Nordisk 242041

Nordisk Kari 10 Diamond Tarp User Manual

Model: 242041 | Brand: Nordisk

Introduction

This manual provides comprehensive instructions for the proper setup, use, and maintenance of your Nordisk Kari 10 Diamond Tarp. Designed for outdoor camping, this diamond-shaped tarp offers versatile and reliable shelter from sun and rain, enhancing your outdoor experience.

Components Included

- **Tarp:** Made from Technical Cotton (65% polyester, 35% cotton)
- **Guy Ropes:** High Tenacity Polyester 5.0 mm with Nordisk Aluminum Triangular Sliders
- **Poles:** Steel, 2 pieces, 230 mm (9.1 inches) height
- **Pegs:** Steel V-Peg, 6 pieces

Setup Instructions

Follow these steps to correctly pitch your Kari 10 Diamond Tarp for optimal stability and shelter.

1. Unpack all components: the tarp, poles, pegs, and guy ropes.
2. Lay the tarp flat on the ground in your desired location. Ensure the area is clear of sharp objects and debris.
3. Identify the reinforced corners and central attachment points of the diamond-shaped tarp.
4. Insert the two steel poles into the designated eyelets or loops at two opposing corners or points, depending on your desired configuration.
5. Secure the base of each pole firmly into the ground.
6. Attach the guy ropes to the remaining attachment points on the tarp.
7. Extend the guy ropes outwards and secure them to the ground using the steel V-pegs. Adjust the tension using the aluminum triangular sliders to create a taut and stable shelter.
8. Ensure all pegs are driven securely into the ground at an angle to maximize holding power.
9. Adjust pole positions and guy rope tension as needed to achieve the desired shape and stability, providing optimal protection from the elements.

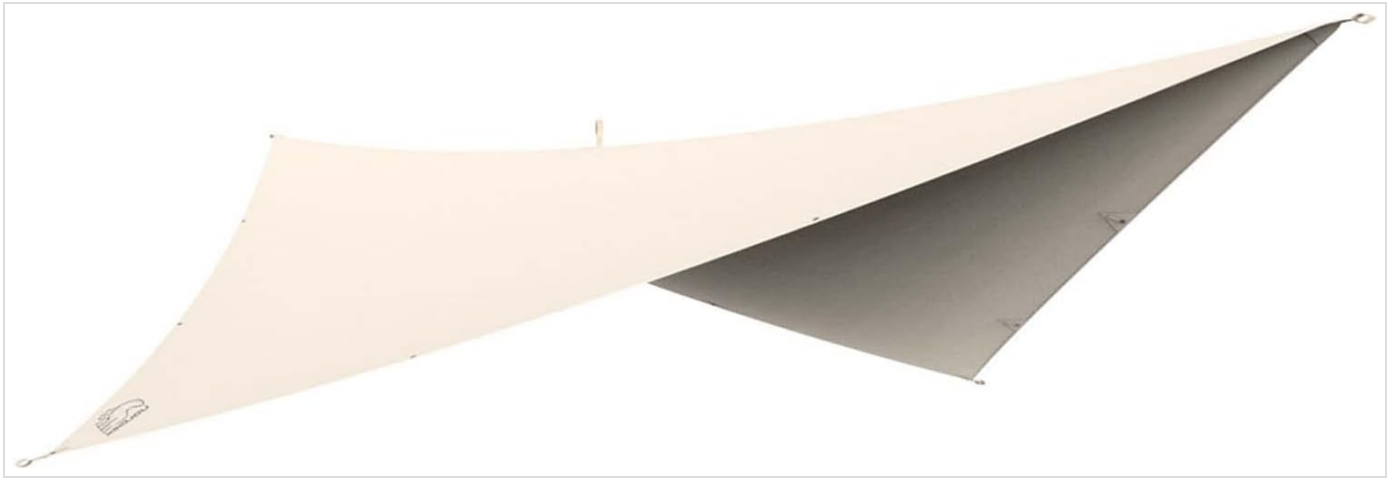

Image Description: A Nordisk Kari 10 Diamond Tarp pitched in a diamond configuration, showcasing its overall shape and how it provides shelter. The tarp is a light, sandy color, demonstrating a typical setup.

