TROUBLESHOOTING

If you encounter any issues with your Tami Tami T600 Adjustable Bed Frame, please refer to the following common troubleshooting steps:

- **No Power:**
 - Check if the power cord is securely plugged into a working electrical outlet.
 - Ensure the power supply is not interrupted (e.g., tripped circuit breaker).
- **Remote Not Responding:**
 - Replace the batteries in the remote control.
 - Ensure the child lock feature is not activated.
 - If the remote is not paired, refer to the remote pairing instructions in the remote's mini-manual.
- **Bed Not Adjusting:**
 - Check for any obstructions under or around the bed frame that might be preventing movement.
 - Ensure the weight on the bed does not exceed the maximum capacity of 850 pounds.
- **Unusual Noises:**
 - Verify that all legs and frame components are securely tightened.
 - Ensure no foreign objects are caught in the motor or moving parts.

If the issue persists after attempting these steps, please contact Tami Tami professional customer service for assistance.
