ThiEYE Vackit Air

ThiEYE VK Air User Manual

MODEL: VACKIT AIR

1. Introduction

Thank you for choosing the ThiEYE VK Air Handheld Cordless Vacuum Cleaner and Air Blower. This device is designed for convenient and efficient cleaning in various environments, offering both powerful suction and blowing capabilities. Please read this manual thoroughly before use to ensure proper operation, maintenance, and safety.

2. Safety Information

- Always ensure the device is fully charged before first use.
- Do not use the device to vacuum liquids, hot ashes, burning cigarettes, or sharp objects.
- Keep the device away from water and high humidity.
- Do not operate the device if the filter is not properly installed.
- Keep hair, loose clothing, fingers, and all body parts away from openings and moving parts.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.
- Children should be supervised to ensure that they do not play with the appliance.
- Use only the charging cable provided by the manufacturer.

3. Package Contents

Verify that all items listed below are included in your package:

- Handheld Vacuum
- 2-in-1 Crevice Tool
- Type-C Charging Cable
- Blowing Hose

- Storage Bag
- HEPA Filter (pre-installed)
- User Manual

4. Setup

4.1 Charging the Device

1. Connect the Type-C charging cable to the charging port on the vacuum cleaner.
2. Plug the other end of the cable into a USB power adapter (not included) or a car USB port.
3. The indicator light will show charging status (refer to LED indicator section for details). A full charge typically takes 1.5 hours.

4.2 Attaching Accessories

- **For Vacuuming:** Attach the 2-in-1 crevice tool to the suction nozzle. Extend the brush for delicate surfaces or retract it for narrow gaps.
- **For Blowing:** Attach the blowing hose to the exhaust port at the rear of the device.

5. Operating Instructions

5.1 Power On/Off

Press the power button once to turn on the device. Press it again to turn off. The device operates at a single power setting.

5.2 Vacuuming Function

Attach the desired nozzle (e.g., 2-in-1 crevice tool) to the front suction port. Turn on the device and move the nozzle over the area to be cleaned. The powerful 6500Pa suction will collect dust and debris.

Multiple Usage Scenarios

Crevice Nozzle

Covers a variety of dead-end cleaning

Brush Nozzle

Perfect for irregular surface

Image: ThiEYE VK Air with crevice nozzle cleaning a car seat and brush nozzle cleaning a car air vent.

5.3 Air Blower Function

To use the air blower, attach the blowing hose to the rear exhaust port. Turn on the device. The air stream can be used to dislodge dust and debris from hard-to-reach areas, such as keyboard crevices or car vents, before vacuuming.

AIR DUST BLOWER

Blow out garbage from hidden corners

5.4 Product Demonstration Video

Your browser does not support the video tag.

Video: This video demonstrates the ThiEYE VK Air's vacuuming and blowing capabilities for quick clean-ups in various settings, including car interiors and household surfaces. It highlights its lightweight design and easy dust emptying feature.

6. Maintenance

6.1 Emptying the Dust Bin

1. Ensure the device is turned off.
2. Press the dust bin release button (usually located near the dust bin).

3. Carefully remove the dust bin and empty its contents into a trash receptacle.
4. Reattach the dust bin until it clicks securely into place.

Image: Demonstration of emptying the dust bin with a single button press.

6.2 Cleaning the HEPA Filter

1. Remove the dust bin as described above.
2. Carefully pull out the HEPA filter from the dust bin.
3. Tap the filter gently to remove loose dust. For a deeper clean, rinse the filter under running water.
4. Ensure the filter is completely dry before reinserting it into the dust bin and reattaching the bin to the vacuum. Do not use the vacuum with a wet filter.

7. Troubleshooting

Problem	Possible Cause	Solution
Device does not turn on	Low battery; Power button not pressed correctly	Charge the device; Ensure a firm press on the power button
Weak suction power	Full dust bin; Clogged filter; Blocked nozzle	Empty dust bin; Clean or replace filter; Clear any blockages from the nozzle
Device stops during operation	Low battery; Overheating	Recharge the device; Allow device to cool down before resuming use
