## 4. TROUBLESHOOTING

### 4.1 Common Issues and Solutions

- **Device Not Powering On:** Ensure the battery is charged. Connect the device to the charger for at least 15 minutes, then try powering it on again.

- **Network Connectivity Issues:** Check if your SIM card is properly inserted. Restart the device. Verify your network settings and contact your service provider if problems persist.

### 4.2 Factory Reset

If you encounter persistent software issues, a factory reset may resolve them. **Warning:** A factory reset will erase all data from your device. Back up important data before proceeding. To perform a factory reset, go to Settings > System > Reset options > Erase all data (factory reset).
