

WOLFBOX G840S

WOLFBOX G840S 12" 4K Mirror Dash Cam & OEM Bracket User Manual

Model: G840S

INTRODUCTION

Thank you for choosing the WOLFBOX G840S 12" 4K Mirror Dash Cam. This advanced device is designed to enhance your driving safety and provide reliable video evidence with its high-resolution front and rear cameras. The included OEM bracket ensures a secure and integrated installation. This manual provides detailed instructions for setup, operation, maintenance, and troubleshooting to help you get the most out of your new dash cam system.

PACKAGE CONTENTS

Please check the package carefully to ensure all items are present and in good condition:

- WOLFBOX G840S 12" 4K Mirror Dash Cam
- Rear Camera (with cable)
- GPS Module
- Charging Cable (Car Charger)
- User Manual
- 12" OEM Bracket (with mounting screws)
- 32GB MicroSD Card (may vary by package)

Image: Main components of the WOLFBOX G840S package, including the mirror dash cam, rear camera, GPS module, and a 32GB SD card.

PRODUCT FEATURES

Upgraded 4K UHD Clarity

Experience stunning detail with the front camera's upgrade to 4K UHD (2160p) resolution, paired with a 1080p rear camera. The extra-large 12" display provides 1.5 times the viewing area of a standard mirror, significantly reducing blind spots for enhanced safety.

Image: Illustration highlighting the 4K UHD video recording capability and key features like 5.8GHz WiFi, 12" Touch Screen, WDR, and Night Vision.

Larger Screen & Wider View

The WOLFBOX G840S mirror camera features a 170° front lens and a 140° rear lens, offering a broader field of view to minimize blind spots during driving and reversing. The smart split-screen function allows simultaneous monitoring of both lenses, while the 2.5D curved screen seamlessly integrates with your vehicle's interior.

Superior Night Vision

Equipped with an upgraded WDR camera, the G840S provides clear night recording, ensuring visibility and detail even in low-light conditions.

Impeccable 4K UHD Videos

Improve your driving experience

4K+1080P

5.8GHz WIFI

12" Touch Screen

WDR

Night Vision

Image: Visual representation of the dash cam's superior night vision capabilities, showing clear detail of a vehicle's rear in low light.

Built-in 5.8GHz Wi-Fi

Enjoy faster and easier video playback and transfer with the built-in 5.8GHz Wi-Fi connectivity, accessible via the "WOLFBOX" APP. This allows for quick download speeds compared to traditional 2.4GHz connections.

Superior Night Vision

Upgraded WDR camera for clear night recording

Image: Depiction of the 5.8GHz Wi-Fi feature, showing the dash cam screen, a smartphone with the WOLFBX app, and faster download speeds.

24H Parking Monitoring

Achieve continuous surveillance while your vehicle is parked. This feature requires a separately purchased hardwire kit for full functionality, enabling time-lapse or normal recording modes for extended periods.

Built-in 5.8GHz Wi-Fi

Faster and easier video playback with the “WOLFBOX” APP.

The illustration shows a rearview mirror dash cam displaying a video of an orange SUV driving on a desert road. The video player interface includes a progress bar at 01:22 / 4K+1080P and a timestamp of 10:15 on 2024-12-11. Below the mirror, a hand holds a smartphone displaying the WOLFBOX app interface, which shows the same video and various social media sharing options like WhatsApp, Telegram, Facebook, and Messenger. A speed comparison graphic indicates that 5.8GHz Wi-Fi offers a download speed of 8MB/s, which is 4X faster than the 2MB/s offered by 2.4GHz Wi-Fi. At the bottom, there are links to download the app from the Apple Store, Google Play, and a direct link to the WOLFBOX APP.

Firm Installation with OEM Bracket

Compared with traditional strap installations, the WOLFBOX OEM bracket provides a more firmly fixed mounting solution, significantly reducing dash cam shaking during driving for stable video recording.

SETUP AND INSTALLATION

Proper installation is crucial for optimal performance and safety. It is recommended to consult a professional for

complex wiring if you are unsure.

1. OEM Bracket Installation

1. **Remove Original Mirror:** Carefully remove your vehicle's existing rearview mirror. The method varies by vehicle model.
2. **Attach OEM Bracket:** Secure the WOLFBOX OEM bracket to the vehicle's mirror mount point using the provided screws. Ensure it is tightly fastened to prevent vibrations.
3. **Mount Dash Cam:** Attach the WOLFBOX G840S mirror dash cam to the OEM bracket. The bracket is designed for a secure, integrated fit.

PACKAGE INCLUDED

Image: Example of the WOLFBOX OEM bracket securely installed on a vehicle's windshield, ready for the dash cam.

Image: The WOLFBOX G840S dash cam mounted using the OEM bracket, showing a stable and integrated appearance compared to strap mounting.

2. Camera and Cable Routing

1. **Front Camera:** The front camera is integrated into the mirror dash cam. Adjust its angle as needed after mounting.
2. **Rear Camera:** Mount the rear camera on the rear windshield or license plate area. Route the rear camera cable neatly along the vehicle's headliner and pillars to the main dash cam unit.
3. **GPS Module:** Connect the GPS module and place it on the dashboard, ensuring it has a clear view of the sky for accurate signal reception.
4. **Power Cable:** Connect the charging cable (car charger) to the dash cam and route it to your vehicle's 12V power outlet (cigarette lighter socket). For 24H parking monitoring, a hardwire kit (sold separately) is required and should be professionally installed.

Important Note: Before purchasing, it is recommended to contact WOLFBOX customer service to confirm the compatibility of the bracket with your specific vehicle model.

