XTUOES XTUOES-M254153

XTUOES Automatic Cat Feeder User Manual

Model: XTUOES-M254153

Brand: XTUOES

1. INTRODUCTION

Thank you for choosing the XTUOES Automatic Cat Feeder. This 5L WiFi-enabled food dispenser is designed to provide convenient and consistent feeding for your cats and dogs. Featuring dual hoppers, compatibility with various food sizes (2-18mm), timed meal scheduling, a 30-second voice recording function, and a dual power system, this feeder ensures your pet receives balanced nutrition even when you are away.

Please read this manual carefully to understand the product's features and ensure proper operation and maintenance.

2. SETUP GUIDE

2.1. Unboxing and Components

Carefully remove all components from the packaging. Ensure you have the main feeder unit, the stainless steel food bowl, and the USB power cable. No power adapter or AA batteries are included.

2.2. Power Supply

The feeder supports a dual power system for reliable operation:

- **USB Power:** Connect the provided 5V DC USB power cable to the feeder and a compatible USB power adapter (not included).
- **Battery Backup:** For power outage protection, insert 4 AA batteries (not included) into the battery compartment located at the bottom of the unit. The feeder will automatically switch to battery power during a power interruption.

Dual Power Supply

Consistently Feeding Even Suffer Unexpected power Outages.

2.3. Food Loading

The feeder features dual hoppers, allowing you to store and dispense two different types of food. Open the top lid and pour kibble or freeze-dried food into the respective compartments. The feeder is compatible with food sizes ranging from 2mm to 18mm.

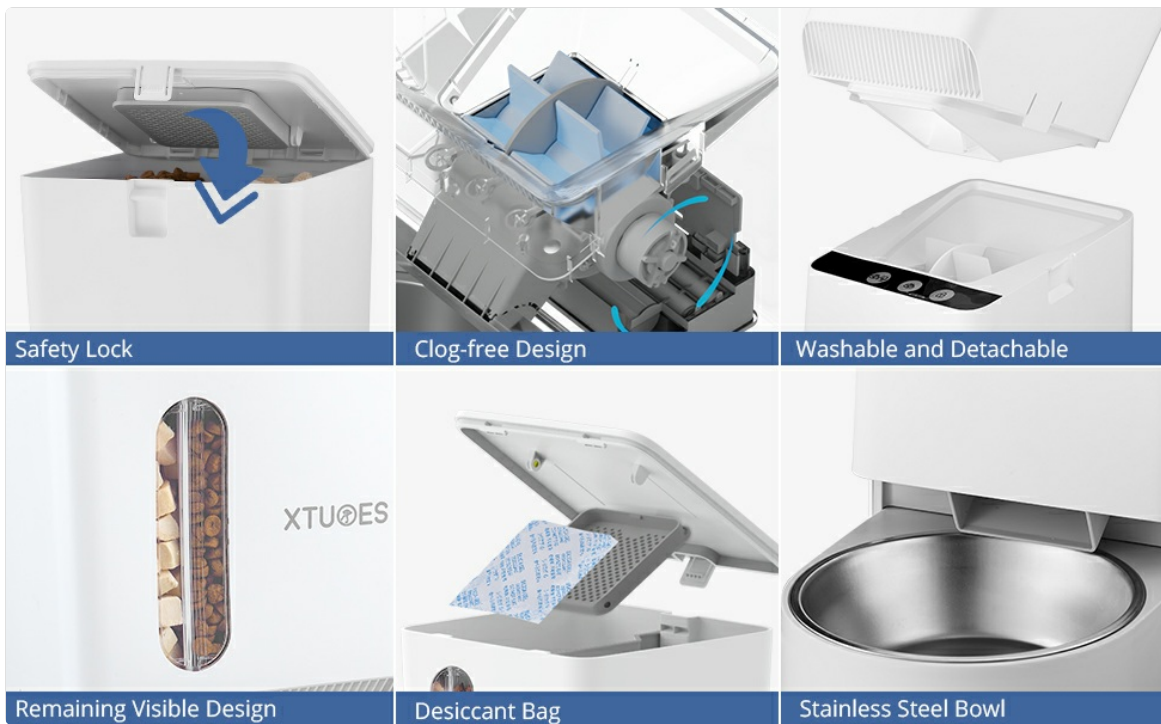

Image: A detailed view of the dual hoppers, designed to store two distinct types of pet food, such as kibble and freeze-dried options.

