4. OPERATING INSTRUCTIONS

Once the charging station is powered on, you can begin charging your devices:

- **Charging an iPhone:** Place your iPhone vertically on the main charging stand. Ensure the phone is centered on the charging pad for optimal connection. The phone's screen will indicate charging status.
- **Charging an Apple Watch:** Place your Apple Watch on the dedicated magnetic charging module. The watch will snap into place and begin charging.
- **Charging AirPods/Earbuds:** Place your AirPods (or other Qi-compatible earbuds) on the flat charging pad at the base of the station. The charging case will indicate its charging status.

For best charging performance, ensure your devices are properly aligned on their respective charging areas. The charging station is designed to provide stable and efficient power delivery.

6. MAINTENANCE

To ensure the longevity and optimal performance of your charging station, follow these maintenance guidelines:

- **Cleaning:** Disconnect the power adapter before cleaning. Use a soft, dry cloth to wipe the surface of the charging station. Avoid using abrasive cleaners, solvents, or harsh chemicals.
- **Storage:** When not in use for extended periods, store the charging station in a cool, dry place away from direct sunlight and extreme temperatures.
- **Handling:** Handle the device with care. Avoid dropping it or subjecting it to strong impacts.

7. TROUBLESHOOTING

If you encounter issues with your Intoval 3-in-1 Wireless Charging Station, refer to the following troubleshooting tips:

- **Device Not Charging:**
 - Ensure the charging station is properly connected to the power adapter and a working wall outlet.
 - Verify that your device is Qi-compatible.
 - Check if your device is correctly aligned on the charging pad. Remove and reposition the device.
 - Remove any thick phone cases (over 5mm), metal attachments, or magnetic accessories from your phone, as these can interfere with wireless charging.
 - Ensure the included 18W power adapter and cable are used. Third-party adapters may not provide sufficient power.
- **Slow Charging:**
 - Confirm you are using the provided 18W power adapter. Lower wattage adapters will result in slower charging.
 - Ensure no foreign objects are between the device and the charging pad.
 - Close unnecessary background applications on your device to reduce power consumption during charging.
 - Environmental factors like high temperature can affect charging speed.
- **LED Indicator Not Working:**
 - Check the power connection.
 - If the LED indicator has a light switch (as shown in some product images), ensure it is toggled on.

If the issue persists after trying these steps, please contact customer support.
