eLinkSmart T8

eLinkSmart T8 Fingerprint Door Knob Lock User Manual

Model: T8

1. Product Overview

The eLinkSmart T8 Fingerprint Door Knob Lock is an advanced smart locking solution designed for interior doors, offering multiple convenient and secure entry methods. This biometric electronic security lock integrates fingerprint recognition, a numeric keypad for passcodes, Bluetooth app control, and traditional mechanical key access, providing flexibility and enhanced safety for bedrooms, offices, apartments, and other private spaces.

2. Key Features

- **4 Ways to Unlock:** Fingerprint, Passcode, Mobile App (Bluetooth), and Mechanical Key.
- **High Security Construction:** Made from durable Alloy Steel and Zinc for enhanced safety.
- **Easy DIY Installation:** Designed for simple installation or replacement with a screwdriver, no extra drilling required. Reversible handle for left or right-handed doors.
- **Long Battery Life:** Low power consumption ensures up to 12 months of standby time. Features low battery reminders and emergency power options.
- **Upgraded 3D Fingerprint Sensor:** Fast 0.2-second identification with 360° recognition and 99.9% accuracy, supporting up to 50 fingerprints.
- **Passcode Capacity:** Stores up to 100 passcodes, including temporary ones. Features anti-peeping passcode

input.

3. Package Contents

Please verify that all components are present before beginning installation:

- eLinkSmart T8 Fingerprint Door Knob (Exterior Handle)
- Interior Handle
- Latch Bolt
- Strike Plate
- Mounting Screws
- Mechanical Keys (2)
- Screwdriver
- User Manual

4. Setup and Installation

The eLinkSmart T8 lock is designed for easy DIY installation. Follow these steps to install your new smart door knob:

1. **Prepare the Door:** Ensure your door thickness is between 1-3/16" to 2-1/8" (30mm - 55mm). The lock latch is adjustable for backsets of 2-3/8" (60mm) or 2-3/4" (70mm).
2. **Install the Latch Bolt:** Insert the latch bolt into the door edge, ensuring the arrow on the latch points towards the door frame. Secure with screws.
3. **Install the Exterior Handle:** Feed the cable from the exterior handle through the latch bolt opening and align the handle with the door.
4. **Install the Interior Handle:** Connect the cable from the exterior handle to the interior handle. Align the interior handle and secure both handles together using the provided mounting screws.
5. **Insert Batteries:** Open the battery cover on the interior handle and insert 4 AAA batteries (not included), ensuring correct polarity.
6. **Test Operation:** Close the door and test the lock's basic functionality using a mechanical key.

5. Operating Instructions

5.1 Unlocking Methods

The eLinkSmart T8 offers four convenient ways to unlock your door:

Image: Visual representation of the four unlocking methods: Fingerprint, App, Passcode, and Key.

5.1.1 Fingerprint Unlock

Place your registered finger on the fingerprint sensor located on the handle. The lock will unlock instantly upon successful recognition.

Image: Close-up of the upgraded 3D fingerprint sensor, highlighting its larger size, 0.2-second identification speed, and 360-degree recognition capability.

5.1.2 Passcode Unlock

Enter your registered passcode on the keypad. The lock supports up to 100 passcodes. For added security, utilize the anti-peeping feature by entering random digits before or after your actual passcode.

Image: Illustration of the anti-peeping passcode feature, showing how to input random digits around the real passcode, and a scenario for generating temporary passcodes.

5.1.3 App Unlock (Bluetooth)

Download the eLinkSmart app on your smartphone. Pair your lock via Bluetooth. You can then unlock the door directly from the app, manage users, add/delete fingerprints and passcodes, and view access logs.

5.1.4 Mechanical Key Unlock

In case of emergency or battery depletion, use the provided mechanical keys to unlock the door manually.

5.2 Locking the Door

The lock will automatically re-lock after a set period (configurable via app) once unlocked. You can also manually lock the door by lifting the handle or pressing a specific button (refer to app settings for details).

