BoxWave IR-260

BoxWave ClearTouch Anti-Glare Screen Protector for Auna IR-260

Instruction Manual

INTRODUCTION

The BoxWave ClearTouch Anti-Glare Screen Protector is specifically designed to protect the screen of your Auna IR-260 device. It features a matte finish that reduces glare and resists fingerprints, enhancing your viewing experience and keeping your screen clean. This manual provides detailed instructions for proper installation, maintenance, and troubleshooting.

WHAT'S INCLUDED

Your BoxWave ClearTouch Anti-Glare Screen Protector package contains the following items:

- Two (2) ClearTouch Anti-Glare screen protectors
- One (1) Applicator Card
- One (1) Microfiber Cleaning Cloth
- One (1) Dust Removing Sticker

ClearTouch screen protector included accessories

**Applicator
Card**

**Microfiber
Cleaning Cloth**

**Dust Removing
Sticker**

INSTALLATION INSTRUCTIONS

Follow these steps carefully for optimal screen protector application. A clean, dust-free environment is recommended.

1. **Clean the Device Screen:** Use the included microfiber cleaning cloth to thoroughly clean the Auna IR-260 screen. Ensure all dust, smudges, and fingerprints are completely removed. For stubborn marks, a screen cleaner (not included) can be used.
2. **Remove Remaining Dust:** Use the dust removing sticker to lift any fine dust particles from the screen. Inspect the screen under good lighting to ensure it is pristine.
3. **Peel Back Layer 1:** Carefully peel back a small portion of the protective film labeled "Layer 1" from one corner of the screen protector. Avoid touching the adhesive side to prevent dust or fingerprints.
4. **Align and Apply:** Align the exposed adhesive edge of the screen protector with one edge of your Auna IR-260 screen. Once aligned, slowly and steadily lower the screen protector onto the screen, gradually peeling off "Layer 1" as you go.
5. **Smooth Out Bubbles:** Use the applicator card to gently push out any air bubbles towards the edges of the screen protector. Start from the center and work your way outwards.

6. **Remove Layer 2:** Once the screen protector is fully applied and free of major bubbles, carefully peel off the top protective film labeled "Layer 2".
7. **Final Inspection:** Perform a final check for any remaining small bubbles or dust. Minor bubbles often disappear naturally within 24-48 hours as the adhesive settles.

PRODUCT FEATURES

- **Anti-Glare:** The matte surface is engineered to disperse light, significantly reducing glare from both natural sunlight and indoor lighting. This improves screen readability and helps reduce eye strain.
- **Anti-Fingerprint:** The ultra-smooth matte finish actively repels smudges, dust, and fingerprints, helping to keep your Auna IR-260 screen cleaner for longer.
- **Precision Cut:** Each ClearTouch protector is precisely manufactured to fit the exact dimensions and contours of the Auna IR-260 screen, ensuring full access to all functions and ports.
- **Reusable and Residue-Free:** The special glueless adhesive allows for easy reinstallation if needed during the application process and leaves no sticky residue upon removal.
- **Paper-like Feel:** Provides a comfortable, paper-like texture for an enhanced touch experience, especially beneficial for stylus use.

ClearTouch ANTI-GLARE

The specially designed diffusion surface reduces distracting glare to improve your screen's readability, from bright to low-light conditions

MAINTENANCE

To ensure the longevity and effectiveness of your BoxWave ClearTouch Anti-Glare Screen Protector:

- **Cleaning:** Use the provided microfiber cloth to gently wipe the screen protector. For more thorough cleaning, lightly dampen the cloth with water or a mild, screen-safe cleaning solution. Avoid harsh chemicals, abrasive materials, or paper towels, as these can scratch the surface.
- **Avoid Sharp Objects:** While the protector offers a layer of defense against scratches, avoid direct contact with sharp objects to prevent damage to the protector itself.
- **Storage:** If you need to remove the protector for any reason, keep it on its original backing or a clean, flat, non-abrasive surface to prevent dust accumulation and damage to the adhesive.

TROUBLESHOOTING

Here are solutions to common issues you might encounter during or after installation:

- **Bubbles After Installation:**

Small bubbles often disappear naturally within 24-48 hours as the adhesive fully settles. For larger or persistent bubbles, gently lift the nearest edge of the screen protector and reapply, using the applicator card to push out the air towards the edge.

- **Dust Under Protector:**

If dust is trapped under the protector, carefully lift the nearest edge. Use a dust removing sticker or a piece of tape to gently dab the dust off both the adhesive side of the protector and the device screen. Reapply slowly, ensuring no new dust settles.

- **Uneven Application/Misalignment:**

The glueless adhesive allows for reinstallation. Carefully lift the protector from one corner and realign it. Ensure the screen is clean before reapplying to avoid trapping dust.

SPECIFICATIONS

Material	Polyethylene Terephthalate (PET)
Special Feature	Anti-Glare, Anti-Fingerprint
Screen Surface Description	Matte
Number of Items	2 (Two-Pack)
Compatibility	Auna IR-260
