Kaistyle N21

Kaistyle Magnetic Phone Holder for Car

Model: N21

INTRODUCTION

The Kaistyle Magnetic Phone Holder for Car provides a secure and convenient solution for mounting your smartphone in your vehicle. Featuring strong magnets and versatile installation options, it ensures your device remains stable and accessible while driving. This manual will guide you through the product's features, setup, operation, and maintenance.

PACKAGE CONTENTS

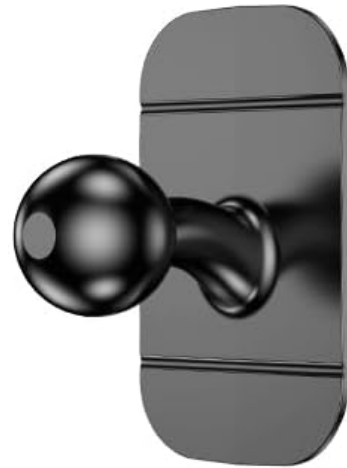

Please verify that all items listed below are included in your package:

- 1 x Kaistyle MagSafe Magnet Head
- 1 x Adhesive Base
- 1 x Metal Hook (for vent mounting)
- 1 x Metal Ring (for non-MagSafe compatible phones/cases)

What You will Get

1*MagSafe Magnet Head

2*Adhesive Base

1*Metal Hook

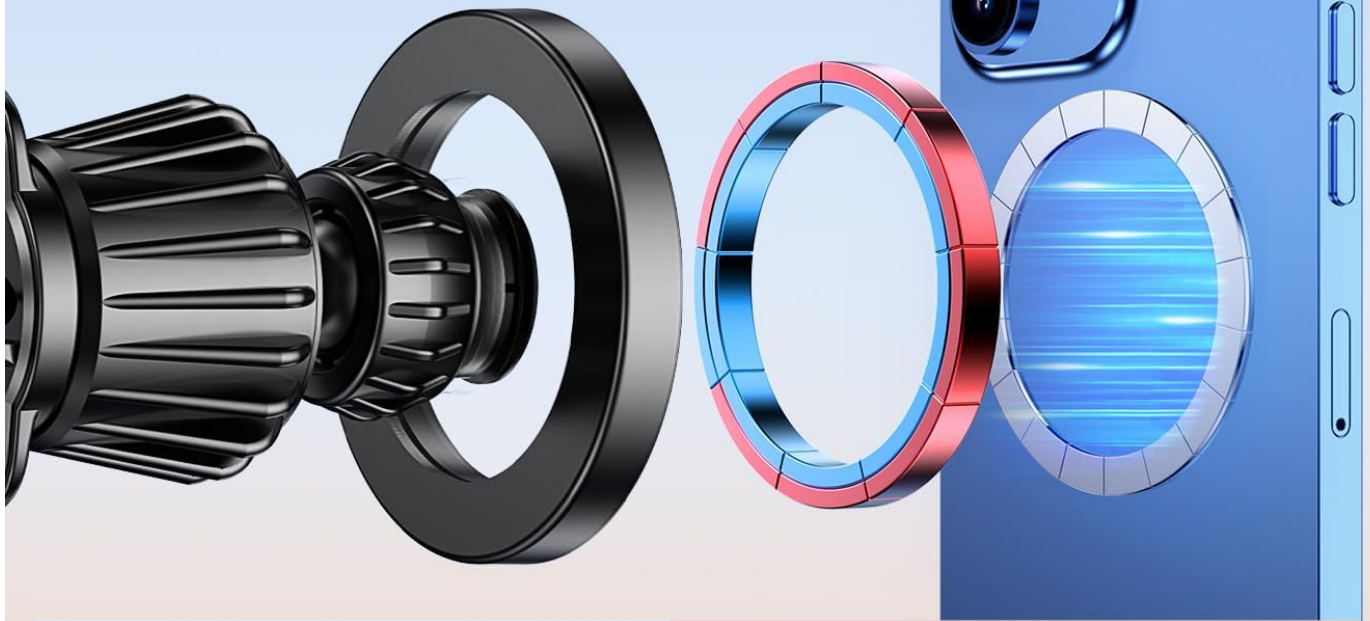

1*Metal Ring

FEATURES

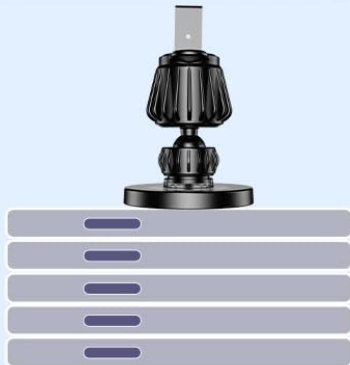

- **MagSafe Compatibility:** Designed for direct attachment to iPhone 12/13/14/15/16 series and official MagSafe cases. Includes a metal ring for compatibility with other magnetic phone cases and Android phones.
- **Strong Magnetic Hold:** Equipped with 20 powerful magnets to securely hold your device, preventing drops during bumps, sharp turns, or sudden stops.
- **Super Stick Force:** Features VHB adhesive for strong and reliable attachment to dashboard surfaces, adapting to various road conditions.
- **Safe Driving View:** Mini-sized design ensures the mount does not obstruct your view when placed on the dashboard, promoting safer driving.
- **360° Free Rotation:** An adjustable swivel ball joint allows for optimal viewing angles, enabling quick and convenient one-hand operation for calls and GPS navigation.

