

QILIVE smartphone 5.3 pouces Q10S53IN4G

QILIVE Smartphone Case User Manual

Model: QILIVE smartphone 5.3 pouces Q10S53IN4G

PRODUCT OVERVIEW

This protective case is designed specifically for the QILIVE smartphone 5.3 pouces Q10S53IN4G. It features a durable construction combining a PC backplane with a soft silicone frame, offering comprehensive protection for your device. The case also integrates a versatile 360-degree rotatable metal ring holder and is compatible with magnetic car mounts for enhanced convenience.

Key Features:

- **360 Rotatable Ring Holder:** Provides a secure grip and functions as a kickstand for hands-free viewing.
- **Magnetic Car Mount Function:** Allows direct adsorption to magnetic car mount holders without additional patches.
- **Durable Material:** Constructed from TPU material, offering scratch-proof and fingerprint-proof properties.
- **Shockproof Design:** Features thickened four corners and a silicone buffer layer for enhanced impact protection.
- **Precision Cutouts:** Ensures full access to all ports, buttons, and speakers.

INSTALLATION AND SETUP

To install the case, ensure your smartphone is clean and free of dust. Align the phone with the case, starting with one side, and gently press the phone into the case until all edges are securely fitted. Verify that all ports and buttons align correctly with the case's cutouts.

OPERATING INSTRUCTIONS

Using the 360° Rotatable Ring Holder

The integrated metal ring holder provides a secure grip and can be rotated 360 degrees to function as a kickstand for hands-free viewing in both portrait and landscape orientations. Simply pull out the ring and adjust it to your desired angle.

Figure 2: Close-up view of the case's 360-degree rotatable ring holder, demonstrating its full range of motion.

