SETUP

1. Components Check

Before beginning assembly, verify all components are present and undamaged. Your kit includes:

- 1 set of door planks (assembly required)
- 1 sliding track hardware set
- All necessary assembly hardware (bolts, screws, rollers, track, etc.)

Refer to the images below for a visual representation of the door planks and hardware components.

Product comes in separate planks and hardware. Assembly required.

AVAILABLE COLORS

Image: Disassembled door planks and various hardware components, indicating that assembly is required.

Image: A detailed view of all hardware components included in the kit, such as the track, rollers, and fasteners.

2. Door Assembly

The door planks are crafted from 100% solid natural knotty pine wood and come pre-finished with a cherry red stain. Assembly is required. The pieces are engineered with a tongue and groove profile and pre-drilled holes for precise fitting. Follow the detailed assembly instructions provided in the separate assembly guide (if applicable) or the included diagrams. All assembly hardware is included.

3. Hardware Installation

The sliding track hardware is constructed of high-quality powder-coated steel with an Oil Rubbed Bronze finish. Install the track and rollers according to the provided diagrams and instructions. Ensure the track is securely mounted to a structurally sound wall. The door hardware has a weight capacity of 150 lbs.

OPERATING INSTRUCTIONS

The Calhome K Series Sliding Barn Door is designed for smooth, quiet operation. To open or close the door, gently slide it along the mounted track. Avoid forcing the door, as this can cause damage to the rollers or track. Ensure the path of the door is clear of obstructions at all times.

MAINTENANCE

1. Wood Care

The door's cherry red stained finish is fade-resistant. To maintain its appearance, clean the wood surface with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the finish. Periodically inspect the wood for any signs of wear or damage, and address them promptly to preserve the door's integrity.

2. Hardware Care

Regularly inspect the sliding track and rollers for any debris or obstructions. Clean the track with a dry cloth. Lubricate the rollers periodically with a silicone-based lubricant to ensure continued smooth operation. Check all bolts and fasteners for tightness and retighten if necessary to prevent loosening over time.

TROUBLESHOOTING

1. Door Not Sliding Smoothly

If the door does not slide smoothly, first check the track for obstructions or debris. Ensure the rollers are clean and properly lubricated. Verify that the track is level and securely mounted to the wall. Loose fasteners can also affect smooth operation, so check and tighten all connections.

2. Door Panels Misaligned or Incorrect Parts

In some instances, door panels may be incorrectly manufactured or cut, leading to fitment issues (e.g., receiving two right panels instead of a right and a left, or cross braces that are too long). If you encounter such issues, contact Calhome customer support for assistance. Do not attempt to modify parts unless you possess the necessary tools and expertise, as unauthorized modifications may void your warranty.

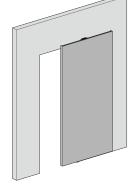

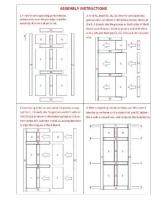

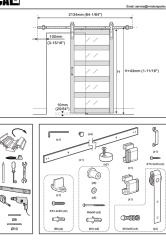

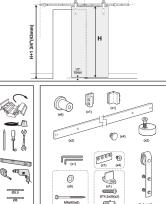

SPECIFICATIONS

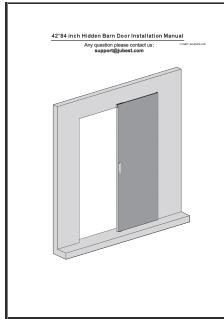

Brand	Calhome
Model	Barn Door Slab
Size	84"x38"
Color	Cherry Red
Material	Steel, Wood (100% solid natural knotty pine wood)
Style	Hardware Finish: Oil Rubbed Bronze