SETUP

The Kaistyle Magnetic Phone Holder offers two primary installation methods: dashboard adhesive mounting and air vent mounting.

Dashboard Mounting (Adhesive Base)

1. Clean the desired dashboard surface thoroughly with an alcohol wipe and allow it to dry completely. Ensure the surface is flat and smooth.
2. Peel off the protective film from the VHB adhesive on the adhesive base.
3. Firmly press the adhesive base onto the cleaned dashboard surface for at least 30 seconds.
4. Allow the adhesive to cure for 24 hours before attaching the magnet head or your phone to ensure maximum stick

force.

5. Attach the MagSafe magnet head to the ball joint on the adhesive base and tighten the collar to secure it.

Air Vent Mounting (Metal Hook)

1. Identify a suitable air vent in your vehicle. The metal hook is designed for horizontal, vertical, and grid-style vents, but not round vents.
2. Attach the MagSafe magnet head to the ball joint on the metal hook component and tighten the collar to secure it.
3. Insert the metal hook firmly into one of the air vent blades. Ensure it is securely latched to prevent movement.
4. Adjust the angle of the mount using the swivel ball joint for optimal viewing.

Install Wherever You Want

2 Base in 1 Magsafe Car Mount

OPERATING

Attaching Your Phone

- Ensure your phone is MagSafe compatible (iPhone 12/13/14/15/16 series or official MagSafe case). If not, attach the provided metal ring to the back of your phone or phone case, centered for optimal magnetic connection.
- Simply bring your phone close to the magnetic head of the mount. The strong magnets will automatically align and secure your phone in place.

Detaching Your Phone

- Grasp your phone firmly and pull it away from the magnetic head. Due to the strong magnetic hold, a firm pull may be required.

Adjusting Viewing Angle

- The mount features a 360° adjustable swivel ball joint. Loosen the collar behind the magnetic head slightly, adjust

your phone to the desired portrait or landscape orientation and angle, then tighten the collar to secure it.