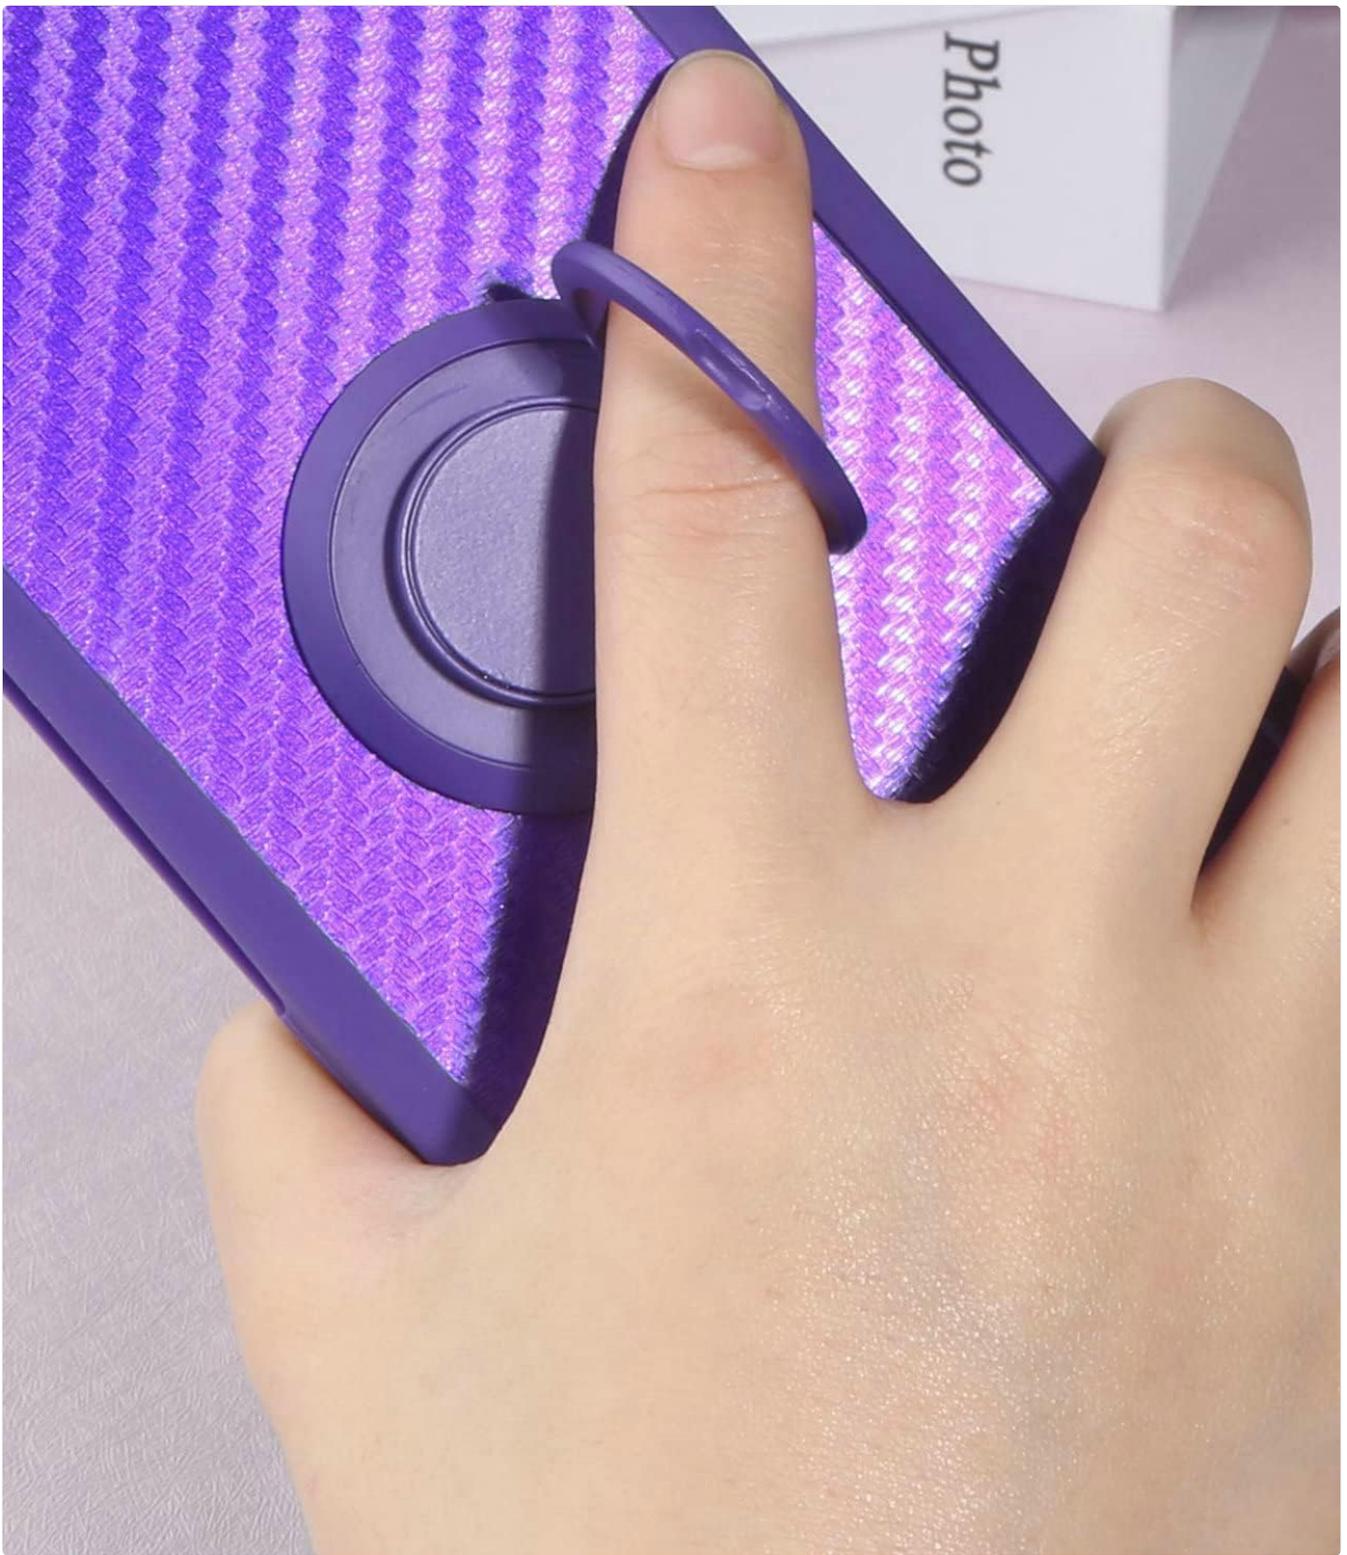

Figure 3: A hand demonstrating the use of the integrated ring holder for a secure grip on the smartphone.

Utilizing the Magnetic Car Mount Function

The case is designed with a built-in metal plate within the ring holder, allowing it to be directly adsorbed onto magnetic car mount holders. This feature provides a convenient and secure way to mount your phone in your vehicle for navigation or hands-free calls.

DESIGN AND PROTECTION FEATURES

Shockproof Design

The case incorporates a soft silicone frame and a hard PC backplane. Its thickened four corners and a silicone buffer

layer positioned in the middle provide superior shock absorption, protecting your device from accidental drops and impacts. The design ensures the case is higher than the screen and camera, offering additional protection against scratches when placed on flat surfaces.

SHOCKPROOF

Soft silicone frame + hard PC backplane, thickened four corners, and a silicone buffer layer in the middle, which is higher than the screen and camera design.

