Note: A small amount of residual water may be present in the pump due to factory testing. This is normal and indicates a brand new unit.

3. SETUP AND INSTALLATION

3.1. Site Selection

Choose a dry, level location near your pool equipment, protected from direct weather exposure if possible, although the TEFC motor is designed for outdoor use. Ensure adequate ventilation around the pump.

3.2. Electrical Wiring (Important!)

The factory default operating voltage for this pump is 230V. If your electrical supply is 115V, you **MUST** manually change the wiring configuration inside the pump's terminal box before operation. Failure to do so may result in

damage to the pump or electrical system.

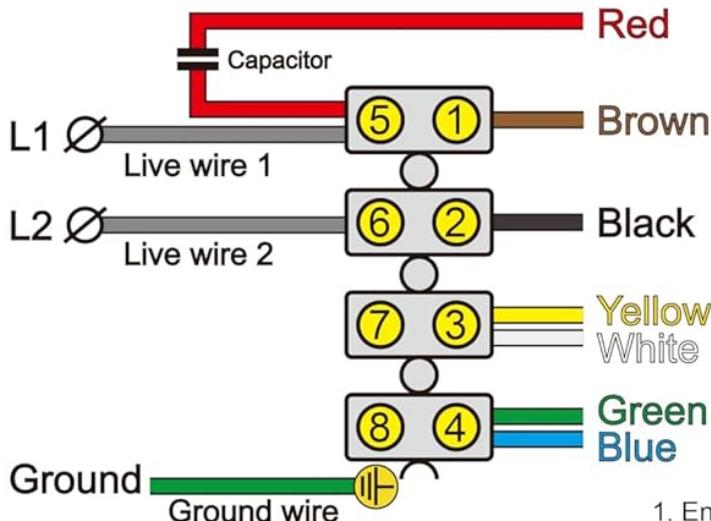

Refer to the detailed wiring diagram below for correct connections for both 230V and 115V setups. Always ensure power is disconnected at the circuit breaker before performing any wiring.
