Step-by-Step Gameplay:

1. **Choose a Challenge:** Open the challenge booklet and select a challenge. Challenges are categorized by difficulty: Starter, Junior, Expert, and Master.
2. **Place the Character Tile:** Take the character tile that matches the character in your chosen challenge and place it in the game board's display holder.
3. **Identify Required Tiles:** Observe the challenge image carefully. Determine which color and pattern tiles are needed to recreate the character's outfit, including hats, shirts, pants, and shoes. Pay close attention to colors, patterns, and the orientation of each clothing item.
4. **Layer the Tiles:** Stack the selected transparent tiles one by one on top of the character tile in the display holder. The order and orientation of the tiles are crucial. Experiment with different combinations until your composition exactly matches the challenge image.
5. **Verify the Solution:** Once you believe you have matched the challenge, compare your layered tiles with the solution provided at the back of the challenge booklet. Each challenge has only one correct solution.