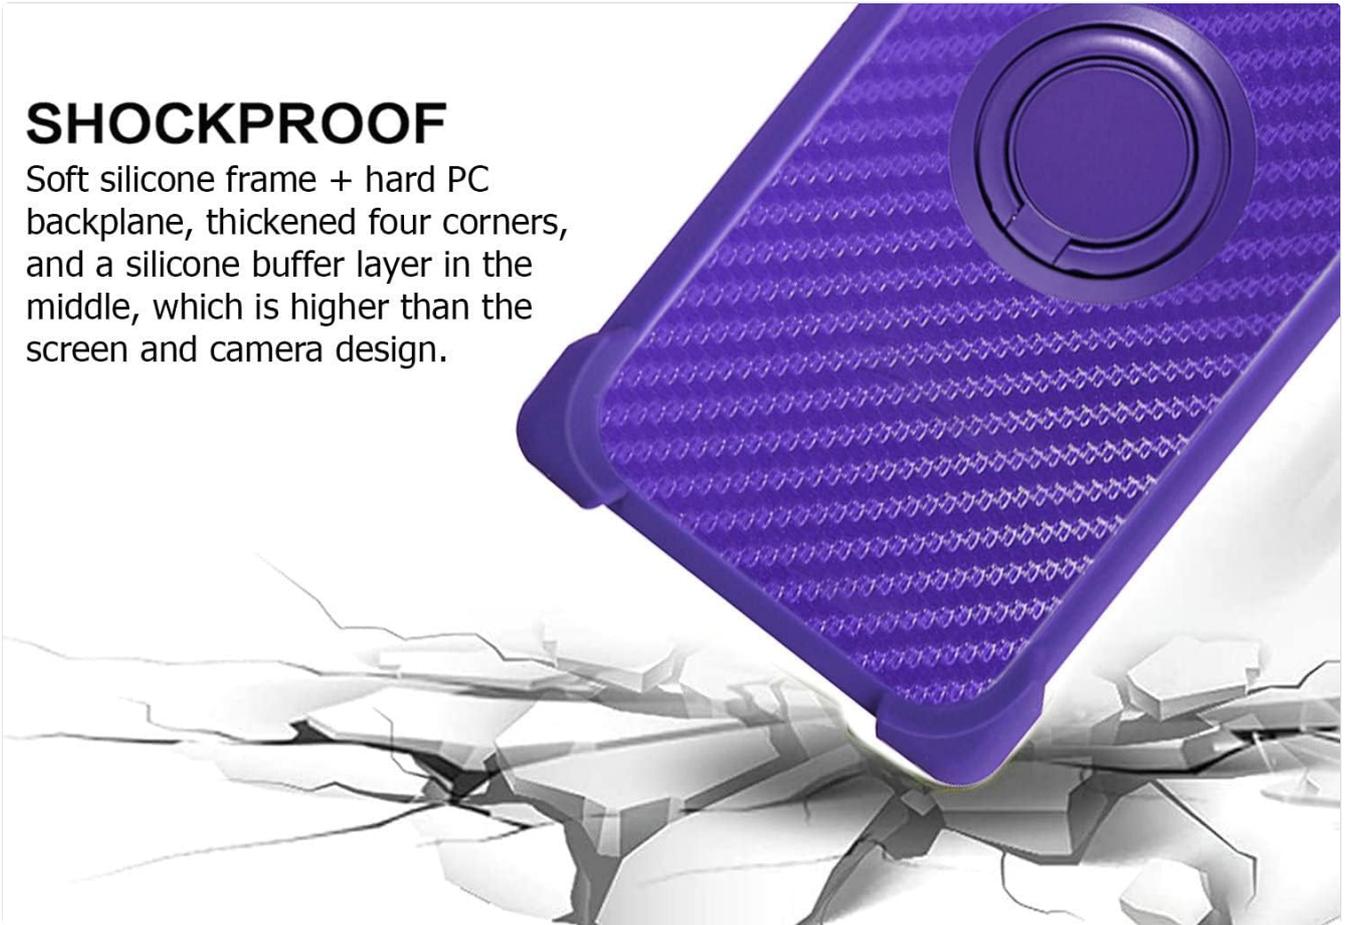

Figure 5: An illustration highlighting the shockproof corners and silicone buffer layer of the case, designed to protect the smartphone from impacts.

Aesthetic and Material

Crafted from TPU material, the case is designed to be scratch-proof and resistant to fingerprints, maintaining a clean appearance. The high-definition pattern printing ensures the design remains vibrant and does not fade over time. The case's surface also exhibits different reflection effects depending on the viewing angle, adding to its stylish appearance.

Different angles will show different reflection effects

Figure 6: Two views of the case, showing how different lighting angles create varied reflection effects on its patterned surface.

CARE AND MAINTENANCE

To keep your case in optimal condition, regularly wipe it with a soft, damp cloth to remove dust and smudges. Avoid using harsh chemicals or abrasive materials, as these may damage the case's surface or finish. Ensure the case is completely dry before reattaching it to your smartphone.

TROUBLESHOOTING

Issue	Possible Cause	Solution
Case cutouts do not align perfectly with phone ports/buttons.	Minor manufacturing variation or incorrect phone model.	Ensure the case is for the exact model (QILIVE smartphone 5.3 pouces Q10S53IN4G). For minor misalignments, gentle adjustment or careful trimming may be possible, but this is not recommended as it may void any potential warranty. Contact seller for replacement if significant.

Issue	Possible Cause	Solution
Ring holder feels loose or stiff.	Normal wear and tear or debris accumulation.	Clean around the ring mechanism. If it remains loose after extended use, it may be due to wear.
Case appears dirty or discolored.	Accumulation of dirt, oils, or exposure to staining agents.	Clean the case regularly with a soft, damp cloth and mild soap if necessary. Avoid prolonged exposure to direct sunlight or harsh chemicals.

PRODUCT SPECIFICATIONS

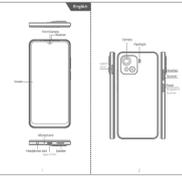

Feature	Detail
