LD DARKEAGLE 4-Pin RGB LED Rock Lights Extension Cable (4PCS 3.93FT)

LD DARKEAGLE 4-Pin RGB LED Rock Lights Extension Cable User Manual

Model: 4PCS 3.93FT Extension Cable

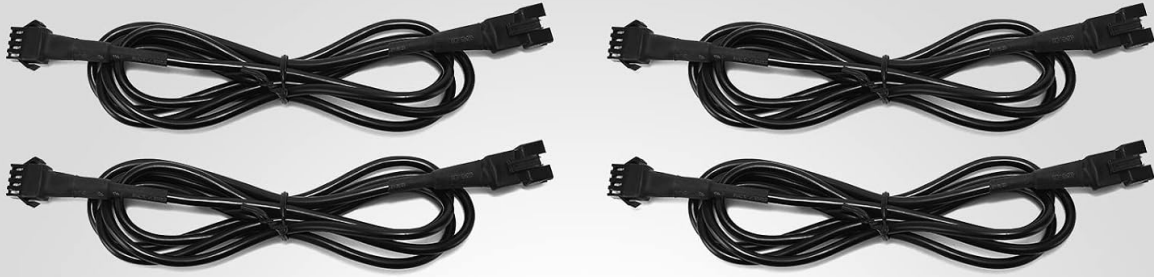

INTRODUCTION

Thank you for choosing LD DARKEAGLE 4-Pin RGB LED Rock Lights Extension Cables. These cables are designed to extend the reach of your existing RGB LED rock lights and underglow lighting systems, ensuring flexible installation and reliable performance in various 12V vehicle applications. Each cable features waterproof 4-pin snap-on connectors for secure and durable connections.

PACKAGE CONTENTS

- 4 x 47.24 inch (3.93 ft) RGB LED Rock Lights Extension Cables

PACKAGE INCLUDED

47.24inch 4-Pin Cable Extension Cable *4

Electrostatic bag packaging

Image: The package includes four 47.24-inch 4-pin cable extension cables, provided in electrostatic bag packaging.

PRODUCT FEATURES

- **Length:** Each cable measures 47.24 inches (3.93 feet), providing ample extension for most RGB rock light setups.
- **Connectors:** Equipped with 4-pin male and female snap-on connectors on both ends for easy plug-and-play installation.
- **Waterproof Design:** Each connector is sealed with a waterproof heat shrink sleeve, ensuring protection against rain, snow, and muddy environments.
- **Durability:** Wires are constructed from high-quality PVC, offering wear resistance and preventing leaks.
- **Compatibility:** Designed for use with most 4-pin RGB LED rock lights and underglow lights.

4-PIN CONNECTOR WIRE EXTENSION LINK & LENTH

Suitable for most 4-pin Rock Lights
multi-color neon Lights

SPECIFICATIONS

Attribute	Detail
Brand	LD DARKEAGLE
Model Number	RGB LED Rock Lights Extension
Length	47.24 inches (3.93 feet) per cable
Connector Type	4-Pin Snap-on Male & Female
Voltage	12 Volts (DC)
Water Resistance Level	Waterproof
Material Type	PVC Plastic
Number of Pieces	4

INSTALLATION GUIDE

These extension cables are designed for simple plug-and-play installation. Follow these steps to extend your RGB LED rock lights:

1. **Ensure Compatibility:** Before installation, verify that your existing RGB LED rock light kit uses the same 4-pin snap-on connectors as these extension cables.
2. **Identify Connectors:** Locate the 4-pin male and female connectors on your rock lights and the extension cable.
3. **Connect Cables:** Align the male connector of the extension cable with the female connector of your rock light or existing wiring. Ensure the arrows on the connectors are aligned for correct polarity.
4. **Secure Connection:** Gently push the connectors together until they snap securely into place. The waterproof heat shrink sleeve will help maintain a sealed connection.
5. **Extend as Needed:** You can splice multiple extension cables together to achieve the desired length for your installation.

