Safety Instructions

- Always unplug the fan from the power outlet before cleaning, maintenance, or when not in use.
- Do not operate the fan with a damaged cord or plug. If the cord or plug is damaged, contact DR.PREPARE customer support.
- Keep the fan away from water and moisture. Do not use it in bathrooms or other wet environments.
- Ensure the fan is placed on a stable, flat surface to prevent it from tipping over.
- Do not insert fingers or any objects into the fan grilles while it is operating. This is a bladeless design, but internal components are still present.
- Keep children and pets away from the fan during operation.
- Do not block air openings or operate near curtains or other materials that could block airflow.
- This appliance has a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If the plug does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician. Do not attempt to defeat this safety feature.
