SETUP

1. **Prepare the Board:** Place the game board in the center of the playing area.
2. **Separate Cards:** Separate the Money cards, Bankruptcy cards, and Chance cards from their respective decks.
3. **Player Decks:** Each player chooses a color and takes the corresponding pawn deck (20 cards) and a building track. Shuffle your pawn deck and place it face down in front of you.
4. **Reference Cards:** Each player takes a reference card.
5. **Chance Cards:** Shuffle the 8 Chance cards and place them face down on the designated space on the board.
6. **Buildings:** Place the 32 buildings near the board, accessible to all players.
7. **Starting Player:** The youngest player goes first. Play proceeds clockwise.

OPERATING (GAMEPLAY)

Monopoly Chance is a game of luck and strategic card placement. The goal is to be the first player to fill your building track with buildings.

Player Turn Sequence:

1. **Roll the Die:** The active player rolls the die.
2. **Flip Cards:** Based on the die roll, the player flips up to that number of cards from their personal pawn deck. Players challenge their luck by revealing Money cards. Be cautious, as a Bankruptcy card might be among them.
3. **Bankruptcy:** If a player flips a Bankruptcy card, their turn immediately ends, and they lose all Money cards revealed during that turn. The Bankruptcy card is then shuffled back into their pawn deck.
4. **Acquire Properties:** Players strategically place their revealed Money cards onto property spaces on the board or on top of other players' Money cards already on properties. The highest value Money card on a property at the end of the round determines ownership.
5. **Build Buildings:** If a player successfully acquires a property (their Money card is the highest on it at the end of the round), they place one of their buildings onto their building track.
6. **Winning the Game:** The first player to successfully place all their buildings on their building track wins the game.

Special Cards:

- **Chance Cards:** If the die shows a '?' symbol, the player draws a Chance card and follows its instructions. These cards can introduce unexpected twists to the game.
- **Money Cards:** These cards are used to bid on properties. Higher values increase your chances of acquiring a property.
- **Bankruptcy Cards:** Drawing this card results in losing your current turn and any money cards revealed during that

turn.
