PINDOWS PDS-2106

PINDOWS Analog Quartz Wrist Watch User Manual

Model: PDS-2106

1. Introduction

Thank you for choosing the PINDOWS Analog Quartz Wrist Watch. This manual provides essential information for the proper setup, operation, and maintenance of your watch. Designed for reliability and ease of use, this timepiece features an imported Japanese movement for accurate timekeeping, an easy-to-read luminous dial, and a durable silicone strap.

Image 1.1: Front view of the PINDOWS Analog Quartz Wrist Watch.

This watch is particularly suited for professionals and students who require a clear, reliable, and easy-to-read timepiece, such as nurses, doctors, EMT workers, and other medical professionals.

2. Setup

2.1 Setting the Time

1. Locate the crown on the right side of the watch case.
2. Gently pull the crown outwards to the time-setting position. You may feel a slight click.
3. Rotate the crown clockwise or counter-clockwise to adjust the hour and minute hands to the correct time.
4. Once the time is set, push the crown back inwards firmly until it clicks into its original position. This will start the watch movement.

3. Operating Instructions

3.1 Reading the Dial

The PINDOWS watch features a clear, easy-to-read dial with both 12-hour and 24-hour markings. The large Arabic numerals for the 12-hour format are prominent, while smaller red numerals indicate the 24-hour format. A striking red second hand allows for precise pulse readings, which is beneficial for medical professionals.

Image 3.1: Detailed view of the watch dial showing 12 and 24-hour markings.

3.2 Luminous Dial Feature

The watch is equipped with a full luminous dial, ensuring clear visibility in low-light conditions. The hour and minute hands, along with the hour markers, glow in the dark after exposure to light. The intensity and duration of the glow depend on the exposure time and light source.

- **Fluorescent Light:** 2-3 Hours of charge.
- **Incandescent Light (150W Lamp):** 1-2 Hours of charge.
- **Sunlight (Clear Weather):** 15-30 Minutes of charge.

Image 3.3: Enhanced view of the luminous dial in darkness.

4. Maintenance

4.1 Cleaning the Watch

The PINDOWS watch features a super soft, breathable, and 100% silicone band, which is easy to clean. To maintain its hygiene and appearance:

- Wipe the silicone band and watch case with a soft cloth dampened with water or rubbing alcohol.
- Avoid using harsh chemicals or abrasive materials, as these can damage the watch's finish or strap.
- Ensure the crown is fully pushed in before cleaning to prevent water ingress.

Image 4.1: Detail of the soft silicone watch band and stainless steel buckle.

4.2 Water Resistance

This watch is water-resistant to a depth of 30 meters (99 feet). This means it can generally withstand splashing or brief

submersion in water. However, it is **not suitable for swimming, diving, or hot water activities**(e.g., hot showers, saunas) as steam and hot water can compromise the seals.

Water Resistance Guidelines

Activity	Suitability
Hand Washing	Suitable
Cold Shower	Suitable
Getting Wet in the Rain	Suitable
Swimming	Not Suitable
Diving	Not Suitable

Image 4.2: Visual guide to the watch's 30M water resistance.

5. Troubleshooting

5.1 Watch Not Running

- **Check the Crown:** Ensure the crown is fully pushed in. If it is pulled out, the watch will not run.
- **Battery:** The watch uses a long-lasting battery. If the watch stops completely, the battery may need replacement. Contact a qualified watch repair service for battery replacement.

5.2 Inaccurate Timekeeping

- **Battery Life:** A low battery can sometimes cause erratic or slow timekeeping before the watch stops completely.
- **Impact:** Severe impacts can affect the internal movement. If the watch has been dropped or subjected to strong shocks and is no longer keeping accurate time, professional inspection may be required.

5.3 Condensation Under Crystal

- If you notice condensation inside the watch, it indicates that moisture has entered the case. This can happen if the watch's water resistance limits were exceeded or if the crown was not fully pushed in.
- Immediately take the watch to a professional watch repair service to prevent further damage to the movement.

6. Specifications

Below are the key specifications for your PINDOWS Analog Quartz Wrist Watch (Model: PDS-2106).

Image 6.1: Detailed product specifications diagram.

Feature	Detail
