Outre X-Pression Braid 52" 3X (5 Pack, 2T1B/130S)

Outre X-Pression Braid - Pre Stretched Braid 52" 3X User Manual

Model: X-Pression Braid 52" 3X (5 Pack, 2T1B/130S)

Brand: Outre

1. INTRODUCTION TO YOUR X-PRESSION BRAID

The Outre X-Pression Braid is a premium pre-stretched and pre-layered braiding hair, designed for quick and easy installation. Made with the finest Kanekalon fibers, it offers a lightweight feel and is simple to braid and manage, ensuring a long-lasting and beautiful style.

Key Features:

- Made with the finest Kanekalon fibers
- Pre-Stretched & Pre-Layered for quicker installation
- Easy to Braid, Easy to Manage
- Ultra Lightweight for comfortable wear
- Hot Water Set Friendly
- Tangle-Free for smooth braiding

2. PREPARATION FOR BRAIDING

Proper preparation of your natural hair is crucial for a successful and long-lasting braided style. Follow these steps before beginning your installation:

1. **Cleanse and Condition:** Wash your natural hair thoroughly with a clarifying shampoo to remove any product buildup. Follow with a deep conditioner to ensure your hair is moisturized and soft.
2. **Detangle:** Gently detangle your hair using a wide-tooth comb, starting from the ends and working your way up to the roots.
3. **Stretch or Blow Dry:** For easier braiding and to minimize tangles, lightly blow dry your hair on a cool setting or stretch it using a tension method.
4. **Sectioning:** Create clean, precise sections in your natural hair according to your desired braiding pattern. Use clips to keep unbraided sections separate.

3. APPLICATION & STYLING

The pre-stretched nature of Outre X-Pression Braid makes it ideal for various braiding styles, from box braids to cornrows. Its lightweight and easy-to-manage fibers ensure a smooth braiding experience.

General Braiding Steps:

1. **Prepare the Braid:** Take a section of the X-Pression Braid. Since it's pre-stretched, minimal preparation is needed. You can gently separate the strands if you desire thinner braids.
2. **Attach to Natural Hair:** Securely attach the braiding hair to the base of your natural hair section using your preferred method (e.g., knotless braiding, feed-in method).
3. **Braid Down:** Braid the hair down to your desired length, ensuring even tension for a neat and uniform look. The pre-layered ends allow for a natural taper.
4. **Seal the Ends:** To seal the ends and prevent unraveling, you can dip the braided ends into hot water (ensure the water is not boiling) for a few seconds. The Kanekalon fibers are hot water set friendly.

4. CARE & MAINTENANCE

To ensure your braided style remains fresh and lasts as long as possible, follow these care and maintenance tips:

- **Moisturize Scalp:** Regularly apply a lightweight hair oil or scalp moisturizer to your scalp to prevent dryness and itching.

- **Cleanse Braids:** Use a diluted shampoo or a braid spray to cleanse your scalp and braids without causing excessive frizz. Rinse thoroughly.
- **Protect at Night:** Cover your braids with a satin or silk scarf/bonnet before sleeping to reduce friction, prevent frizz, and maintain neatness.
- **Avoid Heavy Products:** Steer clear of heavy creams or gels that can cause buildup and weigh down your braids.
- **Gentle Handling:** Be gentle when styling or manipulating your braids to avoid pulling on your natural hair or causing breakage.

5. COMMON ISSUES & TROUBLESHOOTING

While Outre X-Pression Braid is designed for ease of use and durability, here are some common issues you might encounter and how to address them:

Issue	Solution
Frizziness: Braids becoming frizzy over time.	Apply a light mousse or braid spray to smooth down frizz. Ensure you are protecting your braids at night with a satin scarf.
Itchy Scalp: Scalp irritation after braiding.	Use an anti-itch scalp serum or diluted witch hazel. Ensure braids are not installed too tightly.
Dryness: Natural hair or braids feeling dry.	Regularly moisturize your scalp and natural hair with a leave-in conditioner or light oil. The synthetic fibers do not require moisturizing.
Unraveling Ends: Braids coming undone at the tips.	Ensure ends are properly sealed using the hot water method after braiding. You may re-dip if necessary.

6. PRODUCT SPECIFICATIONS

Attribute	Detail
