Akko ACR Pro 68 Mechanical Gaming Keyboard

User Manual

Contents Introduction Package Setup Operation Maintenance Troubleshooting Specifications Warranty & Support

1. Introduction

The Akko ACR Pro 68 is a high-performance 65% layout mechanical gaming keyboard designed for enthusiasts and gamers. It features a durable acrylic and CNC-machined construction, a gasket mount structure for an enhanced typing experience, and vibrant RGB backlighting. The hot-swappable design allows for easy customization of switches without soldering, while the programmable keys offer personalized control through the Akko Cloud Driver software.

2. Package Contents

Please verify that all items listed below are included in your package:

- Akko ACR Pro 68 Mechanical Keyboard
- Detachable USB-C Cable
- Additional Keycaps (Pink and Black variants)
- Keycap Puller
- Switch Puller
- Allen Wrench
- Metal Switch Plate
- Foam Layer
- Akko Graphic Tape Layer
- Silicone Gasket Pieces
- Optional Stick-on Riser Feet
- Spare Daughter Board

The Akko ACR Pro 68 keyboard showcasing its RGB backlighting and compact layout.

3. Setup

3.1 Connecting the Keyboard

To connect your Akko ACR Pro 68 keyboard, use the provided detachable USB-C cable. Insert the USB-C end into the port on the keyboard and the USB-A end into an available USB port on your computer. The keyboard is plug-and-play and should be recognized automatically by most operating systems.

The USB-C port located on the side of the Akko ACR Pro 68 keyboard for connection.

3.2 Software Installation (Akko Cloud Driver)

For advanced customization, including key remapping, macro creation, and detailed lighting effects, download and install the Akko Cloud Driver software from the official Akko website. This software allows you to personalize your keyboard settings to suit your preferences.

4. Operating Your Keyboard

4.1 Key Features

- **Hot-Swappable Switches:** The ACR Pro 68 allows you to easily swap out mechanical switches without soldering. This enables customization of typing feel and sound.
- **RGB Backlighting:** Enjoy customizable RGB lighting effects with various modes and colors. The underglow RGB feature provides additional aesthetic options.
- **Programmable Keys & Macros:** Utilize the Akko Cloud Driver to remap keys and create complex macros for

enhanced productivity or gaming.

- **Compact 65% Layout:** This 68-key layout saves desk space while retaining essential keys for efficient use.
- **Gasket Mount Structure:** The internal gasket mounting system provides a softer, more cushioned typing feel, reducing fatigue during extended use.

The compact dimensions of the Akko ACR Pro 68 keyboard, measuring 329mm in length.

4.2 Function Key Combinations

The keyboard features various function (FN) key combinations for quick access to multimedia controls, lighting adjustments, and other functions. Refer to the specific keycap legends for detailed combinations. Common examples include:

- **FN + ; or ':** Adjust speed of lighting effects.
- **FN + Up/Down Arrow:** Adjust brightness of lighting.
- **FN + \:** Change lighting color.
- **FN + Win:** Lock/Unlock Windows key.

5. Maintenance

5.1 Cleaning

To clean your keyboard, gently wipe the keycaps and case with a soft, damp cloth. For deeper cleaning, you may remove the keycaps using the provided keycap puller and clean underneath with compressed air or a small brush. Ensure the keyboard is disconnected from power before cleaning.

5.2 Replacing Switches and Keycaps

The hot-swappable design allows for easy replacement of switches and keycaps. Use the provided switch puller to carefully remove switches by gripping them firmly and pulling straight up. For keycaps, use the keycap puller to gently pry them off. When installing new switches, align the pins with the sockets and press down firmly until they click into place. Ensure the pins are not bent before insertion.

Demonstration of removing a keycap and a hot-swappable switch from the keyboard.

6. Troubleshooting

6.1 RGB Lighting Issues

If your RGB lighting behaves erratically (e.g., turns off unexpectedly when adjusting brightness or speed), try the following:

- Ensure the keyboard firmware is up to date via the Akko Cloud Driver.
- Try pressing FN + \ to cycle through colors, which may reactivate the lighting.
- Verify that the USB cable is securely connected and try a different USB port.

6.2 Connectivity Problems

If the keyboard is not recognized by your computer:

- Try connecting the keyboard to a different USB port on your computer.
- Test the keyboard on another computer to rule out system-specific issues.
- Ensure the provided USB-C cable is used, as some cables may not support data transfer.

6.3 Typing Feel or Sound

The Akko ACR Pro 68 is designed with a gasket mount for a unique typing feel. If you desire a different sound profile or feel:

- Experiment with different hot-swappable switches (e.g., linear, tactile, clicky) to find your preferred type.
- Consider adding or removing internal foam layers (if accessible) to adjust acoustics.
