# **IQShield Screen Protector User Manual**

**FOR GARMIN FORERUNNER® 970/570/965-47MM AND VENU 4-45MM (MODEL: IQ43088)**

Premium Thermoplastic Polyurethane (TPU) Film

## **1. Introduction**

---

The IQShield Screen Protector is designed to safeguard the display of your Garmin Forerunner® 970/570/965 (47mm) or Venu 4-45mm smartwatch. This ultra-thin, clear TPU film offers robust protection against scratches, scuffs, and daily wear, while maintaining optimal screen clarity and touch sensitivity. Its unique application method ensures a bubble-free installation and a contoured fit to your device's screen.

## **2. Package Contents**

---

Each IQShield Screen Protector package includes the following items:

- IQShield Screen Protectors (6-Pack)
- Lint-less Cleaning Cloth
- Application Squeegee Card
- Installation Solution Spray Bottle
- Detailed Installation Instructions

Image: Multiple IQShield screen protectors included in the multipack.

## **3. Compatibility**

---

This IQShield Screen Protector is specifically designed for and compatible with the following smartwatch models:

- Garmin Forerunner® 970 (47mm)
- Garmin Forerunner® 570 (47mm)
- Garmin Forerunner® 965 (47mm)
- Garmin Venu 4 (45mm)

## MULTIPACK--IQSHIELD

Stay protected and share the benefits - extra protectors for your family or keep them for extra replacements.

### 4. Key Features

- **Advanced TPU Construction:** Crafted from Thermoplastic Polyurethane, offering flexibility and durability.
- **Self-Healing Technology:** Designed to recover from minor scratches and scuffs, maintaining a pristine look.
- **Anti-Scratch Protection:** Provides a robust barrier against everyday scratches and abrasions.
- **Bubble-Free Application:** Innovative adhesive and wet-install method ensure a smooth, bubble-free finish.
- **High Transparency:** Maintains the original clarity and brightness of your device's display.
- **Non-Yellowing Material:** Ensures long-lasting clarity without discoloration over time.
- **Responsive Touch:** Preserves the original touch sensitivity and responsiveness of your screen.
- **Edge-to-Edge Coverage:** Molds to the contours of your device for comprehensive protection.

# Flexible Protector

Durable, Form Fitting

IQShield screen protectors are made using high quality TPU film. The film is flexible allowing it to adhere to the curved or round edges of any devices.

## 5. Installation Instructions

---

For optimal results, please follow these steps carefully. Watch the provided installation videos for visual guidance.

### Preparation:

1. Ensure your hands are clean and free of dust or oils.
2. Work in a dust-free environment to prevent particles from getting trapped under the protector.
3. Thoroughly clean your smartwatch screen using the provided lint-less cloth. Ensure all smudges, fingerprints, and dust are removed.
4. If necessary, use a dust remover sticker to pick up any remaining fine dust particles.

### Application:

5. Lightly spray the adhesive side of the screen protector with the installation solution. Do not oversaturate.
6. Carefully align the screen protector over your smartwatch screen. The solution allows for minor adjustments to achieve perfect alignment.
7. Once aligned, gently press down on the center of the protector to secure it.
8. Using the provided squeegee card, slowly push out any excess solution and air bubbles from the center outwards towards the edges. Apply firm, even pressure.
9. Wipe away any excess solution with the lint-less cloth.
10. Allow the screen protector to cure for 12-24 hours. Avoid touching or using the device during this period for best adhesion. Small bubbles or haziness may disappear naturally within this time.

## 6. Operating Your Device with the Protector

---

The IQShield Screen Protector is designed to be virtually invisible and maintain the full functionality of your smartwatch. Once properly installed and cured, you should experience:

- **Unimpeded Touch Sensitivity:** The ultra-thin film ensures that all touch gestures and commands register accurately and instantly.
- **Crystal Clear Display:** Enjoy the vibrant colors and sharp details of your smartwatch screen without any distortion or reduction in clarity.
- **Seamless Interaction:** The smooth surface allows for effortless swiping and navigation, feeling almost identical to the original screen.

## 7. Care and Maintenance

---

To ensure the longevity and optimal performance of your IQShield Screen Protector, follow these simple care guidelines:

- **Cleaning:** Use a soft, lint-free cloth (like the one provided) to gently wipe the screen protector. For stubborn smudges, slightly dampen the cloth with water or a mild, non-abrasive screen cleaner.
- **Avoid Harsh Chemicals:** Do not use harsh chemicals, abrasive cleaners, or solvents, as these can damage the film.
- **Prevent Sharp Objects:** While the protector is scratch-resistant, avoid direct contact with extremely sharp objects to prevent deep gouges.
- **Re-application:** If the protector becomes heavily damaged or starts to peel, replace it with a new one from your 6-pack.

## 8. Troubleshooting

---

Here are solutions to common issues you might encounter during or after installation:

- **Bubbles After Installation:** Small bubbles are common immediately after wet installation. Most will disappear naturally within 12-24 hours as the solution evaporates. For larger, persistent bubbles, gently push them towards the nearest edge with the squeegee card.
- **Dust Particles Under Protector:** If dust is trapped, it's usually due to insufficient cleaning. If it's bothersome, you may need to carefully peel back the protector, clean the area, and reapply. This is why a multi-pack is provided.
- **Edges Not Sticking:** Ensure enough installation solution was applied to the edges and that you pressed them down firmly with the squeegee or your fingers during the final steps. Allow adequate curing time.
- **Protector Peeling:** This can occur if the edges were not properly adhered or if the device was used too soon after installation. Ensure proper curing time and firm adhesion.
- **Reduced Touch Sensitivity:** If touch sensitivity is noticeably reduced, ensure the protector is fully cured and there are no large air pockets. If the issue persists, re-installation might be necessary.

## 9. Product Specifications

---

| Feature | Detail   |
|---------|----------|
| Brand   | IQShield |

| Feature                        | Detail  |
