

## Panasonic ES-LS9Q-K

# Panasonic ES-LS9Q-K LAMDASH PRO 6-Blade Shaver Instruction Manual

Model: ES-LS9Q-K

## 1. INTRODUCTION

This manual provides essential instructions for the safe and effective use of your Panasonic ES-LS9Q-K LAMDASH PRO 6-Blade Shaver. Please read this manual thoroughly before using the product and retain it for future reference. This advanced shaver features a 6-blade system, a powerful linear motor, and an automatic cleaning and charging station for optimal performance and convenience.

*This image displays the Panasonic ES-LS9Q-K LAMDASH PRO 6-Blade Shaver, its automatic cleaning and charging station, and a semi-hard travel case. The shaver features a digital display showing battery percentage.*

## 2. SAFETY INFORMATION

To reduce the risk of injury, electric shock, fire, or damage to the product, always observe the following safety precautions:

- Do not immerse the AC adapter or charging station in water.
- Do not use the shaver if the cord or plug is damaged.
- Keep the appliance out of reach of children.
- Do not disassemble, repair, or modify the shaver yourself. Contact authorized service personnel.
- Ensure the voltage indicated on the AC adapter matches your local power supply.
- Do not use the shaver in a bath or shower when it is connected to the power cord.

### 3. PACKAGE CONTENTS

Verify that all items are included in your package:

- Panasonic ES-LS9Q-K Shaver Unit
- Fully Automatic Cleaning and Charging Station
- Semi-Hard Travel Case
- Special Detergent (1 bag)
- AC Adapter
- Special Oil
- Cleaning Brush

### 4. PRODUCT OVERVIEW

The Panasonic ES-LS9Q-K is designed for a close and comfortable shave. Key features include a 6-blade system, a high-speed linear motor, and a flexible 5D head.

This diagram shows the 6-blade system and the linear motor drive, which achieves approximately 14,000 strokes per

minute, resulting in about 84,000 cutting actions per minute for efficient shaving.

## Key Technologies:

- **6-Blade System:** Features two types of ultra-thin deep shaving blades and two chin trimmer blades for comprehensive beard removal.
- **Linear Motor Drive:** Delivers approximately 14,000 strokes per minute for consistent power regardless of battery level.
- **LAMDASH AI+:** An intelligent beard sensor that detects beard density 233 times per second and adjusts power accordingly, reducing skin irritation.
- **5D Flexible Head:** The shaver head moves in 22 independent directions, conforming closely to facial contours for a gentle and deep shave.

## ラムダッシュAI+※

常に最適なパワーで肌へ余分な負担をかけずに、やさしく早剃り。

※ヒゲの濃さや、シェーバーヘッド内部のヒゲクズによって、センサーが反応(駆動音の変化)しない場合がありますが、異常ではありません。

## 5. SETUP

### 5.1 Initial Charging

1. Connect the AC adapter to the charging station.
2. Place the shaver into the charging station. Ensure it is seated correctly.
3. Plug the AC adapter into a power outlet. The display will indicate charging status.
4. Allow approximately 1 hour for a full charge. A full charge provides about 14 days of use (based on 3 minutes of dry shaving once a day).

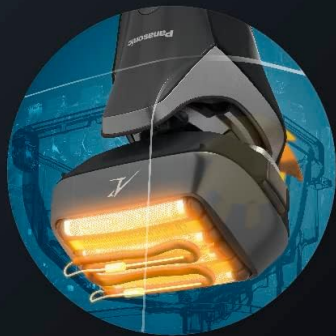

### 5.2 Setting Up the Automatic Cleaning Charger

1. Open the lid of the cleaning station.
2. Insert one bag of special detergent into the designated compartment.
3. Fill the cleaning station with water up to the indicated fill line.
4. Close the lid securely.

The automatic cleaning and charging system for the shaver. It features a compact design, provides over 99% sterilization, and includes a heater and fan for efficient drying after cleaning. Dimensions are shown as 17.5 cm height, 9.5 cm width, and 9.4 cm depth.

## 6. OPERATING INSTRUCTIONS

### 6.1 Shaving

The shaver can be used for both wet and dry shaving.

