2. SETUP

2.1 Unpacking

Carefully remove all components from the packaging. Ensure the following items are present:

- Fujitsu LIFEBOOK E546 Laptop
- AC Adapter
- Power Cable

If any items are missing or damaged, please contact customer support immediately.

2.2 Initial Power On

Connect the AC adapter to the laptop's power input port and then to a functional power outlet. Open the laptop lid

and press the power button, typically located near the keyboard. The system will guide you through the initial Windows 10 setup process, including language selection, network connection, and user account creation.

3.3 Using the Keyboard and Touchpad

The laptop features a full-sized keyboard for comfortable typing. The integrated touchpad allows for precise cursor control and supports multi-touch gestures such as scrolling and zooming. Refer to Windows settings for touchpad customization options.

4. MAINTENANCE

4.1 Cleaning

To maintain the appearance and functionality of your laptop:

- Use a soft, lint-free cloth, slightly dampened with water or a screen cleaner, to clean the display.
- Wipe exterior surfaces with a soft, dry cloth.
- Avoid using harsh chemicals, abrasive cleaners, or solvents, as these can damage the surfaces.
- Ensure the laptop is powered off and unplugged before cleaning.

4.2 Software Updates

Regularly update your Windows operating system and device drivers to ensure optimal performance, security, and compatibility. Windows Update can be accessed via the Settings menu.

4.3 Battery Care

To prolong the lifespan of your laptop's battery:

- Avoid exposing the laptop to extreme temperatures (very hot or very cold).
- Do not frequently fully discharge the battery. It is generally better to keep the charge between 20% and 80%.
- If storing the laptop for an extended period, ensure the battery is charged to approximately 50%.

5. TROUBLESHOOTING

5.1 Common Issues and Solutions

- **Laptop does not power on:**
  - Check power connection: Ensure the AC adapter is securely connected to the laptop and a working power outlet.
  - Battery charge: If running on battery, ensure it is sufficiently charged.

- **Screen is blank or no display:**
  - Check brightness settings: Increase screen brightness using the function keys.
  - External monitor test: Connect an external monitor to the laptop to verify if the issue is with the laptop's internal display or the graphics output.

- **Slow performance:**
  - Close unnecessary applications: Reduce the number of programs running simultaneously.
  - Check for background processes: Use Task Manager (Ctrl+Shift+Esc) to identify and close resource-intensive background processes.
  - Ensure sufficient free space: Verify that your 256GB SSD has adequate free space for optimal operation.

- **Peripheral not recognized:**
  - Reconnect the device: Unplug and re-plug the peripheral.
  - Try a different port: Test the device in another USB or relevant port.
  - Update or reinstall drivers: Ensure the latest drivers for the peripheral are installed.

For more complex issues or persistent problems, refer to the official Fujitsu support website or contact their technical support for further assistance.
