**BN-LINK SJTW**

# BN-LINK 1 to 3 Splitter Extension Cord Instruction Manual

Model: SJTW

## Introduction

Thank you for choosing the BN-LINK 1 to 3 Splitter Extension Cord. This versatile and durable extension cord is designed to provide convenient power access for multiple appliances, especially in outdoor settings. With its weather-resistant construction and multi-outlet design, it's an ideal solution for lighting, landscaping, and holiday decorations. This manual provides essential information for safe and effective use of your extension cord.

## Important Safety Information

**Please read and understand all safety warnings before using this product.**

- **Grounded Connection:** This extension cord features a 3-prong grounded plug. Always ensure it is plugged into a properly grounded outlet to prevent electrical shock.
- **Capacity Limits:** Do not exceed the maximum electrical rating of 13 Amps or 1625 Watts for the entire cord. Overloading can lead to overheating and fire hazards.
- **Weather Resistance:** While designed to resist moisture, abrasion, and sunlight, ensure all connections are secure and outlets not in use are covered with their protective caps to prevent water intrusion.
- **Inspection:** Before each use, inspect the cord for any damage, cuts, or frayed wires. Do not use if the cord or plugs are damaged.
- **Placement:** Avoid running the cord through doorways, windows, or under carpets where it can be pinched or damaged. Keep out of reach of children and pets.

For more detailed safety warnings and information, please refer to the product packaging.

## Setup Instructions

### Unpacking and Initial Inspection

Carefully remove the BN-LINK 1 to 3 Splitter Extension Cord from its packaging. Uncoil the cord and visually inspect it for any signs of damage or defects that may have occurred during shipping. Ensure all three outlets and the main plug are intact.

Image: The BN-LINK 1 to 3 Splitter Extension Cord, coiled, displaying its main plug and three distinct split outlets.

### Connecting the Extension Cord

1. Locate a suitable 3-prong grounded electrical outlet.
2. Plug the main male end of the BN-LINK extension cord into the grounded outlet.

3. Position the splitter unit and the three individual 6-foot extension cords as needed for your application. The total combined length of the cord is 36 feet (18 feet from the main plug to the splitter, and three 6-foot cords from the splitter).

