

LOVMOR Soft Close Wood Slide Out Shelves

LOVMOR Pull Out Cabinet Organizer High Drawer

MODEL: SOFT CLOSE WOOD SLIDE OUT SHELVES (19.5"W x 21"D)

Brand: LOVMOR

1. Introduction

This manual provides instructions for the installation, operation, and maintenance of your LOVMOR Pull Out Cabinet Organizer High Drawer. Designed for efficient storage, this organizer features a high-sided wooden drawer with full-extension soft-close slide rails, ideal for kitchens, pantries, bathrooms, and closets. Please read these instructions carefully before installation and use.

2. Product Features

- **Ergonomic Design:** Features 8-inch tall doubled side and back heights to secure taller items and prevent toppling. The birchwood rim has a tapered shape for stability.
- **Soft-Close Functionality:** Equipped with hard-close full-extension ball bearing slides, rated for 100 pounds, ensuring smooth and quiet operation.
- **Durable Construction:** Made from high-quality birch and oak with a natural transparent coating for longevity and aesthetic appeal.
- **Pre-assembled Drawer:** The pull-out shelf arrives fully assembled, simplifying the installation process.

5. Important Safety Information

- Always wear appropriate safety gear (e.g., safety glasses) during installation.
- Ensure the cabinet is stable and securely mounted before installing the organizer.
- Do not overload the organizer beyond its 100-pound capacity.
- Keep small parts and hardware away from children to prevent choking hazards.
- Exercise caution when using power tools to avoid injury.

6. Pre-Installation: Measurement Guide

Accurate measurement of your cabinet is crucial for proper fit and function. Please follow these steps:

1. **Measure Clear Opening Width:** Measure the width from the hinge of the cabinet. For this 19.5"W organizer, ensure

a minimum clear width of 20 inches (measured from the hinge).

2. **Measure Clear Opening Depth:** Measure the depth from the front edge of the cabinet to the back. If there is a face frame, measure to the back of the face frame. Ensure a minimum clear depth of 24 inches. Account for any obstacles like pipes or sockets.
3. **Measure Clear Opening Height:** Measure the height from the bottom of the cabinet to the top. Ensure a minimum clear height of 9 inches.

7. Setup and Installation

The pull-out shelf arrives fully assembled. You will need to attach the slide rails to the base of your cabinet. A mounting template and all necessary hardware are included.

1. **Separate Slide Rails:** Gently press down/lift up the levers on the slide rails (one on the right, one on the left) to

separate the drawer from the cabinet slide rails.

2. **Position Mounting Template:** Place the provided mounting template on the bottom of your cabinet. Align it according to your cabinet type (face-framed or frameless) and the instructions on the template.
3. **Install Cabinet Slide Rails:** Position the cabinet slide rails over the template. Use a drill to pre-drill pilot holes through the designated points on the template and slide rails. Secure the slide rails to the cabinet base using the provided screws. Ensure they are parallel and securely fastened.
4. **Reattach Drawer:** Align the drawer slide rails with the cabinet slide rails and gently push the drawer inward until it clicks into place. Test the smooth operation of the drawer.

8. Operating Instructions

To use the pull-out cabinet organizer, simply pull the drawer forward to access items stored at the back of your cabinet. The full-extension slides allow the drawer to extend completely, providing full visibility and easy access. To close, gently push the drawer back into the cabinet; the soft-close mechanism will engage to ensure a quiet and smooth return.

9. Maintenance

- **Cleaning:** Wipe the wooden drawer with a soft, damp cloth. Avoid abrasive cleaners or harsh chemicals that could damage the wood finish.
- **Slide Rails:** Periodically check the slide rails for any debris or obstructions. If the slides become stiff, a small amount of silicone-based lubricant can be applied to the moving parts.
- **Fasteners:** Occasionally check all screws and fasteners to ensure they remain tight. Tighten if necessary to maintain stability.

10. Troubleshooting

- **Drawer does not slide smoothly:** Check for obstructions in the slide rails. Ensure the rails are clean and free of debris. Verify that the mounting screws are not overtightened, which can cause binding. Apply lubricant if needed.
- **Drawer does not close completely (soft-close not engaging):** Ensure the cabinet opening is clear and nothing is blocking the drawer's path. Check if the soft-close mechanism on the slides is damaged or misaligned.
- **Drawer feels wobbly:** Inspect all mounting screws on both the drawer and the cabinet to ensure they are securely tightened. Verify that the cabinet itself is stable.

11. Warranty and Support

LOVMOR offers a **90-day warranty** on this product. If you encounter any issues or are not satisfied with your pull-out rack, please contact LOVMOR customer service for prompt resolution of your concerns. Contact information can typically be found on the product packaging or the retailer's website.
