Sapho 1103-07 Concealed Bidet Set Instruction Manual

INTRODUCTION

Thank you for choosing the Sapho 1103-07 Concealed Bidet Set. This manual provides essential information for the safe installation, operation, and maintenance of your new bidet set. Please read these instructions carefully before installation and retain them for future reference. Proper installation and care will ensure optimal performance and longevity of your product.

PRODUCT OVERVIEW

The Sapho 1103-07 is a modern concealed bidet set designed for discreet and functional integration into your bathroom. It features a single joystick handle for water flow and temperature control, connected to a bidet sprayer via a flexible hose. The concealed design ensures a clean and minimalist aesthetic.

SAFETY INFORMATION

- Installation should only be performed by a qualified plumber or professional to ensure compliance with local plumbing codes and safety standards.
- Ensure the main water supply is turned off before beginning any installation or maintenance work.
- Verify that water pressure and temperature are within acceptable limits for plumbing fixtures.
- Do not use abrasive cleaners, solvents, or harsh chemicals on the product surface, as this may damage the finish.
- Keep small parts out of reach of children to prevent choking hazards.

PACKAGE CONTENTS

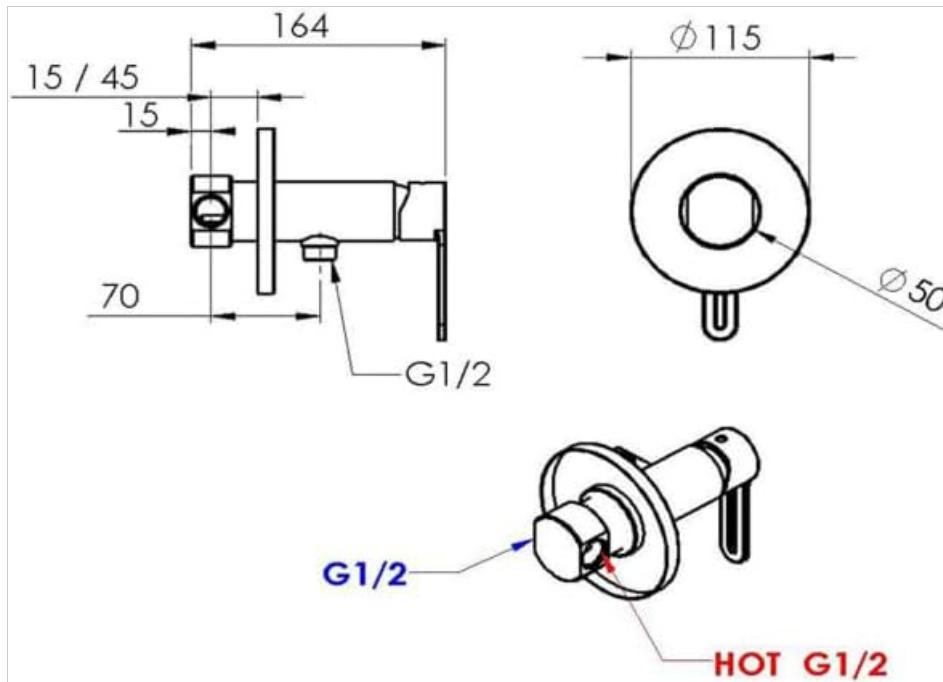

Please check that all components are present and undamaged before installation:

- Concealed mixer body with joystick handle

- Decorative escutcheon/cover plate
- Bidet sprayer head
- Flexible bidet hose
- Mounting hardware and seals

SETUP AND INSTALLATION

Professional installation is highly recommended for this concealed bidet set.

This diagram illustrates the dimensions and connection specifications for the Sapho 1103-07 concealed bidet set. It shows the G1/2 hot and cold water inlets, the overall depth, and the diameter of the visible escutcheon.

Installation Steps:

1. **Prepare the Wall:** Create an opening in the wall according to the dimensions provided in the technical drawing to accommodate the concealed mixer body. Ensure adequate space for water supply lines.
2. **Connect Water Supply:** Connect the hot and cold water supply lines to the designated G1/2 inlets on the mixer body. The diagram indicates 'HOT G1/2' for the hot water connection. Ensure all connections are secure and watertight.
3. **Mount Mixer Body:** Secure the mixer body firmly within the wall opening using appropriate mounting hardware. Ensure it is level and at the correct depth for the escutcheon.
4. **Install Escutcheon:** Once the wall is finished (tiled, painted, etc.), attach the decorative escutcheon over the mixer body, ensuring it sits flush against the wall.
5. **Connect Bidet Hose and Sprayer:** Attach one end of the flexible bidet hose to the outlet on the mixer body and the other end to the bidet sprayer head. Hand-tighten, then use a wrench for a final quarter turn, being careful not to overtighten.
6. **Test for Leaks:** Slowly turn on the main water supply and check all connections for any signs of leakage. Address any leaks immediately.

OPERATING INSTRUCTIONS

The Sapho 1103-07 bidet set features a single joystick handle for intuitive control:

- **Turning On/Off:** Lift the joystick handle to turn on the water flow. Push it down to turn off.
- **Adjusting Water Flow:** The further you lift the handle, the stronger the water flow.
- **Adjusting Water Temperature:** Move the joystick handle left for hotter water and right for colder water. Find your desired temperature by adjusting the handle's horizontal position.
- **Using the Sprayer:** Once water is flowing from the mixer, press the button or lever on the bidet sprayer head to activate the spray. Release the button/lever to stop the spray.

MAINTENANCE

Regular cleaning and proper care will help maintain the appearance and functionality of your bidet set.

- **Cleaning the Surface:** Clean the chrome or finished surfaces with a soft, damp cloth and mild soap. Rinse thoroughly with clean water and dry with a soft cloth to prevent water spots.
- **Avoid Harsh Cleaners:** Do not use abrasive sponges, scouring pads, or cleaning agents containing alcohol, ammonia, bleach, or phosphoric acid, as these can damage the finish.
- **Sprayer Nozzle Cleaning:** If the sprayer nozzle becomes clogged, gently clean it with a soft brush or a toothpick to remove mineral deposits.
- **Hose Inspection:** Periodically inspect the flexible hose for any signs of wear, kinks, or leaks. Replace if necessary.

TROUBLESHOOTING

If you encounter issues with your bidet set, refer to the table below for common problems and solutions.

Problem	Possible Cause	Solution
Low water flow	Partially closed stopcock; clogged aerator/sprayer nozzle; low main water pressure.	Ensure stopcocks are fully open. Clean the sprayer nozzle. Check household water pressure.
Water leaks from connections	Loose connections; damaged seals/washers.	Tighten connections (do not overtighten). Replace worn or damaged seals/washers.
Water temperature inconsistent	Fluctuating hot/cold water supply; mixer cartridge issue.	Check household hot water supply. If problem persists, contact a professional plumber to inspect the mixer cartridge.
Sprayer not working	Clogged sprayer head; hose kinked; low water pressure.	Clean sprayer head. Straighten hose. Check water pressure.

If you are unable to resolve an issue using these steps, please contact a qualified plumber or the Sapho customer support.

SPECIFICATIONS

- **Model:** Sapho 1103-07
- **Type:** Concealed Bidet Set
- **Handle Type:** Joystick
- **Water Connections:** G1/2 (Hot and Cold)

- **Material:** (Typically brass body with chrome finish, specific material not provided in source)
