Redragon M806

Redragon M806 Gaming Mouse User Manual

Model: M806 | Brand: Redragon

Introduction

Thank you for choosing the Redragon M806 Gaming Mouse. This manual provides detailed instructions for setting up, operating, maintaining, and troubleshooting your new gaming mouse. Please read this manual thoroughly to ensure optimal performance and longevity of your device.
The Redragon M806 is designed for gamers, featuring 7 programmable buttons, adjustable DPI settings, and customizable RGB backlighting, all supported by dedicated software for a personalized experience.

Package Contents

- Redragon M806 Gaming Mouse
- User Manual

Setup

System Requirements

- Operating System: Windows XP/Vista/7/8/10/11, Linux
- Available USB Port

Hardware Connection

1. Locate an available USB port on your computer.
2. Plug the USB connector of the Redragon M806 mouse into the USB port.
3. The operating system will automatically detect and install the necessary drivers. This process may take a few moments.
4. Once the installation is complete, the mouse will be ready for use.

Operating Instructions

Basic Functionality

The Redragon M806 mouse operates as a standard plug-and-play device for basic cursor movement and clicking. It features 7 buttons for enhanced control.

DPI Adjustment

The mouse features a dedicated DPI button (typically located behind the scroll wheel) to cycle through preset DPI levels. The default DPI levels are 500, 1000, 2000, 3000, and 6200. You can switch between these levels to adjust cursor sensitivity on the fly.

Programmable Buttons

The Redragon M806 includes 7 programmable buttons, including two side macro buttons. These buttons can be customized for specific functions, macros, or keybindings using the Redragon software. Refer to the 'Customization' section for more details.

Image: An overview of the Redragon M806 mouse, illustrating its key features such as the Pro Optical Sensor, 12400 Max DPI, 5 DPI Levels, 1ms Response, Advanced Software, Ergonomic Design, 7 Macro Buttons, and 20 Million Clicks durability.

Customization

To unlock the full potential of your Redragon M806 mouse, it is recommended to install the official Redragon software. This software allows for extensive customization of the mouse's features.

Software Installation (if applicable)

Visit the official Redragon website to download the latest software for the M806 model. Follow the on-screen instructions to install the software.

Key Features Customizable via Software:

- **DPI Settings:** Fine-tune DPI from 200 to 12400 DPI in increments, and create custom DPI profiles.
- **Button Programming:** Assign custom functions, macros, or keybindings to all 7 buttons.

- **RGB Backlighting:** Choose from 5 backlight modes and customize 16.8 million color effects to match your gaming setup.
- **Polling Rate:** Adjust the polling rate for optimal responsiveness.
- **Profiles:** Create and save multiple profiles for different games or applications.

Maintenance

Proper maintenance ensures the longevity and optimal performance of your Redragon M806 gaming mouse.

Cleaning

- Disconnect the mouse from your computer before cleaning.
- Use a soft, lint-free cloth slightly dampened with water or a mild cleaning solution to wipe the surface of the mouse.
- For crevices and hard-to-reach areas, use a cotton swab or compressed air.
- Avoid using harsh chemicals, abrasive cleaners, or excessive moisture, as these can damage the mouse.

Storage

When not in use, store the mouse in a clean, dry environment away from direct sunlight and extreme temperatures.

Troubleshooting

If you encounter issues with your Redragon M806 gaming mouse, refer to the following common troubleshooting steps:

Problem	Possible Solution

Problem	Possible Solution
Mouse not responding	• Ensure the USB cable is securely plugged into the computer's USB port. • Try a different USB port. • Restart your computer. • Test the mouse on another computer to determine if the issue is with the mouse or the computer.
Cursor movement is erratic or jumpy	• Clean the optical sensor on the underside of the mouse with a soft, dry cloth. • Ensure you are using the mouse on a clean, non-reflective, and uniform surface (e.g., a mouse pad). • Adjust DPI settings to a lower value if sensitivity is too high.
Buttons not functioning correctly	• Ensure the Redragon software is installed and updated. • Check button assignments within the software. • Reset the mouse to factory settings via the software, if available.
RGB lighting not working	• Ensure the Redragon software is running and lighting effects are enabled. • Check lighting settings within the software for any disabled modes or low brightness.
