4. TROUBLESHOOTING

This section addresses common issues you might encounter with your ODK L Shaped Desk.

Problem	Possible Cause	Solution
Desk feels wobbly or unstable.	Loose connections or uneven floor.	Ensure all screws and bolts are securely tightened. Use the adjustable foot pads to level the desk on uneven surfaces.
LED lights are not functioning correctly.	Loose connection, power issue, or faulty strip.	Check that the LED strip is properly connected to the power source and the control unit. Ensure the power outlet is active. If issues persist, contact customer support.
Assembly holes do not align.	Incorrect orientation of parts or minor manufacturing variance.	Double-check the orientation of all pieces against the assembly diagrams. Loosen adjacent screws slightly to allow for minor adjustments, then re-tighten.
File drawers are finicky or not sliding smoothly.	Improper assembly of drawer frame or overloaded drawers.	Ensure the fabric drawers are fully expanded and correctly inserted into their frames. Avoid overloading them beyond their capacity.
Monitor stand height is uncomfortable.	Personal ergonomic preference.	While the stand is designed for ergonomic height, individual preferences vary. Consider using a monitor arm or an adjustable chair to achieve optimal comfort.
