7. Common Issues and Solutions

Case does not fit correctly:

Ensure you have the correct remote control model (Mecool KD3 Android TV or Onn. Android TV 2K FHD Streaming Stick). Carefully re-insert the remote, ensuring it is fully seated and aligned within the case.

Buttons are difficult to press:

Verify that the remote is properly aligned within the case and that the case's button cutouts are not obstructed. The case is designed for easy button access; if difficulty persists, re-adjust the remote's position.

Remote signal is weak:

The case features an open signal design to prevent interference. Ensure no other objects are blocking the remote's signal path to the TV or streaming device.
