2. Setup

2.1 Unpacking and Initial Inspection

Carefully remove the printer from its packaging. Ensure all packing materials, tapes, and protective films are removed from the exterior and interior of the device. Verify that all included components, such as the power cord, starter toner cartridge, and documentation, are present.

2.2 Printer Placement

Place the printer on a stable, level surface capable of supporting its weight (approximately 55.5 pounds). Ensure adequate ventilation around the printer and avoid placing it in direct sunlight or near heat sources. Allow sufficient space for opening trays and accessing connections.

2.3 Power Connection

Connect the power cord to the printer's power input and then to a grounded electrical outlet. Do not use extension cords or power strips that are not rated for the printer's power requirements (1320 watts).

2.4 Paper Loading

The MA6000ifx supports various paper sizes up to 8.5 x 14 inches. Open the paper tray (Cassette 1) located at the bottom front of the printer. Adjust the paper guides to fit the paper size. Load the paper stack with the print side facing down. Close the tray securely.

4. Maintenance

4.1 Cleaning the Printer

Regular cleaning helps maintain print quality and extends the life of your printer. Use a soft, lint-free cloth to wipe the exterior. For the scanner glass, use a glass cleaner applied to the cloth (not directly to the glass) to remove smudges and dust.

4.2 Toner Replacement

The printer will display a message on the control panel when the toner level is low or empty. Refer to Section 2.5 for general instructions on replacing the toner cartridge. Always use genuine KYOCERA toner cartridges for optimal performance.

4.3 Clearing Paper Jams

In the event of a paper jam, the control panel will display an error message indicating the location of the jam. Carefully open the specified covers or trays and gently pull out any jammed paper in the direction of the paper path. Avoid tearing the paper to prevent small pieces from remaining inside.

4.4 Routine Checks

Periodically check for firmware updates on the KYOCERA website to ensure your printer has the latest features and security enhancements. Ensure all cables are securely connected and that the printer is placed in an environment free

from excessive dust or humidity.
