Recycling your capsules helps transform aluminum into new products and composts the used coffee grounds.

Troubleshooting

If you encounter issues while brewing your Nespresso coffee, consider the following common solutions:

- **No Coffee Dispensed:** Ensure the water tank is filled and properly seated. Check if the capsule is correctly inserted and the machine head is fully closed and locked.
- **Weak Coffee:** Verify that you are using a Nespresso Vertuo pod and not an Original Line pod. Ensure the machine is clean and descaled regularly according to your machine's manual.
- **Leaking Machine:** Check that the water tank is correctly positioned and not overfilled. Ensure the capsule is not damaged and is inserted properly.
- **Machine Not Turning On:** Confirm the machine is plugged into a working power outlet.

For more detailed troubleshooting, consult the instruction manual for your specific Nespresso Vertuo machine or contact Nespresso customer support.
