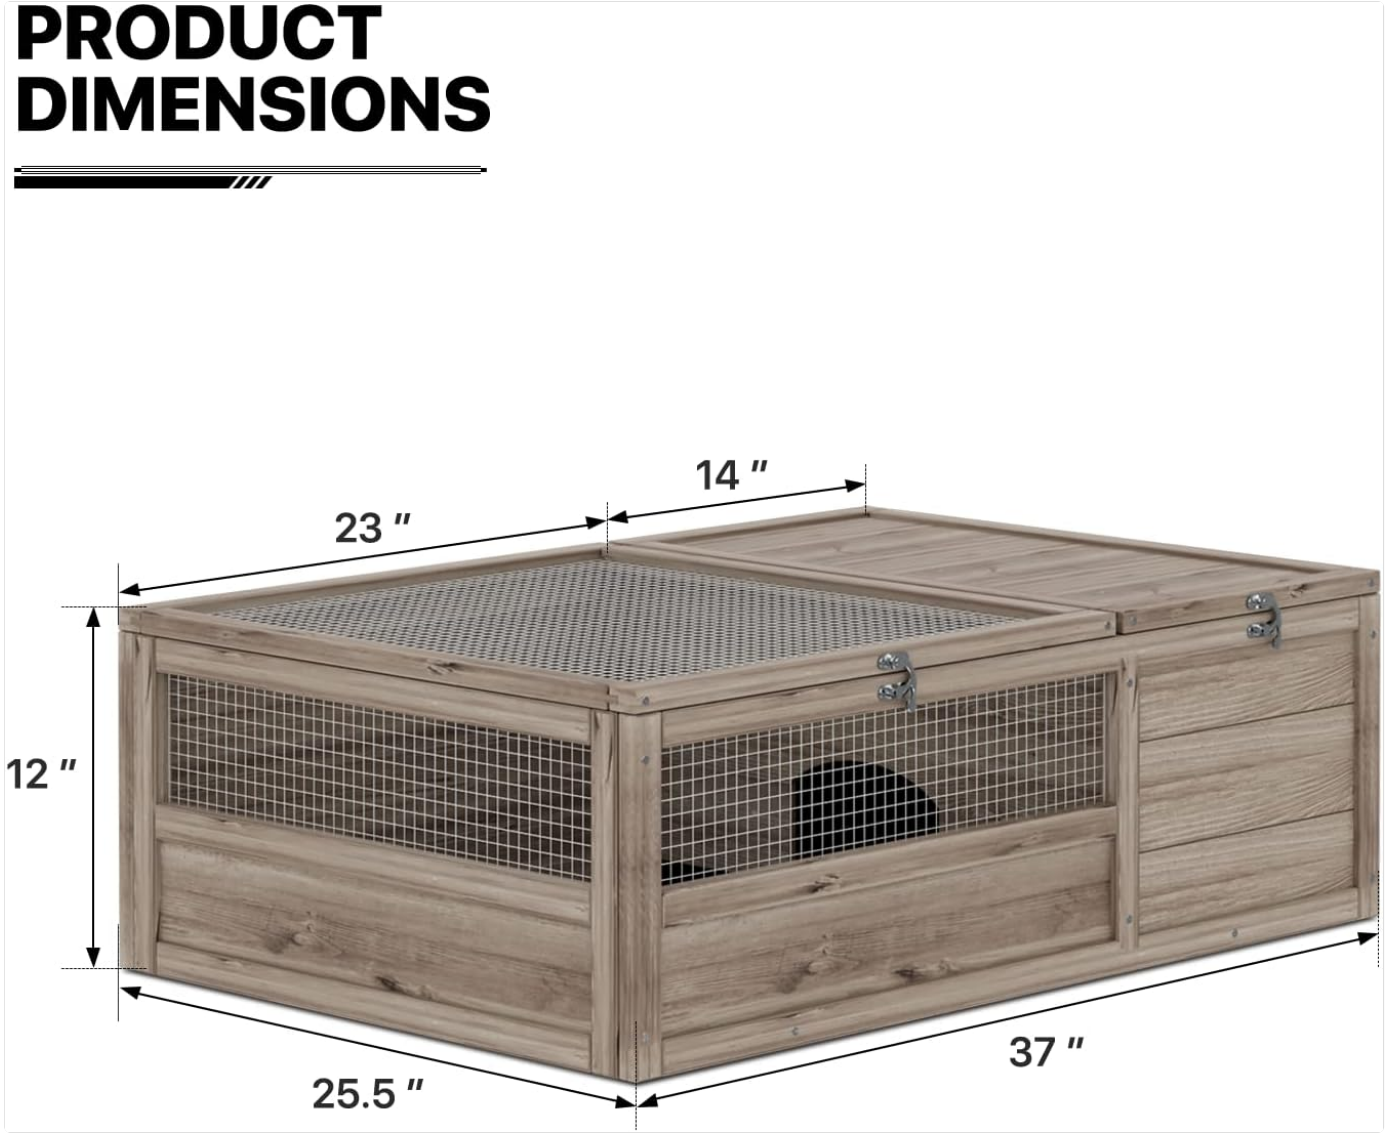

6. Troubleshooting

Here are some common issues and potential solutions:

- **Assembly Difficulties:** If you encounter issues with parts not aligning or screws not fitting, double-check the assembly instructions and ensure you are using the correct parts for each step. Sometimes, slight adjustments or pre-drilling (if comfortable and necessary) can help.
- **Wood Splitting/Cracking:** Wood is a natural material and can sometimes split, especially if screws are overtightened or if the wood experiences significant temperature/humidity changes. Avoid overtightening screws during assembly. If minor splits occur, they can often be repaired with wood glue.
- **Gaps in Construction:** Small gaps may occur due to natural variations in wood. For minor gaps, these typically do not affect functionality. For larger gaps that could pose a risk to your pet, ensure all connections are as tight as possible.
- **Lids Not Closing Securely:** Check the alignment of the hinges and latches. Ensure no debris is obstructing the closing mechanism. Adjust hinges or latches if they are misaligned.

7. Specifications

Feature	Detail
Brand	MoNiBloom
Model Name	MoNiBloom A41-HUT-011-GY
Material	Fir Wood
Color	Grey
Product Dimensions (L x W x H)	37" x 25.5" x 12"
Item Weight	11.16 Kilograms
Target Species	Tortoise
Special Feature	Durable
Specific Uses For Product	Indoor, Outdoor
