SHA CERLIN Queen Size Lift Up Storage Bed User Manual

Model: AK-KBMV0005

INTRODUCTION

This user manual provides comprehensive instructions for the assembly, operation, maintenance, and troubleshooting of your SHA CERLIN Queen Size Lift Up Storage Bed. Designed for optimal space utilization and comfort, this bed frame features a modern wingback headboard, upholstered platform, and a hydraulic lifting mechanism for convenient under-bed storage. Please read this manual thoroughly before assembly and use to ensure safe and proper operation.

SAFETY INFORMATION

WARNING: Always use both hands when operating the hydraulic lift mechanism. Be cautious of sharp edges during assembly and use. Ensure the bed frame is fully assembled and stable before use. Do not exceed the maximum weight recommendation of 800 lbs for the bed frame. The maximum weight capacity for lifting the mattress platform is 100 lbs.

- Keep all small parts and packaging materials away from children.
- Assemble the bed frame on a soft, clean surface to prevent scratches.
- Ensure all bolts and screws are securely tightened before use. Periodically check and re-tighten as necessary.
- Do not stand or jump on the bed frame.
- Distribute weight evenly across the bed frame.

PACKAGE CONTENTS

Before beginning assembly, verify that all components listed below are present and undamaged. If any parts are missing or damaged, please contact customer support.

- Bed Frame Components
- Headboard
- Wood Slats
- Assembly Hardware (bolts, screws, plastic buckles, tools)
- Instruction Manual

SETUP (ASSEMBLY)

Assembly of the SHA CERLIN Lift Up Storage Bed requires careful attention to detail. It is recommended to have two people for assembly.

1. **Prepare the Area:** Clear a spacious area for assembly. Lay down a blanket or cardboard to protect flooring and bed components from scratches.
2. **Unpack Components:** Carefully unpack all parts and lay them out. Refer to the parts list to ensure everything is present.
3. **Assemble the Frame:** Follow the step-by-step instructions provided in the separate assembly guide included with your package. Ensure all connections are secure. The bed frame features a sturdy metal structure for durability.
4. **Attach the Headboard:** Secure the modern wingback headboard to the main frame. The headboard is designed to protect your mattress from sliding and prevent pillows from falling.
5. **Install Slats:** The wooden slats are designed for easy assembly with plastic buckles. Ensure they are evenly spaced and securely fastened to provide optimal support for your mattress without the need for a box spring. Thick foams attached to

metal beams help mute noises from frictions.

6. **Hydraulic Mechanism Installation:** Install the hydraulic lifting mechanism as per the detailed instructions. Ensure it operates smoothly and safely.

OPERATING THE LIFT MECHANISM

The SHA CERLIN Lift Up Storage Bed features a hydraulic mechanism for easy access to under-bed storage.

- Lifting the Platform:** To access the storage, stand at the foot of the bed. Grasp the designated lifting handle (usually located at the center of the foot end of the platform) with both hands. Gently lift the platform upwards. The hydraulic system will assist in raising the mattress and platform smoothly.
- Accessing Storage:** Once the platform is fully raised, it will remain in the open position, providing ample space for storing items such as suitcases, storage bags, and out-of-season bedding. The under-bed storage height from slats to floor is approximately 10.8 inches.
- Lowering the Platform:** To close, gently pull the platform downwards. The hydraulic mechanism will control the descent, ensuring a slow and safe closing. Ensure no objects or body parts are in the way of the closing mechanism.

Important: The maximum weight capacity for lifting the mattress platform is 100 lbs. Do not attempt to lift the platform if the combined weight of the mattress and any items on the platform exceeds this limit.

Figure 6: Comparison of storage space.

MAINTENANCE

Regular maintenance will help prolong the life and appearance of your bed frame.

- **Cleaning:** For the upholstered fabric, gently vacuum regularly to remove dust. For spills, blot immediately with a clean, damp cloth. Do not use harsh chemicals or abrasive cleaners.
- **Hardware Check:** Periodically check all bolts, screws, and connections to ensure they remain tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Hydraulic System:** The hydraulic system is designed for long-term use. Avoid applying excessive force when lifting or lowering the platform. If the mechanism feels stiff or unusual, contact customer support.
- **Slats:** Ensure slats remain properly seated in their plastic buckles.

TROUBLESHOOTING

If you encounter any issues with your SHA CERLIN bed frame, refer to the following common problems and solutions.

Problem	Possible Cause	Solution
Bed frame is squeaking.	Loose hardware; friction between components.	Check and tighten all bolts and screws. The bed is designed with noise-free foams to minimize squeaking.
Hydraulic lift mechanism is difficult to operate.	Excessive weight on the platform; mechanism not properly installed.	Ensure the combined weight of the mattress and items on the platform does not exceed 100 lbs. Re-check installation of the hydraulic system as per assembly instructions.
Mattress slides on the frame.	Mattress not properly seated; protective device not engaged.	Ensure the mattress is centered on the slats. The wingback headboard and protective device at the back of the frame are designed to prevent mattress sliding.

SPECIFICATIONS

Brand:	SHA CERLIN
Model Number:	AK-KBMV0005
