## 2. SETUP

---

### 2.1 What's in the Box

- Ring Battery Doorbell
- USB-C Charging Cable
- Mounting Bracket
- Installation Tools and Hardware (screws, anchors)
- Setup Guide
- Security Sticker

## Works with Alexa

*Image 2: All components included with the Ring Battery Doorbell, including the doorbell unit, mounting bracket, charging cable, and installation hardware.*

### 2.2 Charging the Battery

The Ring Battery Doorbell features a built-in, rechargeable battery. Before installation, fully charge the device using the provided USB-C charging cable. To recharge, detach the doorbell from its wall mount and connect the cable to the USB-C port located on the back of the unit.

### 2.3 Installation

The estimated installation time is approximately 5 minutes. Follow these steps:

- 1. Mount the Bracket:** Secure the mounting bracket to your wall using the provided screws and anchors. Ensure it is level and at an appropriate height for optimal viewing.
- 2. Attach the Doorbell:** Slide the Ring Battery Doorbell onto the mounted bracket until it clicks securely into place.
- 3. App Setup:** Download the Ring app on your smartphone. Follow the in-app instructions to connect your doorbell to your home's 2.4GHz Wi-Fi network (802.11 b/g/n). A minimum upload speed of 2 Mbps is recommended for optimal performance.

For continuous charging, the doorbell can be hardwired to an existing doorbell system or transformer (8-24 VAC, 40VA max, 50/60Hz). Do not use halogen or garden-lighting transformers, or DC transformer/power supplies.

**Powered by a built-in battery.  
Includes hardwiring option for  
continuous charging.**

### **3. OPERATING YOUR RING BATTERY DOORBELL**

---

#### **3.1 Live View and Two-Way Talk**

Access a live video feed from your doorbell at any time through the Ring app. Use the two-way audio feature with noise cancellation to speak directly with visitors at your door, even when you're away from home.

**See, hear, and speak to anyone  
on camera**

*Image 4: A couple viewing and speaking to a visitor through the Ring app, showcasing the Live View and Two-Way Talk features.*

### **3.2 Motion Detection and Alerts**

The doorbell features advanced motion detection with customizable motion zones. You will receive real-time alerts on your phone when motion is detected. For enhanced alerts, including person and package detection, a Ring Protect subscription is required (sold separately).

### 3.3 Head-to-Toe Video

Benefit from a 150° horizontal and 150° vertical field of view, providing comprehensive Head-to-Toe HD video coverage (1440 x 1440 HD Video) of your entryway. This allows you to see visitors from head to toe and monitor packages left on your doorstep.

## Get 66% more vertical coverage than Video Doorbell (2nd Gen)

*Image 6: A visual comparison highlighting the 66% more vertical coverage offered by the new Ring Battery Doorbell compared to its previous generation.*

### 3.4 Alexa Integration

Integrate your Ring Battery Doorbell with Alexa-enabled devices. You can stream live video on your Echo Show, receive announcements when someone is at your door, and use voice commands to interact with your doorbell.

## 4. MAINTENANCE

---

### 4.1 Battery Charging

The built-in battery life varies based on usage and environmental factors. When the battery is low, you will receive a notification via the Ring app. To recharge, simply detach the doorbell from its mounting bracket and

connect the provided USB-C charging cable. The charging time will depend on the power source.

## 4.2 Cleaning

To ensure optimal performance and clear video quality, regularly clean the doorbell's camera lens and surrounding area. Use a soft, damp cloth to gently wipe away dust, dirt, or smudges. Avoid abrasive cleaners or materials that could scratch the lens.

# 5. TROUBLESHOOTING

---

## 5.1 Connectivity Issues

- **Check Wi-Fi:** Ensure your home Wi-Fi network is active and the doorbell is within range. The device requires a 2.4GHz Wi-Fi connection.
- **Signal Strength:** Use the Ring app to check the device's signal strength. If it's weak, consider moving your Wi-Fi router closer or using a Wi-Fi extender.
- **Internet Speed:** Verify your internet connection meets the minimum upload speed of 2 Mbps for optimal performance.

## 5.2 Motion Detection Problems

- **Adjust Motion Zones:** In the Ring app, customize your motion zones to focus on areas of interest and reduce false alerts.
- **Sensitivity Settings:** Experiment with motion sensitivity settings to find the right balance for your environment.
- **Environmental Factors:** Strong sunlight, shadows, or moving objects (like tree branches) can sometimes trigger false alerts. Adjust placement or motion zones accordingly.

## 5.3 Battery Life Concerns

- **Usage Patterns:** Frequent Live View access, numerous motion events, or extreme temperatures can reduce battery life.
- **Hardwiring:** If battery life is consistently short, consider hardwiring the doorbell to an existing chime system for continuous charging.

## 5.4 Operating Conditions

The Ring Battery Doorbell is designed to operate in temperatures ranging from -4°F to 122°F (-20°C to 50°C). Prolonged exposure to direct sunlight and other extreme conditions may affect device temperature and performance.

# 6. SPECIFICATIONS

---

Feature	Detail
Dimensions	4.98 in x 2.44 in x 0.91 in (6.19 cm x 2.30 cm x 12.65 cm)