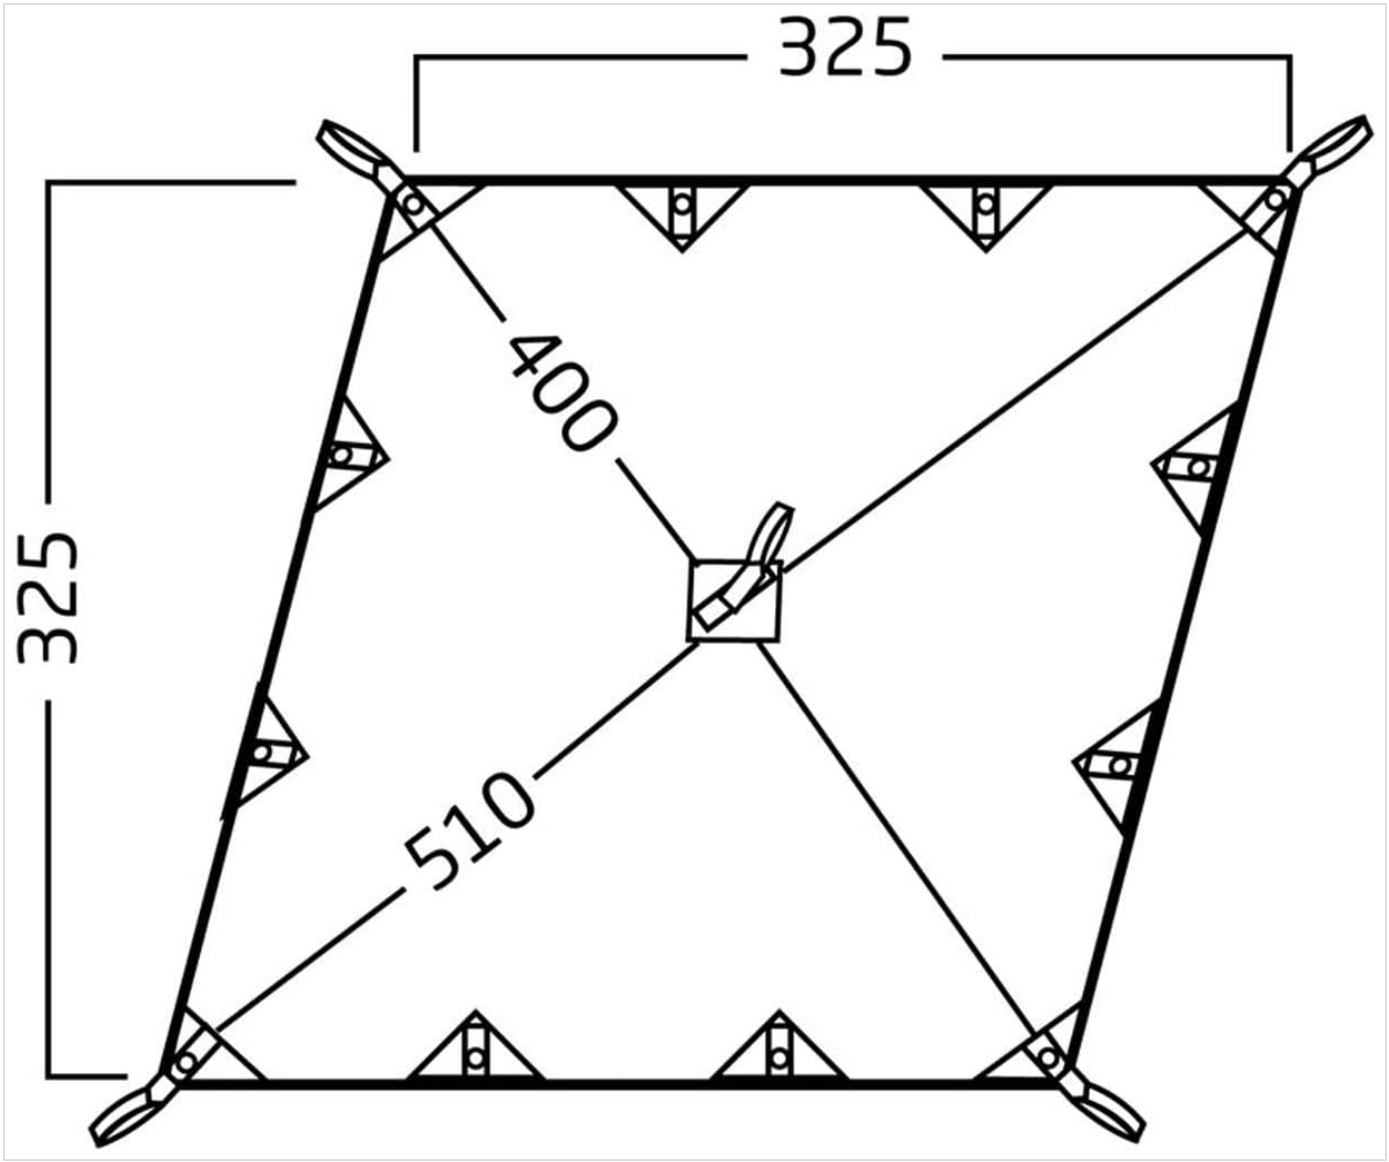

Image Description: A technical diagram illustrating the dimensions of the Nordisk Kari 10 Diamond Tarp. Key measurements are shown, including the length (510 cm), width (400 cm), and diagonal measurements (325 cm), indicating the attachment points and overall shape for setup planning.

Usage Guidelines

The Kari 10 Diamond Tarp is designed to provide versatile shelter in various outdoor conditions.

- **Sun Protection:** Position the tarp to cast maximum shade during the hottest parts of the day. The technical cotton material offers good UV resistance.

- **Rain Protection:** Ensure the tarp is pitched with sufficient slope to allow rainwater to run off easily, preventing pooling. The material has a water resistance rating of 350 mm.
- **Wind Resistance:** For windy conditions, ensure all guy ropes are taut and pegs are firmly secured. Consider pitching the tarp lower to the ground to reduce wind exposure and increase stability.
- **Ventilation:** Adjust the tarp's height and angle to allow for optimal airflow, especially in warm weather, to prevent condensation buildup.

Maintenance and Care

Cleaning

To clean your tarp, use a soft brush or sponge with lukewarm water. Avoid harsh detergents, bleach, or abrasive cleaners, as these can damage the material's water-resistant properties and fabric integrity. Rinse thoroughly and allow to air dry completely in a shaded area before packing.

Storage

Ensure the tarp is completely dry before folding and storing. Storing a damp tarp can lead to mildew, unpleasant odors, and material degradation. Store in a cool, dry place away from direct sunlight and extreme temperatures.

Material Care