- **Dry Shaving:** Ensure your face is clean and dry. Press the power button to turn on the shaver. Gently move the shaver against the direction of beard growth.
- **Wet Shaving:** Apply shaving foam or gel to your face. Press the power button to turn on the shaver. Shave as you would with a manual razor, rinsing the shaver head under water periodically to clear lather and hair.
- **Shaving While Charging:** The shaver can be used while connected to the AC adapter if the battery is depleted. **Caution: Do not use in wet environments (e.g., bath, shower) when connected to the power cord.**

## 充電・交流式

バッテリーが切れても  
コードをつなげて使用可能。

※お風呂やシャワー室など、水にぬれる環境で使用しないでください。

○イラストはイメージです。

*This image illustrates that the shaver can be used while connected to the AC adapter, even if the battery is depleted. Note:  
Do not use in wet environments like baths or showers when corded.*

## 6.2 Using the Automatic Cleaning Function

1. After shaving, rinse the shaver head under running water to remove loose hairs.
2. Place the shaver into the prepared automatic cleaning and charging station.
3. Press the cleaning cycle button on the station. The station will automatically clean, rinse, and dry the shaver.
4. The cleaning cycle typically takes several hours, including drying.

## 7. MAINTENANCE

### 7.1 Daily Cleaning

- After each use, turn off the shaver and remove the outer foil frame.
- Tap out any loose hair clippings.
- Rinse the outer foil and inner blades thoroughly under running water.
- For a deeper clean, use the sonic cleaning mode by applying hand soap and water to the head, then

turning the shaver on for a few seconds before rinsing.

- Allow the parts to air dry completely before reassembling.

### 7.2 Oiling

Apply a small drop of the special oil to each inner blade and outer foil once a week or as needed to maintain optimal performance and reduce wear.

### 7.3 Blade and Foil Replacement

For best shaving performance, it is recommended to replace the outer foil and inner blades periodically. Replacement frequency depends on usage and beard type. Refer to Panasonic's official website or authorized retailers for genuine replacement parts.

## 8. TROUBLESHOOTING

- If you encounter issues with your shaver, refer to the following common solutions:
- **Shaver does not turn on:** Ensure the battery is charged. If using corded, check the power outlet and adapter connection.
  - **Reduced shaving performance:** Clean the shaver thoroughly. Apply oil to the blades. Consider replacing the outer foil and inner blades if they are worn.
  - **Cleaning station not functioning:** Check if the station is properly connected to power. Ensure there is enough water and detergent.
  - **Skin irritation:** Ensure blades are clean and sharp. Shave gently and avoid pressing too hard. Use a wet shave with foam if dry shaving causes irritation.

For persistent issues, contact Panasonic customer support.

## 9. SPECIFICATIONS

Feature	Specification
Model Number	ES-LS9Q-K
Blade System	6-Blade
Motor Type	Linear Motor (approx. 14,000 strokes/min)
Inner Blade Angle	30° acute angle nano-edge
Head Type	Adhesion 5D Head (fixed/movable switching)
Power Control	LAMDASH AI+
Charge Display	20 levels of remaining charge (Smart LED)
Cleaning Function	Fully Automatic Cleaning Charger, Sonic Cleaning Mode, Whole Body Washable
Battery Life	Approx. 14 days (with 1 full charge)
Power Supply	Rechargeable/AC type (AC100-240 V, 50-60 Hz)

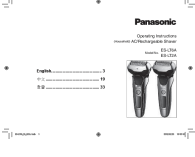

Charging Time	Rapid 1 hour charge (3-minute quick charge available)
Battery Type	Li-ion rechargeable battery
Dimensions (H x W x D)	17.2 x 7.2 x 5.9 cm
Weight	Approx. 220 g
Color	Craft Black

## 10. WARRANTY AND SUPPORT

Your Panasonic ES-LS9Q-K shaver is covered by a manufacturer's warranty. Please refer to the warranty card included in your package for specific terms and conditions. For product support, replacement parts, or service inquiries, please visit the official Panasonic website or contact their customer service department.
