- CANBUS Decoder
- Removal Tools (Plastic pry tool, screwdriver)
- Instruction Manual
- Radio Antenna / Original Car USB Adapter

SETUP AND INSTALLATION

Important: Professional installation is recommended. Disconnect the vehicle's battery before starting any electrical work.

Step-by-Step Installation Guide

This video provides a visual guide for the installation process.

Video: Unboxing and installation guide for the AWESAFE Android 12 Car Radio. This video demonstrates how to unpack the unit and accessories, remove the old car radio, connect the new unit's wiring, and reinstall the dashboard components.

1. Removing the Original Radio

Use the provided plastic pry tool to carefully remove the trim panels around the existing car radio. Unscrew any retaining screws and gently pull out the old unit.

2. Connecting Wiring Harnesses

Connect the main power harness, RCA cables, USB cables, and GPS antenna to the corresponding ports on the new AWESAFE unit. Ensure all connections are secure.

3. Installing External Components

Position the GPS antenna in a location with a clear view of the sky (e.g., dashboard corner). Install the external microphone for hands-free calling.

4. Testing the Unit

Before fully reassembling the dashboard, temporarily connect the battery and power on the unit to verify all functions (radio, navigation, Bluetooth, steering wheel controls) are working correctly.

5. Reassembly

Carefully slide the new AWESAFE unit into the dashboard opening. Secure it with screws and reattach all trim panels.

OPERATING INSTRUCTIONS

Basic Operation

The unit features a 7-inch touchscreen display and physical buttons for common functions.

Mirrorlink Function

The Mirrorlink feature allows you to mirror your iOS or Android smartphone screen directly onto the car radio display.

Mirrorlink

Supporta il mirroring dello schermo per telefoni IOS e Android.

Image: Mirrorlink functionality via USB or Wi-Fi.

Steering Wheel Controls (SWC)

The unit is compatible with your vehicle's original steering wheel buttons. Refer to the system settings for programming and customizing SWC functions.

Comandi al volante

Compatibile con i pulsanti originali del volante dell'auto.

Image: Steering wheel control learning interface.

GPS Navigation

Utilize the integrated GPS for accurate navigation. The system supports various mapping applications.

Bluetooth Connectivity

Pair your smartphone via Bluetooth for hands-free calling and audio streaming.

DSP and EQ Settings

Adjust the audio output using the Digital Sound Processor (DSP) and Equalizer (EQ) functions to customize your listening experience.

MAINTENANCE

- **Screen Cleaning:** Use a soft, lint-free cloth to clean the touchscreen. Avoid abrasive cleaners.
- **Software Updates:** Periodically check for software updates through the system settings or the AWESAFE official website to ensure optimal performance and access to new features.
- **General Care:** Keep the unit free from dust and moisture. Avoid exposing it to extreme temperatures.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on	Loose power connection, blown fuse.	Check power cables and vehicle fuses. Ensure proper installation.
No sound	Volume too low, incorrect audio source, loose speaker connections.	Increase volume, select correct audio source, check speaker wiring.
GPS not working	GPS antenna not connected or poorly positioned.	Ensure GPS antenna is securely connected and has a clear view of the sky.
Bluetooth connection issues	Device not paired, Bluetooth off on phone or unit.	Ensure Bluetooth is enabled on both devices and re-pair if necessary.
