4. SETUP INSTRUCTIONS

Follow these steps for initial setup and connection:

1. **Before you begin:** On your iPhone, forget any previous regular Bluetooth and Wi-Fi connections to your car.
2. Start your car's engine.
3. On your car's touch screen, navigate to the CarPlay screen. Wait for the car's system to load.
4. Plug the Wireless CarPlay Adapter into the wired CarPlay USB-A socket in your car. Ensure the USB-A end of the provided cable goes into your car's port and the USB-C end goes into the dongle.
5. Wait for the CarPlay icon on your car's screen to light up.
6. Once the CarPlay icon lights up, press it. Your car's system will begin a Bluetooth search.
7. On your iPhone, go to Settings and start Bluetooth searching. When your car's make appears as an item to pair

with, select it.

8. The car's screen will display a pairing request. Choose to pair.
9. On your iPhone, go to Settings and start Wi-Fi searching. When your car's make appears as an item to join with, select it.
10. When prompted on your iPhone to allow CarPlay to wirelessly link, choose "Allow".

After the first successful setup, the adapter will auto-connect to your iPhone when you start your car.

5. OPERATING THE ADAPTER

Once connected, the Wireless CarPlay Adapter allows you to use all standard CarPlay functions wirelessly. This includes:

- **Navigation:** Use Apple Maps, Google Maps, or other compatible navigation apps for real-time GPS guidance.
- **Music & Audio:** Stream music, podcasts, and audiobooks from your favorite apps with original sound quality.

- **Calls & Messaging:** Make and receive calls, send and read messages hands-free.
- **Voice Control:** Utilize Siri for voice commands, calls, navigation, and more.

The adapter fully integrates with your car's existing controls, including steering wheel buttons, touchscreen, and physical knobs, providing a familiar and intuitive user experience.

6. MAINTENANCE

The Wireless CarPlay Adapter requires minimal maintenance. Keep the device clean and free from dust. Avoid exposing it to extreme temperatures or moisture. Do not attempt to disassemble the device.

7. TROUBLESHOOTING

If you encounter issues with your Wireless CarPlay Adapter, please refer to the following common solutions:

- **Connection Issues:** If the item is not working properly or fails to connect, simply reboot it by unplugging the adapter from the car's USB port and then replugging it.
- **Initial Setup Problems:** Before starting the setup process, ensure your phone has forgotten any regular Bluetooth and Wi-Fi connections to the car. This prevents conflicts.

- **USB Port Type:** Ensure the USB-A end of the cable is connected to your car's CarPlay USB-A socket, and the USB-C end is connected to the dongle. If your car's CarPlay socket is Type-C, contact customer support for a Type-C to Type-C cable.
- **Firmware Updates:** If the unit is working well, it is generally recommended NOT to update the firmware. Only update if specifically instructed by customer support to resolve a known issue.