OPERATION

Once installed, these extension cables seamlessly integrate with your existing RGB LED rock light system. They transmit power and signal to allow your lights to function as intended, extending their reach to various locations on your vehicle. No additional operational steps are required for the cables themselves.

Compatibility

These 4-pin extension cables are widely compatible with most RGB LED rock lights, car underglow lights, and car glow neon light kits. They are suitable for a broad range of 12V vehicles, including:

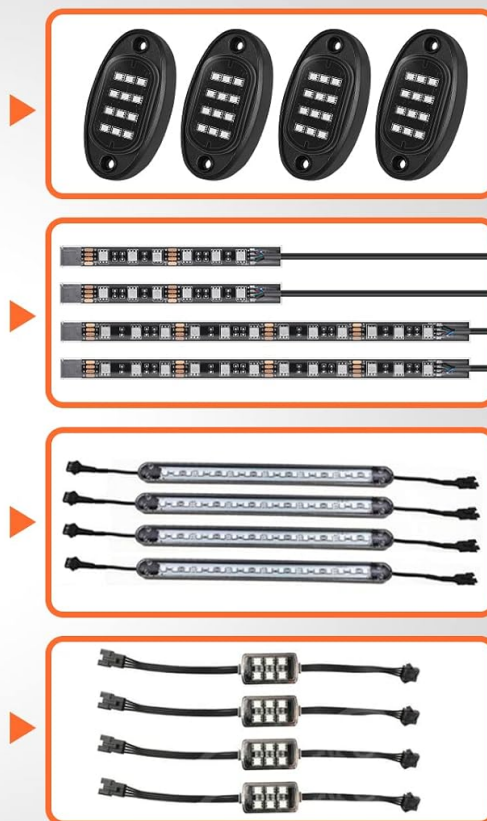

- Trucks, Jeeps, SUVs, Pickups, Semi-trucks
- ATVs, UTVs, RZR's, Side-by-Sides (SXS), Four Wheelers
- Golf Carts, Can-Am vehicles
- RVs, Boats, Tractors, Motorcycles

Image: This collage displays several vehicle types, such as a Jeep, truck, car, UTV, ATV, and golf cart, all illuminated with underglow lights, showcasing the broad application of the product.

WIDELY COMPATIBLE WITH

4pin Extension Wire Compatible Including Most Rock Lights,
Car Underglow Lights, and Car Glow Neon Lights

NOTE

Before Buying, Please Make Sure That the Kit You Buy Uses the Same Plug As Ours to Ensure Product Compatibility

Image: This graphic demonstrates the wide compatibility of the 4-pin extension cable with different types of RGB LED lighting, such as rock lights, strip lights, and underglow kits.

MAINTENANCE

These extension cables require minimal maintenance due to their durable and waterproof design. To ensure longevity:

- Periodically inspect connections for any signs of wear or damage.
- Ensure connectors remain securely fastened to maintain their waterproof seal.
- Clean any accumulated dirt or debris from the cables and connectors using a damp cloth. Avoid harsh chemicals.

TROUBLESHOOTING

If you encounter issues with your extended lighting system, consider the following:

- **Lights Not Functioning:**
 - Check all 4-pin connections to ensure they are fully seated and secure.
 - Verify that the arrows on the connectors are aligned for correct polarity.

- Inspect the cables for any visible damage or cuts.
- Ensure the main power source for your rock lights is active and providing 12V DC.

- **Intermittent Lighting:**

- Loose connections are a common cause. Re-seat all connectors firmly.
- Check for any corrosion on the connector pins.

- **Incompatible Connectors:**

- These cables are designed for 4-pin snap-on connectors. If your lights use a different connector type, these extension cables will not be compatible.

WARRANTY AND SUPPORT

LD DARKEAGLE provides a **1-year manufacturer warranty** for these extension cables, covering defects in materials and workmanship under normal use. For warranty claims or technical support, please contact LD DARKEAGLE directly.