A Better Way to Mount

Magsafe

Secure & powerful with MagSafe

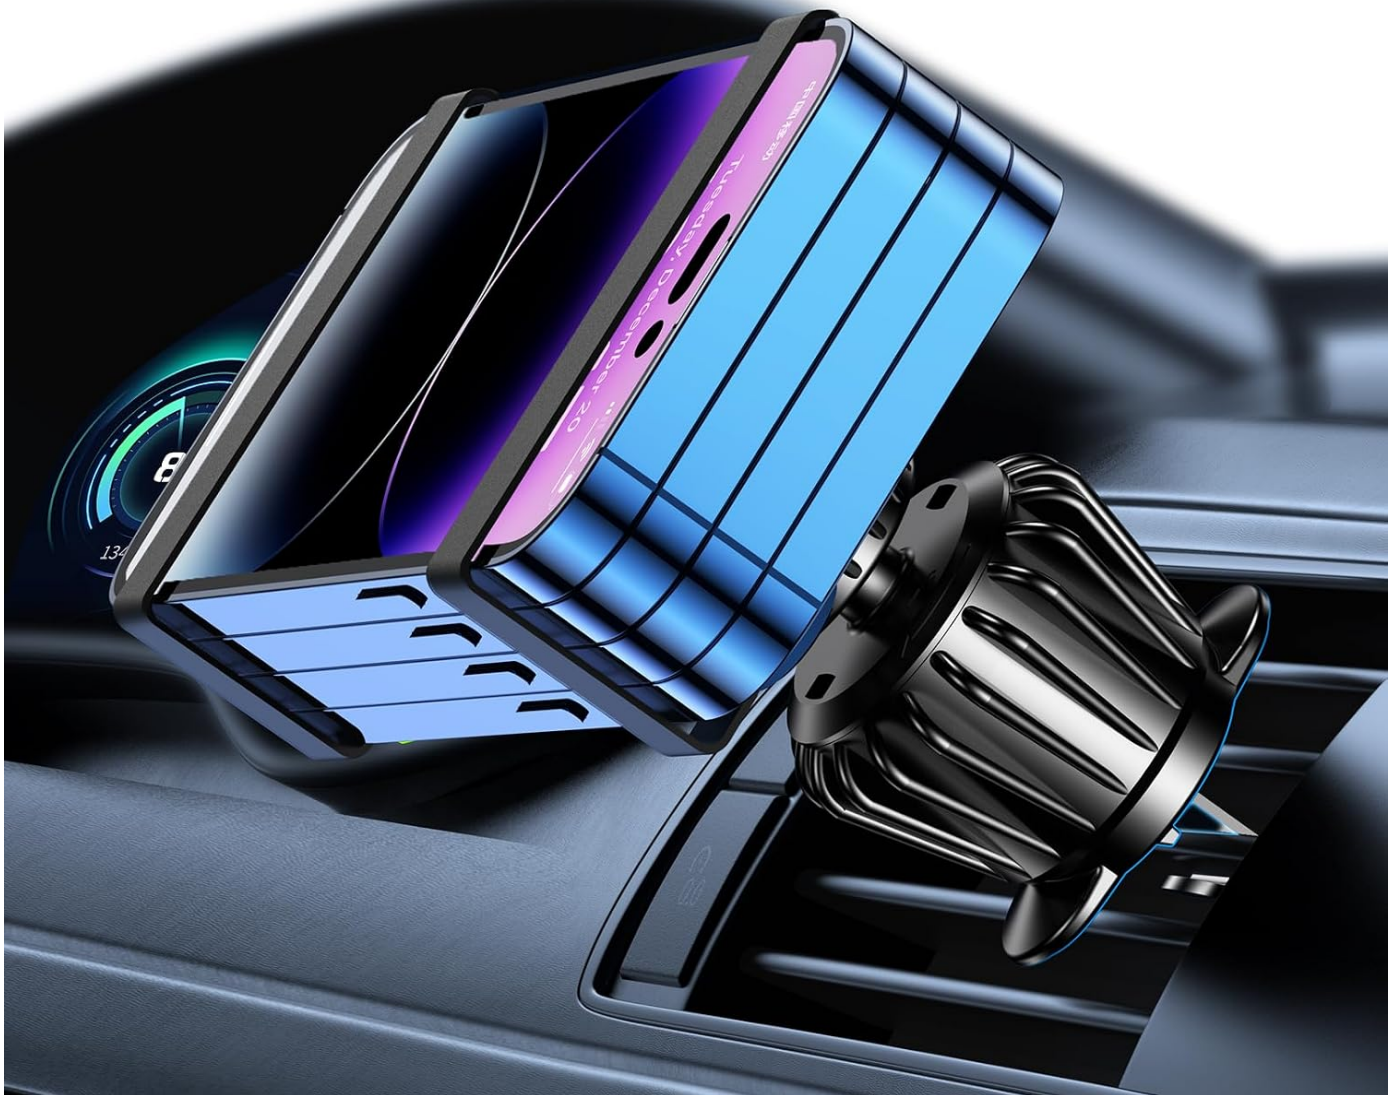

Image: A smartphone securely attached to the Kaistyle magnetic mount, installed on a car's air vent.

MAINTENANCE

- Keep the magnetic surface clean and free of dust or debris to ensure optimal magnetic connection. Wipe with a soft, dry cloth.
- Periodically check the tightness of the ball joint collar to maintain the desired viewing angle.
- For adhesive mounts, avoid repositioning frequently as this may weaken the adhesive bond.
- Avoid exposing the mount to extreme temperatures for prolonged periods, as this may affect the adhesive or material integrity.

TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Phone does not stick firmly or falls off.	Phone case is too thick or not MagSafe compatible; metal ring not used/misplaced; magnetic surface is dirty.	Ensure phone case is MagSafe compatible or use the provided metal ring. Clean the magnetic surface of both the mount and phone/ring.
Mount detaches from dashboard.	Surface not cleaned properly before installation; adhesive not cured for 24 hours; surface is not flat.	Re-install on a clean, flat surface, ensuring 24-hour curing time. Consider using a new adhesive pad if the old one is compromised.
Mount detaches from air vent.	Hook not fully inserted or tightened; vent type is not compatible (e.g., round vent).	Ensure the metal hook is securely latched onto the vent blade. Verify your vent type is compatible.
Phone rotates or sags.	Ball joint collar is loose.	Tighten the collar behind the magnetic head to secure the ball joint.

SPECIFICATIONS

Attribute	Detail
Product Dimensions	5.55 x 4.96 x 2.44 inches
Item Weight	3.52 ounces
Model Number	N21
Mounting Type	Dashboard & Vent
Compatible Devices	Smartphones (MagSafe compatible iPhones, others with metal ring)
Special Features	Strong Vehicle-Grade 3M Adhesive, Sturdy Vent Mount, One-Hand Operation, Easy Quick Installation
