## SETUP

To ensure the longevity and pristine condition of your Lapras V Full Art card, proper setup is crucial:

1. **Sleeving:** Immediately place the card into a high-quality, acid-free card sleeve. Penny sleeves are a good first layer.
2. **Toploader or Binder:** For added protection, place the sleeved card into a rigid toploader or a side-loading binder page. This prevents bending and surface damage.
3. **Storage:** Store the card in a cool, dry place away from direct sunlight, extreme temperatures, and humidity.

## OPERATING YOUR CARD (GAMEPLAY & COLLECTION)

This card can be used in various ways, depending on your preference:

- **Collection Display:** Showcase your Lapras V Full Art card in a display case or binder to appreciate its artwork and rarity.
- **Pokémon TCG Gameplay:** If you intend to use the card in the Pokémon Trading Card Game, ensure it is double-sleeved for maximum protection during shuffling and play. Always handle the card by its edges to avoid fingerprints and wear.
- **Trading:** When trading, always handle the card with care and ensure both parties agree on its condition. Use sleeves and toploaders for safe exchange.

## MAINTENANCE AND CARE

Regular maintenance helps maintain the card's condition:

- **Cleaning:** Gently wipe the card's surface (while sleeved) with a soft, lint-free microfiber cloth if dust accumulates. Never use abrasive materials or cleaning solutions directly on the card.
- **Inspection:** Periodically inspect your card for any signs of wear, bending, or environmental damage.
- **Environment:** Keep the card away from food, drinks, and pets to prevent accidental damage.

## TROUBLESHOOTING

While trading cards are generally robust when cared for, issues can arise:

- **Bent or Creased Card:** If the card is bent or creased, it is difficult to fully restore. Store it flat under heavy objects for an extended period, but be aware that the damage may be permanent.
- **Surface Scratches:** Minor scratches may be unavoidable over time. For deep scratches, restoration is generally not possible without professional intervention, which can be costly.
- **Water Damage:** If the card comes into contact with water, gently blot it dry immediately. Do not rub. Place it between absorbent papers and press it flat. Water damage often leaves permanent marks.
