## STRICH SMT-10

# STRICH SMT-10 Hardwood Multi-Guitar Stand Instruction Manual

MODEL: SMT-10 | BRAND: STRICH

## 1. Product Overview

The STRICH SMT-10 is a hardwood multi-guitar stand designed to securely hold multiple string instruments. Its robust construction and thoughtful design aim to provide a stable and protective storage solution for your guitars in various settings.

## 2. Key Features

- **Multi-Instrument Capacity:** Designed to accommodate up to 5 electric guitars or basses, or 3 acoustic/classical guitars. The stand's dimensions are optimized for instruments larger than 36 inches (3/4 size), including various body types like ST, LP, Dreadnought, Parlor, and Banjo.
- **Durable Hardwood Construction:** Crafted from high-density, carefully dried and treated wood with an environmentally friendly coating, ensuring stability and longevity.
- **Instrument Protection:** Features a triangular ultra-stable structure and 5mm thickened anti-crash non-reactive felt on all contact surfaces to prevent scratches and damage. Suitable for nitrocellulose lacquered instruments.

- **Easy Assembly:** Designed for quick and straightforward assembly without requiring specialized tools. All components are labeled for easy identification.
- **Detachable Sponge Columns:** Includes removable sponge columns, allowing adjustment for different guitar thicknesses or cases to optimize space.
- **Integrated Accessory Storage:** Features dedicated areas for guitar cables, picks, and can also accommodate guitar cases.

## 3. Setup Instructions

Follow these steps to assemble your STRICH SMT-10 Multi-Guitar Stand:

- 1. Unpack Components:** Carefully remove all parts from the packaging. Verify that all components listed in the parts diagram (refer to included manual) are present and undamaged.
- 2. Identify Parts:** Each wooden piece is labeled with an identification sticker (e.g., A, B, C). Match these labels with the assembly diagram provided in your package.
- 3. Assemble Base Frame:** Connect the horizontal base pieces to the vertical side supports using the provided screws. Ensure a snug fit for stability.

4. **Attach Neck Support Bar:** Secure the top neck support bar to the vertical side supports. This bar features the wavy cutouts for guitar necks.
5. **Install Protective Pegs/Columns:** Insert the detachable sponge columns into the designated holes on the neck support bar. These can be adjusted or removed based on your guitar's neck thickness or if you are storing cased instruments.
6. **Verify Stability:** Once assembled, gently shake the stand to ensure all connections are secure and the stand is stable on a flat surface.

## 4. Operating Instructions (Usage)

To use your STRICH SMT-10 Multi-Guitar Stand:

- **Placement:** Position the stand on a flat, stable surface. Ensure there is adequate space around the stand to prevent accidental bumps or falls.
- **Storing Guitars:** Gently place your guitars into the designated slots. The neck of the guitar should rest securely in the padded wavy cutouts on the top bar, and the body should rest against the felt-lined base.

- **Capacity Management:** The stand can hold up to 5 electric guitars/basses or 3 acoustic guitars. For optimal protection and fit, arrange instruments carefully, especially when mixing different types. Utilize the detachable sponge columns to adjust spacing for wider instruments or cased guitars.
- **Accessory Use:** Hang guitar cables on the integrated hooks. Store guitar picks in the designated slots. Guitar cases can be placed in the wider sections of the base if sponge columns are removed.

Figure 8: Example of various guitars stored on the stand.

## 5. Maintenance

Proper maintenance ensures the longevity and appearance of your guitar stand:

- **Cleaning:** Wipe the wooden surfaces with a soft, dry cloth. For stubborn marks, a slightly damp cloth

with mild wood cleaner can be used, followed by immediate drying. Avoid harsh chemicals.

- **Felt Care:** Periodically inspect the felt padding for wear or damage. Clean the felt gently with a lint roller or a soft brush to remove dust and debris.
- **Hardware Check:** Regularly check all screws and connections to ensure they remain tight. Tighten any loose hardware to maintain the stand's stability.
- **Environmental Conditions:** Store the stand in a stable environment, away from extreme temperature changes, direct sunlight, and high humidity, which can affect wood integrity.

## 6. Troubleshooting

| Problem                                       | Possible Cause                                    | Solution  |
|---|---|---|
| Stand feels unstable or wobbly.               | Loose screws or uneven surface.                   | Ensure all screws are tightened. Place the stand on a flat, level surface.  |
| Guitars do not fit securely or are too close. | Incorrect arrangement or sponge column placement. | Adjust the position of the detachable sponge columns. Ensure instrument types match the recommended capacity. Some non-conventional shaped guitars may not fit. |
| Scratches on instrument from stand.           | Damaged felt padding or improper placement.       | Inspect felt padding for wear; replace if necessary. Always place guitars gently, ensuring contact points are on the felt.                                      |

## 7. Specifications

| Feature                        | Detail  |
