Frigidaire FRPARAC9

Frigidaire PureAir® RAC-9 Premium Air Filter

Model: FRPARAC9

Introduction

The Frigidaire PureAir® RAC-9 Premium Air Filter (Model FRPARAC9) is designed to enhance the air quality in your home by effectively collecting a wide range of particles, including smoke and smog. This filter features a MERV 14 rating, indicating its high efficiency in capturing airborne irritants. By installing this filter in compatible Frigidaire Window Air Conditioners, you can enjoy a healthier and more comfortable living space while also contributing to the improved efficiency and prolonged lifespan of your air conditioning unit.

Safety Information

- Always ensure the air conditioning unit is turned off and unplugged before attempting to install or replace the filter.
- Handle the filter by its edges to avoid damaging the filtration media.
- Keep the filter out of reach of children and pets.
- Do not attempt to wash or reuse the filter, as this can compromise its filtration effectiveness.
- Dispose of used filters according to local regulations.

Product Overview

The Frigidaire PureAir® RAC-9 Premium Air Filter is a high-efficiency replacement filter specifically designed for select Frigidaire Window Air Conditioners. Its advanced filtration technology is engineered to capture various airborne particles, contributing to cleaner indoor air.

Key Features:

- **Advanced Filtration:** Collects pet hair, smoke, smog, and other irritants for cleaner air.
- **Improved Efficiency:** Helps improve the efficiency and lifespan of your A/C unit by preventing dust buildup.
- **Easy Installation:** Designed for quick and hassle-free replacement.
- **Compatibility:** Specifically compatible with Frigidaire A/C Model# FHWC054WB1 for a precise fit.
- **MERV 14 Rating:** Indicates high filtration efficiency for very fine particles.

What's in the Box:

- One (1) Frigidaire PureAir® RAC-9 Premium Air Filter (FRPARAC9)

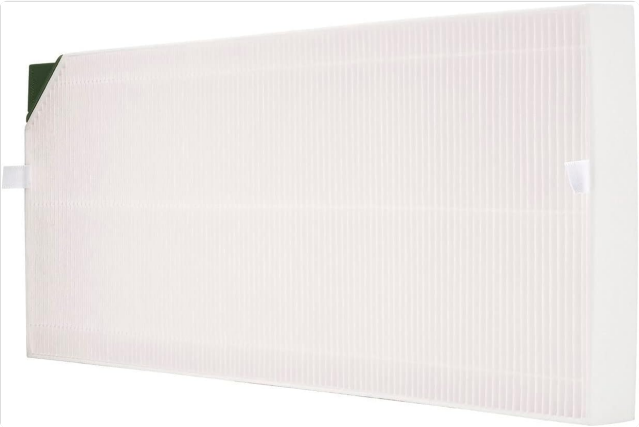

Figure 2: A detailed side view of the Frigidaire PureAir RAC-9 filter, showcasing its pleated filtration media and sturdy frame, designed for efficient air purification.

Setup (Installation)

Installing the Frigidaire PureAir® RAC-9 filter is a straightforward process. Ensure your specific Frigidaire Window AC model is FHWC054WB1 for guaranteed compatibility and optimal fit.

1. **Power Off AC Unit:** Before beginning, ensure your Frigidaire Window Air Conditioner is turned off and unplugged from the power outlet to prevent electrical hazards.
2. **Locate Filter Slot:** Refer to your AC unit's manual to locate the filter access slot, typically found on the front grille or side panel.
3. **Remove Old Filter (if applicable):** If an old filter is present, carefully slide it out. Note its orientation for correct installation of the new filter.
4. **Insert New Filter:** Gently slide the new Frigidaire PureAir® RAC-9 filter into the designated slot. Ensure it is fully seated and fits snugly without forcing it. The green tab on the filter should be visible and accessible for future removal.
5. **Secure Access Panel:** Close any access panels or grilles that were opened during the installation process.
6. **Restore Power:** Plug your AC unit back into the power outlet and turn it on.

The filter is designed for a precise and hassle-free installation, allowing you to enjoy cleaner air in minutes.

Operating (Usage)

Once installed, the Frigidaire PureAir® RAC-9 filter operates passively as air passes through your window air conditioning unit. The MERV 14 rated media effectively captures airborne particles, providing continuous air purification whenever your AC unit is running. No additional user interaction is required for the filter to function.

Maintenance

Regular maintenance of your air filter is crucial for maintaining optimal air quality and the efficiency of your AC unit.

- **Filter Replacement:** It is recommended to replace the Frigidaire PureAir® RAC-9 filter every 3 months, or more frequently as needed, depending on usage and environmental conditions (e.g., presence of pets, high pollen counts, or wildfire smoke). A dirty filter can restrict airflow and reduce the cooling efficiency of your AC unit.
- **Pre-Filter Cleaning:** Many window AC units have a washable pre-mesh screen filter in addition to the disposable PureAir® filter. Regularly clean this pre-filter according to your AC unit's manual. This typically involves removing it, washing it with mild soap and water, rinsing thoroughly, and allowing it to air dry completely before reinstallation. Cleaning the pre-filter helps extend the life of your premium filter and maintains airflow.

Troubleshooting

If you experience issues after installing your new filter, consider the following common scenarios:

- **Reduced Airflow or Cooling Performance:**
  - **Check Installation:** Ensure the filter is correctly seated and not obstructing the airflow path.
  - **Filter Clogging:** If the filter has been in use for an extended period or in a very dusty environment, it may be clogged. Replace the filter with a new one.
  - **Clean Pre-Filter:** A dirty pre-mesh screen filter can also restrict airflow. Clean it as described in the Maintenance section.
- **Filter Indicator Light On (if applicable):**
  - Some AC units have a filter indicator light that illuminates after a certain period of operation. This light is a reminder to check or replace the filter. Replace the filter and reset the indicator light according to your AC unit's manual.
  - If the light comes on shortly after replacement, ensure the new filter is installed correctly and the pre-filter is clean.

If problems persist, consult your Frigidaire Window AC unit's user manual or contact Frigidaire customer support.

Specifications

Attribute	Detail
Brand	Frigidaire
Model Number	FRPARAC9
Item Weight	5 ounces (approx. 142 grams)
Product Dimensions	12.7" L x 5" W x 0.8" Th (approx. 32.26 cm L x 12.7 cm W x 2.03 cm Th)
Compatible Device	Frigidaire Window Air Conditioner Model FHWC054WB1

Attribute	Detail