2.4. App Installation and Connection

Download the 'Smart Life' app from your smartphone's app store. Follow the in-app instructions to connect the feeder to your 2.4GHz WiFi network. This will enable remote control and scheduling features.

Image: The feeder's mobile app interface, demonstrating how to set feeding schedules and adjust portion sizes for each container.

3. OPERATING INSTRUCTIONS

3.1. Timed Feeding

Use the Smart Life app to set up to 10 meals per day. Each meal can be programmed with up to 20 portions, with each portion being approximately 8-10 grams. This allows for precise control over your pet's diet.

3.2. 30-Second Voice Record

The feeder includes a 30-second voice recorder. Press and hold the recording button for 3 seconds until the unlock button's white light flashes. Record your voice, then press the recording button again to save. This feature allows you to call your pet to eat with a familiar sound.

3.3. Manual Feeding

To manually dispense food, press the feeding button on the unit when the feeder is unlocked (indicated by a white light). Each press dispenses approximately 0.05 cups (one portion).

3.4. Independent Feeding Systems

The dual hoppers can be controlled independently via the app. You can specify which hopper (Container 1 or Container 2) dispenses food and the number of portions for each scheduled meal. This is ideal for pets with different dietary needs or for mixing food types.

Applicable Grain Size Tips

Recommended kibble size:
2-18 mm

2mm

10mm

18mm

Recommended kibble types:

Single shaped grains

Mixed shaped grains

Freeze dried food

Reminder: Do not use coarse grains larger than 18mm, and do not put wet grains in, to avoid the food being stuck in the feeder and unable to out of grain.

Image: Visual representation of the independent feeding systems, demonstrating how the app allows selection of food portions from either the left or right hopper.

4. MAINTENANCE

4.1. Cleaning

The feeder is designed for easy cleaning. The stainless steel bowl is detachable and can be hand washed. The food storage container can also be detached from the main unit for thorough cleaning. Ensure all parts are completely dry before reassembling.

Image: The feeder's food container being cleaned under running water, demonstrating its washable and detachable design.

4.2. Food Size Guidelines

To prevent jamming and ensure smooth dispensing, use kibble or freeze-dried food within the recommended size range of 2-18mm. Do not use coarse grains larger than 18mm or wet grains, as this can cause blockages and damage the feeder mechanism.

Key Functions

- 3 Unlocked**
Press and hold the unlocked button for 3s to unlock the feeder. The white light is on. The feeder will be locked, and the light will turn off after 60s of inactivity (only on battery power).
- 1 OR 2 Manual Feeding**
Press the feeding button when the feeder is unlocked (the unlocked light is on). One portion is about 0.05 cups.
- 1 Recording**
(When the unlock key white light is on) Press and hold the recording button for 3s until the unlocked button's white light flashes. Record your voice for less than 30s, press the recording button again to save your voice.
- 2 + 3 WIFI Reset**
Press and hold the unlocked and feeding buttons simultaneously for 3s until the WiFi button's white light flashes. The white light is always on after a successful WiFi connection.

Image: Visual guide for applicable grain sizes, showing examples of 2mm, 10mm, and 18mm kibble, along with a reminder about unsuitable food types.

5. TROUBLESHOOTING

- **Feeder not dispensing food:** Check if the food hoppers are empty. Ensure the feeder is powered on and connected to the app. Verify that the food size is within the 2-18mm range and that no wet or overly coarse food is causing a jam.
- **App connectivity issues:** Ensure your WiFi network is 2.4GHz. Restart the feeder and your router. Try resetting the WiFi connection on the feeder by pressing and holding the unlock and feeding buttons simultaneously for 3 seconds until the WiFi light flashes.
- **Voice recording not working:** Ensure the feeder is unlocked (white light on). Press and hold the recording button for 3 seconds until the unlock button's white light flashes before speaking.
- **Inconsistent portion sizes:** Ensure the food is dry and free-flowing. Large or irregularly shaped kibble might affect consistency.

6. SPECIFICATIONS

Feature	Detail
Brand	XTUOES
Model Name	XTUOES-M254153
Capacity	5 Liters
Food Compatibility	2-18mm kibble/freeze-dried food

Feature	Detail