OPERATING INSTRUCTIONS

1. Powering On/Off

- **Automatic:** The dash cam will automatically power on and begin recording when your vehicle's ignition is turned on (and power is supplied to the 12V outlet).
- **Manual:** Press and hold the power button (usually located on the bottom or side of the unit) to manually turn the device on or off.

2. Screen Functions and Display Modes

- **Touch Screen:** The 12-inch display is a touch screen. Navigate menus and settings by tapping and swiping.
- **Display Modes:** Swipe left or right on the screen to switch between front camera view, rear camera view, and split-screen view (both cameras simultaneously).
- **Brightness Adjustment:** Swipe up or down on the left side of the screen to adjust display brightness.
- **Camera Angle Adjustment:** Swipe up or down on the right side of the screen to adjust the displayed camera angle (digital zoom/pan).
- **Sleep Mode:** Tap the power button briefly to turn off the screen while recording continues. Tap again to wake the screen.

24H Parking Monitoring

Continuous surveillance while parked

Hardwire kit is needed
(Buy Separately)

Continuously Record at 1FPS

Time-lapse Mode

24h

Normal Recording

48mins

Image: The WOLFBIX G840S display showing the rear camera view, indicating time and location.

3. Recording Modes

- **Loop Recording:** The dash cam continuously records in segments (e.g., 1, 3, or 5 minutes). When the memory card is full, it automatically overwrites the oldest unlocked footage.
- **G-Sensor (Emergency Recording):** In the event of a sudden impact or collision, the built-in G-sensor will automatically lock the current video segment, preventing it from being overwritten.
- **Parking Monitoring:** With a hardwire kit (sold separately), the dash cam can monitor your vehicle while parked. Options typically include:

- **Time-lapse Mode:** Records continuously at a low frame rate (e.g., 1FPS) to save storage space.
- **Collision Detection:** Records a short video clip if an impact is detected while parked.

4. Wi-Fi Connectivity and App Usage

The WOLFBOX G840S features 5.8GHz Wi-Fi for quick access to your recordings via the dedicated WOLFBOX app.

1. **Download App:** Download the "WOLFBOX" app from the Apple App Store or Google Play Store.
2. **Enable Wi-Fi:** On the dash cam, navigate to the settings menu and enable Wi-Fi. The screen will display the Wi-Fi network name (SSID) and password.
3. **Connect Phone:** On your smartphone, go to Wi-Fi settings, find the WOLFBOX network, and connect using the provided password.
4. **Access Footage:** Open the WOLFBOX app. You can now view live footage, browse recorded videos, download clips to your phone, and adjust settings remotely.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the dash cam screen and lenses. Avoid abrasive cleaners or solvents.
- **SD Card Management:**
 - **Formatting:** It is recommended to format the MicroSD card within the dash cam's settings every 2-4 weeks to ensure optimal performance and prevent data corruption.
 - **Replacement:** Replace the MicroSD card periodically (e.g., every 6-12 months) as they have a limited lifespan due to continuous overwriting. Use high-quality, high-speed (Class 10 or U3) cards.
- **Firmware Updates:** Periodically check the WOLFBOX official website for any available firmware updates. Follow the instructions provided with the update carefully.

TROUBLESHOOTING

| Problem | Possible Cause / Solution |
|-----------------------------|--|
| Dash cam does not power on. | <ul style="list-style-type: none">• Check if the car charger is properly connected to the dash cam and the vehicle's 12V outlet.• Ensure the vehicle's ignition is on (if not hardwired).• Test the 12V outlet with another device. |
| Recording stops or freezes. | <ul style="list-style-type: none">• The MicroSD card may be full or corrupted. Format the card via the dash cam settings.• Use a high-speed (Class 10 or U3) MicroSD card from a reputable brand.• The card may have reached its lifespan; try a new card. |

| Problem | Possible Cause / Solution |
|------------------------------------|--|
| Poor video quality (blurry, dark). | <ul style="list-style-type: none">• Clean the camera lenses.• Ensure the protective film has been removed from the lenses.• Check settings for video resolution and exposure. |
| Wi-Fi connection issues. | <ul style="list-style-type: none">• Ensure Wi-Fi is enabled on the dash cam.• Verify the correct Wi-Fi password is entered on your phone.• Move closer to the dash cam for a stronger signal.• Restart both the dash cam and your phone. |
| GPS signal not found. | <ul style="list-style-type: none">• Ensure the GPS module is connected and placed with a clear view of the sky (e.g., on the dashboard, not under metal).• Allow a few minutes for the GPS to acquire a signal, especially after first use or long periods of inactivity. |

SPECIFICATIONS

| Feature | Detail |

Please READ ME Before Installation

When you encounter difficulties, please read this manual for a quick solution, if you still cannot solve it, please feel free to **CONTACT** us.

A: Common Questions

Q1: The mirror dash cam only record front camera image/Can't find the rear camera video.

A1: Pls click the button at the bottom left of the picture to view the front camera and rear camera video files. "CH1" in the file name stands for front camera and "CH2" stands for rear camera.

Q2: Why my rear camera can't be detected?

A2:

- Pls unplug the power cord and restart the machine with the rear camera plugged in.

- Pls check the AV connector and 4 pin connector first, the AV&4 pin connector may loose, you can tight it and re-connect. After that, pls check whether the problem still exist, if yes, it may caused by the rear view camera cable or the rear view camera. Largely, it can be solved by a new rear view camera cable.

[WOLFBOX Mirror Dash Cam Troubleshooting Guide & FAQs](#)

Comprehensive troubleshooting guide and frequently asked questions for the WOLFBOX mirror dash cam. Resolve issues with rear camera detection, screen freezing, battery drain, GPS, and installation. Find support contact information and product details.