6. Maintenance

6.1 Battery Management

The eLinkSmart T8 lock is designed for low power consumption, providing up to 12 months of standby time. The lock will provide a low battery warning when power is critically low. Replace the 4 AAA batteries promptly when indicated.

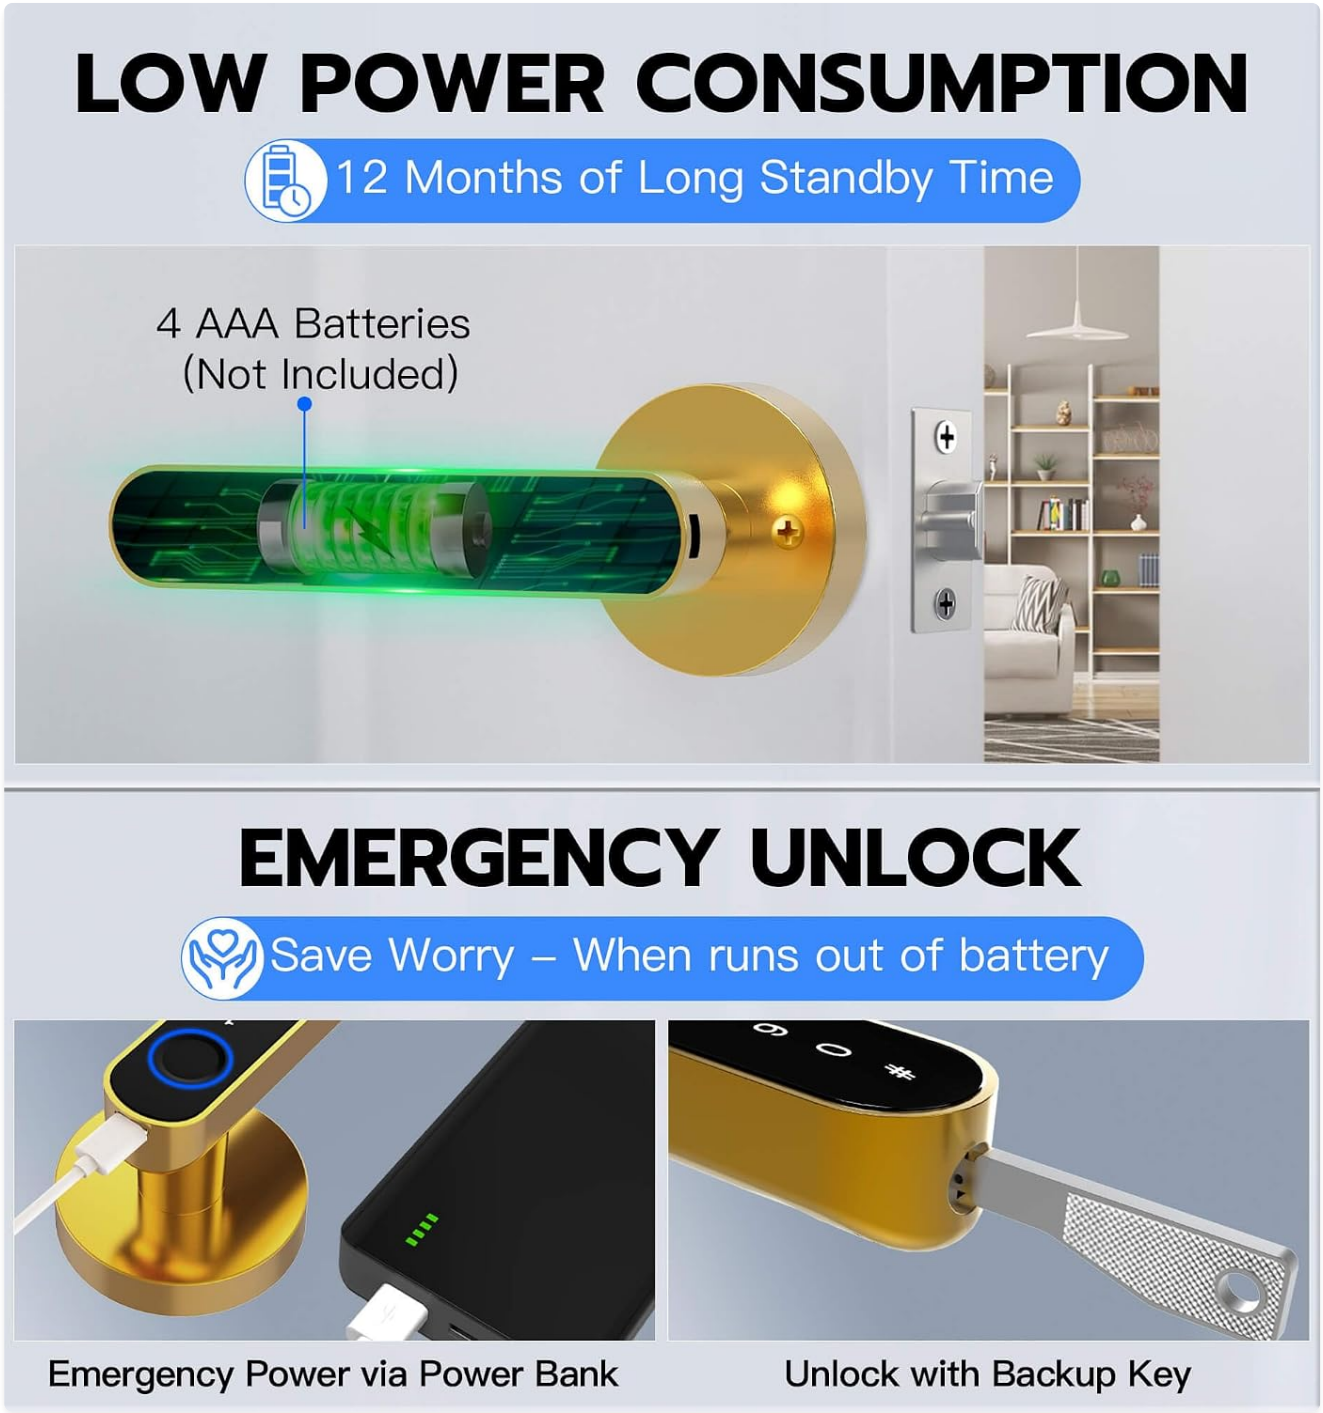

Image: Illustration showing the internal battery compartment for 4 AAA batteries and the emergency unlock options via power bank (USB-C port) and backup mechanical key.

6.2 Emergency Power

If the batteries completely drain, you can temporarily power the lock using a standard power bank connected to the USB-C port on the exterior handle, allowing you to unlock the door and replace the batteries.

6.3 Cleaning

Wipe the lock surface with a soft, dry cloth. Avoid using abrasive cleaners or solvents that could damage the finish or electronic components.

7. Troubleshooting

- **Lock not responding:** Check battery level. Replace batteries if low. Use emergency power via power bank or mechanical key.
- **Fingerprint not recognized:** Ensure your finger is clean and dry. Try re-registering your fingerprint if issues persist. Ensure proper placement on the sensor.
- **Passcode not working:** Verify the correct passcode is entered. Ensure you are not accidentally activating the anti-peeping feature incorrectly.
- **App connectivity issues:** Ensure Bluetooth is enabled on your phone and the lock is within range. Restart the app or re-pair the device if necessary.
- **Handle is loose:** Check and tighten the mounting screws on the interior handle.

8. Specifications

Brand	eLinkSmart
Model	T8
Lock Type	Fingerprint, Passcode, Smart, Keypad Handle
Material	Alloy Steel, Zinc
Item Dimensions (L x W x H)	6.3 x 2.6 x 2.6 inches
Applicable Door Thickness	1-3/16" to 2-1/8" (30mm - 55mm)
Backset	Adjustable 2-3/8" (60mm) or 2-3/4" (70mm)
Fingerprint Capacity	Up to 50
Passcode Capacity	Up to 100
Power Source	4 x AAA Batteries (not included)
