Yuecoom Floating Wall Shelf for Projector and Router

Model: Yuecoomz6gkex2i1r

PRODUCT OVERVIEW

The Yuecoom Floating Wall Shelf is a versatile and space-saving solution designed to securely hold various electronic devices such as projectors, routers, set-top boxes, and cable boxes. Constructed from durable stainless steel with a polished finish, it offers both functionality and a sleek aesthetic for any room.

- **Polished Surface Treatment:** The holder's surface is polished, providing resistance against corrosion, oxidation, and discoloration, ensuring long-lasting appearance.
- **Rounded Corner Design:** Edges are rounded for safety, preventing accidental bumps and scratches.
- **Strong Load-Bearing Capacity:** Made from robust stainless steel, the shelf offers excellent stability and support for your devices.
- **Integrated Cable Management:** Features an outlet hole designed to neatly route cables, helping to eliminate messy wiring and maintain a clean setup.
- **Versatile Application:** Suitable for various environments including family rooms, living rooms, bedrooms, bathrooms, offices, and commercial spaces.

SETUP INSTRUCTIONS

Follow these steps for proper installation of your floating wall shelf. Ensure you have the necessary tools: a drill, a screwdriver, and a pencil.

1. **Choose Location:** Select a suitable wall location, ensuring it is sturdy enough to support the shelf and its intended contents. Mark the desired height and position for the shelf.
2. **Mark Drill Holes:** Hold the shelf against the wall at the chosen position. Use a pencil to mark the two mounting holes on the wall.
3. **Drill Holes:** Using a drill, create pilot holes at the marked spots. The drill bit size should match the diameter of the provided wall anchors.
4. **Insert Wall Anchors:** Gently tap the plastic wall anchors into the drilled holes until they are flush with the wall surface.
5. **Mount the Shelf:** Align the shelf's mounting holes with the installed wall anchors. Insert the screws through

the shelf's holes and into the anchors.

6. **Secure the Shelf:** Use a screwdriver to tighten the screws until the shelf is firmly secured to the wall. Do not overtighten.
7. **Apply Decorative Caps (Optional):** If included, press the decorative screw caps over the screw heads for a finished look.

OPERATING INSTRUCTIONS

Once installed, the Yuecoom Floating Wall Shelf is ready for use. Consider the following:

- **Placement of Devices:** Carefully place your projector, router, set-top box, or other compatible devices onto the shelf. Ensure the weight is evenly distributed.
- **Cable Management:** Utilize the integrated cable outlet hole to route power cords and data cables. This helps keep your setup organized and prevents cables from dangling.
- **Weight Limit:** Adhere to the maximum recommended weight capacity of the shelf to ensure stability and prevent damage. While designed for strong bearing capacity, avoid placing excessively heavy items.

MAINTENANCE

To maintain the appearance and functionality of your Yuecoom Floating Wall Shelf:

- **Cleaning:** Wipe the shelf regularly with a soft, damp cloth. For stubborn marks, a mild, non-abrasive cleaner can be used. Avoid harsh chemicals or abrasive materials that could damage the polished finish.
- **Inspection:** Periodically check the mounting screws to ensure they remain tight. If the shelf feels loose, gently retighten the screws.

- **Avoid Overloading:** Do not exceed the shelf's weight capacity to prevent bending or detachment from the wall.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Shelf feels loose after installation.	Screws not fully tightened or wall anchors not properly seated.	Gently retighten the mounting screws. Ensure wall anchors are flush with the wall. If the wall material is weak, consider using stronger anchors.
Shelf is not level.	Mounting holes marked unevenly or screws tightened unevenly.	Loosen screws slightly, adjust the shelf to be level using a spirit level, then retighten. Ensure marks are precise during installation.
Device does not fit on the shelf.	Device dimensions exceed shelf dimensions.	Verify device dimensions against the shelf specifications (11.5cm width, 11cm depth). The shelf is designed for compact devices.