The technical cotton blend (65% polyester, 35% cotton) is durable but can be affected by prolonged exposure to intense UV rays and harsh chemicals. Inspect the tarp, poles, and ropes regularly for any signs of wear, tears, or damage. Address minor issues promptly to extend the product's lifespan.

Troubleshooting

Tarp Sagging

If the tarp sags, check the tension of all guy ropes. Adjust the aluminum sliders to increase tension evenly across all points. Ensure poles are upright and pegs are securely anchored in the ground.

Water Pooling

If water collects on the tarp, the pitch may be too flat. Re-adjust the pole height and guy rope tension to create a steeper slope, allowing water to run off efficiently. Ensure the tarp is not stretched too tightly in a way that creates flat spots.

Instability in Wind

In strong winds, ensure all pegs are fully driven into the ground and guy ropes are extremely taut. Consider adding extra guy lines if available, or lowering the overall height of the tarp to reduce its profile against the wind. Orient the tarp to present its narrowest side to the prevailing wind.

Specifications

Feature	Detail
Model	242041
Brand	Nordisk
Material	Technical Cotton (65% Polyester, 35% Cotton)
Dimensions (Pitched)	510 cm x 400 cm (20.1"L x 15.7"W)
Storage Size	5.5" x 34.3"
Weight	6.5 kg (14.3 lbs)
Water Resistance (Fly Sheet)	350 mm

Feature	Detail
Included Components	Tarp, 2 Steel Poles (230mm height), 6 Steel V-Pegs, Guy Ropes with Aluminum Sliders
Color	Sandshell

Warranty and Support

For specific warranty information regarding your Nordisk Kari 10 Diamond Tarp, please refer to the documentation provided at the time of purchase or contact your authorized retailer directly.

For product support, technical assistance, or any inquiries not covered in this manual, please contact Nordisk customer service or your authorized retailer for further guidance.