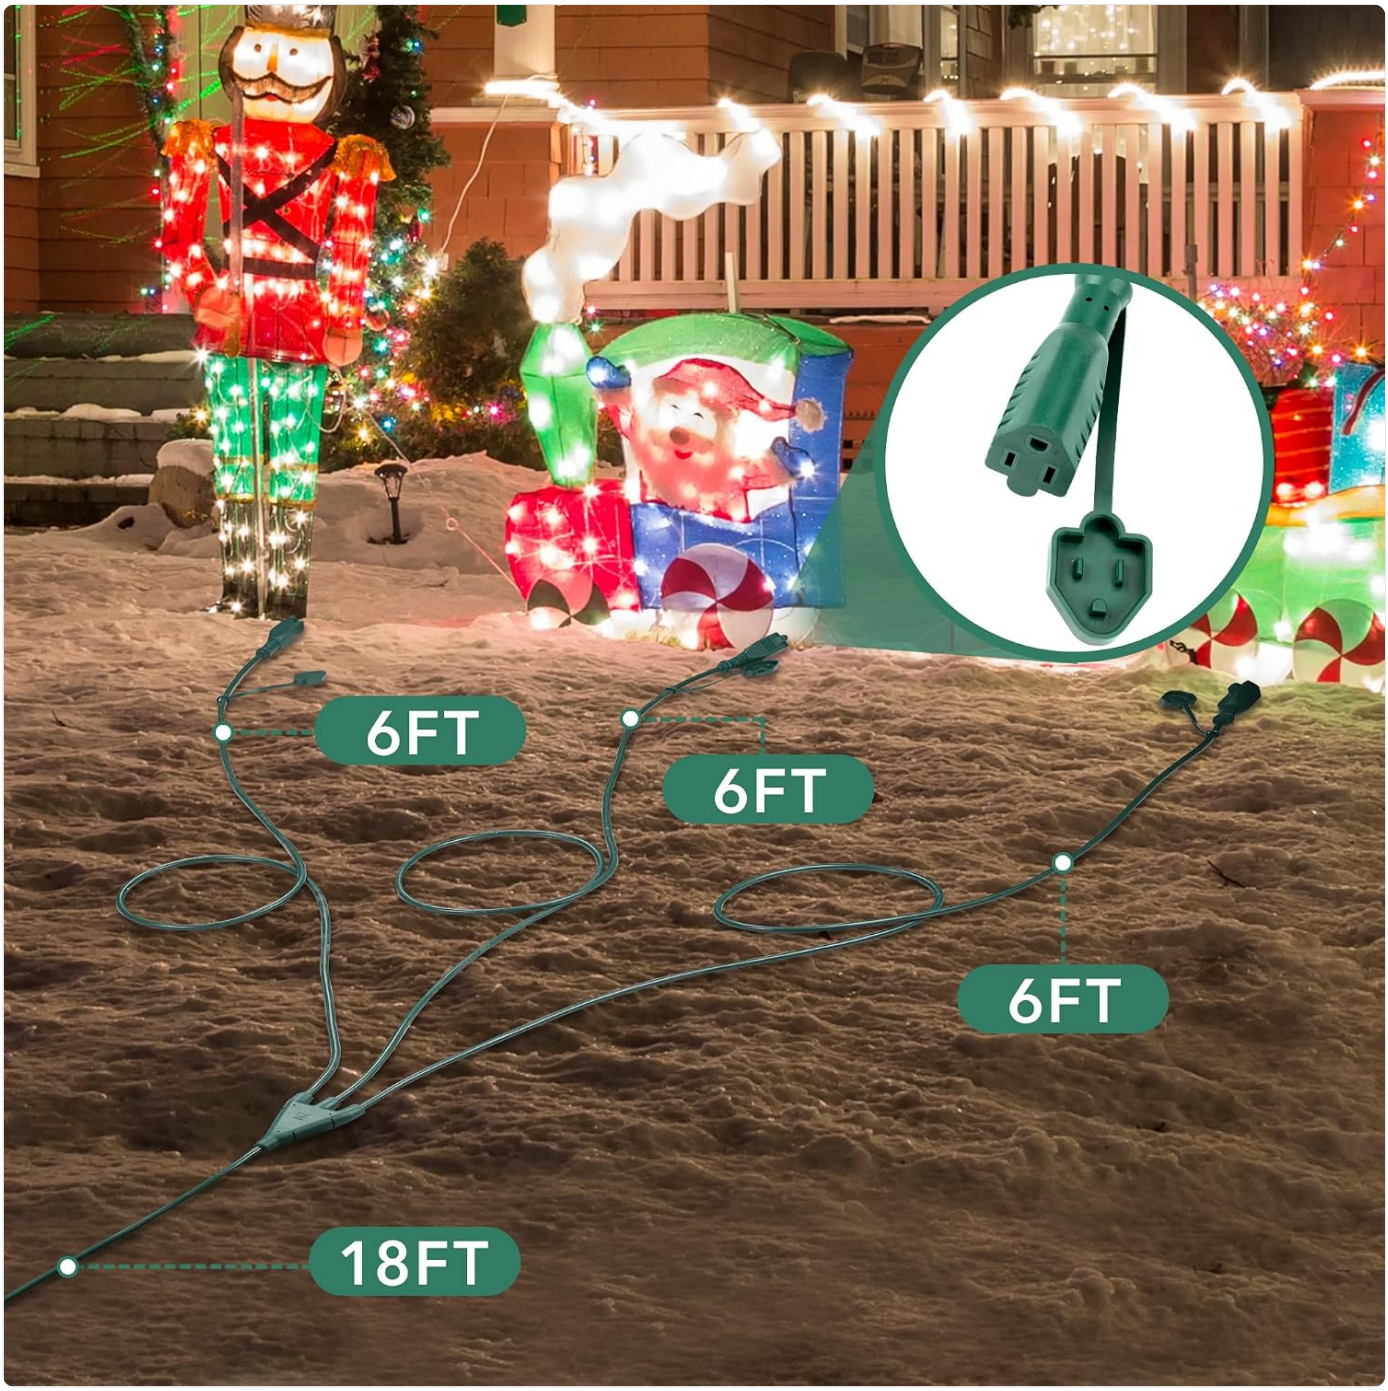

Image: A visual diagram showing the 18-foot main cord extending to a splitter, which then branches into three separate 6-foot extension cords, illustrating the total reach and layout.

## Operating Your Extension Cord

## Utilizing Multiple Outlets

The BN-LINK extension cord allows you to power up to three devices simultaneously from a single wall outlet. Simply plug your devices into the female ends of the three split cords. Ensure the total wattage of all connected devices does not exceed 1625 Watts.

## Outdoor Use

This extension cord is specifically designed for outdoor applications. Its dark green color blends discreetly with landscaping, making it ideal for seasonal lighting, garden tools, and other outdoor electrical needs. The 16/3 SJTW rating indicates its suitability for heavy-duty outdoor use, resisting moisture, abrasion, and prolonged exposure to sunlight.

## Care and Maintenance

- **Protective Covers:** Each outlet is equipped with a protective cover. Always ensure these covers are securely placed over unused outlets to protect against rain, snow, and dust, especially when used outdoors.
- **Cleaning:** To clean the cord, wipe it with a damp cloth. Do not immerse the cord or plugs in water.
- **Storage:** When not in use, coil the extension cord neatly and store it in a dry place, away from direct sunlight and extreme temperatures.

# Safety Cover

Resists moisture and dust intrusion when outlets are not in use

## Troubleshooting

- **No Power to Devices:**
  - Ensure the main plug is fully inserted into a working electrical outlet.
  - Check if the connected devices are functioning correctly when plugged directly into a wall outlet.
  - Verify that the total wattage of all connected devices does not exceed the cord's maximum capacity (1625W).
  - Inspect the cord for any visible damage or cuts. Discontinue use if damage is found.
- **Cord or Plugs Feel Warm/Hot:**

- Immediately unplug all devices and the extension cord from the wall.
- This indicates an overload or potential damage. Ensure the total wattage of connected devices is within the cord's limits.
- If the issue persists after reducing the load, discontinue use and replace the cord.

## Product Specifications

| Feature | Detail |
|---|---|
| Model Number | SJTW |
| Cord Length (Total) | 36 ft (18 ft main + 3 x 6 ft split) |
| Wire Gauge | 16/3 SJTW |
| Voltage | 125 Volts |
| Input Current | 13 Amps |
| Maximum Wattage | 1625 Watts |
| Outlets | 3 (Grounded) |
| Color | Green |
| Weather Resistant | Yes |
| Manufacturer | BN-LINK |
| Country of Origin | China |
