Brighttown Snowflake Solar Pathway Lights

INSTRUCTION MANUAL

Introduction

Thank you for choosing Brighttown Snowflake Solar Pathway Lights. This manual provides essential information for the proper setup, operation, and maintenance of your new solar lights. Please read these instructions carefully before use and retain them for future reference.

Package Contents

Ensure all items are present in your package:

- 4 x 12 LED Snowflake Solar Firefly Lights
- 4 x Ground Stakes
- 1 x User Manual (this document)

Setup and Installation

Follow these steps to assemble and install your solar pathway lights:

1. **Connect the Stake:** Attach the metal ground stake to the bottom of the solar panel unit. Ensure it is securely fastened.
2. **Activate the Switch:** Locate the power switch on the underside of the solar panel. Slide the switch to the 'ON' position for continuous operation or 'FLASH' for flashing mode.
3. **Select Location:** Choose an outdoor location that receives direct sunlight for 6-8 hours daily. This ensures optimal charging and lighting performance. Avoid areas under trees or shadows.
4. **Insert into Ground:** Gently push the assembled light into the ground. Ensure the solar panel is positioned to face the sun directly.
5. **Adjust Solar Panel Angle:** The solar panel can be adjusted to optimize sunlight reception. Angle it towards the sun for maximum charging efficiency.

Intelligent Light Control System

No additional cost on batteries or electric power

Operating Instructions

Your Brighttown Snowflake Solar Pathway Lights are designed for automatic and efficient operation.

- **Automatic On/Off:** The lights feature an intelligent light control system. They will automatically turn on at dusk and turn off at dawn, provided the switch is in the 'ON' or 'FLASH' position.
- **Charging:** The built-in 1.2V, 600mAh Ni-MH battery charges during the day (4-6 hours for a full charge) via the solar panel.
- **Lighting Duration:** A full charge provides 10-12 hours of illumination at night.
- **Lighting Modes:** You can select between two lighting modes:
 - **Steady On:** For a constant glow.
 - **Flash:** For a dynamic, twinkling effect.

To switch modes, use the slide switch located on the underside of the solar panel.

2 Lighting Modes

Enjoy gentle lighting at night

Mode 1:
Steady On

Mode 2:
Flash

Image: Two Lighting Modes. This image displays the two available lighting modes: 'Steady On' and 'Flash', allowing users to choose their preferred illumination style.

Sway & Dance With the Breeze

As if fireflies dancing in your yard

2 Lighting Modes	Lighting Modes	Steady ON
12 LED	LED Quantity	6 LED
Ni-MH 600 mAh	Battery	300 mAh
10-12 Hours	Working Time	6-8 Hours

Image: Swaying with Wind Feature. This image highlights the flexible design of the lights, allowing them to sway gently with the breeze, creating a dynamic visual effect.

Maintenance

To ensure the longevity and optimal performance of your solar lights, follow these maintenance tips:

- **Cleaning the Solar Panel:** Regularly wipe the solar panel with a soft, damp cloth to remove dust, dirt, or debris. A clean panel ensures efficient sunlight absorption and charging.

- **Battery Care:** The built-in Ni-MH battery is designed for long-term use. If the lights' performance significantly decreases over time, the battery may need replacement. Refer to the manufacturer for compatible replacement batteries.
- **Winter Storage:** During prolonged periods of low sunlight or harsh winter conditions, you may choose to bring the lights indoors. Clean them thoroughly and store them in a dry place.

Troubleshooting

If your solar lights are not functioning as expected, try the following solutions:

- **Lights Not Turning On:**
 - Ensure the power switch on the solar panel is in the 'ON' or 'FLASH' position.
 - Verify the solar panel is receiving direct sunlight for at least 6-8 hours during the day.
 - Check for any obstructions (e.g., leaves, dirt) on the solar panel and clean it if necessary.
 - Test the lights in a completely dark environment to ensure the light sensor is not detecting ambient light.
- **Short Lighting Duration:**
 - The solar panel may not be receiving enough direct sunlight. Relocate the light to a sunnier spot.
 - The solar panel might be dirty. Clean it as described in the Maintenance section.
 - The battery may not be fully charged due to insufficient sunlight or an aging battery.
- **Lights Appear Dim:**
 - Ensure the solar panel is clean and receiving adequate sunlight.
 - The battery might be low. Allow for a full day of charging.

Specifications

Key technical details for your Brightown Snowflake Solar Pathway Lights:

Brand	Brightown
Model	B0DK97JS6V
Light Color	Warm White
Number of LEDs	12 per light (48 total for 4-pack)
Battery	1.2V, 600mAh Ni-MH
Charging Time	4-6 hours (direct sunlight)
Running Time	10-12 hours (after full charge)
Waterproof Grade	IP65
Material	Polycarbonate
Dimensions (L x W x H)	1"L x 5"W x 15"H (per light)
Lighting Modes	Steady On, Flash

4 PACK-12 Snowflake

Image: Product Dimensions and Components. This image provides a visual breakdown of the light's dimensions and its main components, such as the 12 LEDs, 1.2V Ni-MH 600mAh battery, stainless steel rod, and ABS ground stake.

Image: All-Weather Resistant Design. This image demonstrates the lights' durability against various weather conditions, including rain and snow, emphasizing their IP65 waterproof rating.

Safety Information

- This product is designed for outdoor use only.
- Do not attempt to disassemble or modify the product, as this may void the warranty and cause damage.
- Keep away from open flames or extreme heat sources.

- Ensure the ground stake is firmly inserted to prevent the light from falling over.

Warranty and Support

For warranty information or technical support, please refer to the product packaging or contact Brightown customer service directly. Keep your purchase receipt as proof of purchase.
