SETUP

Initial Activation

Your SKMEI 1988 watch comes with a pre-installed CR2032 battery. It should be ready for use upon arrival. If the display is blank, gently press any button to activate it. If it remains blank, the battery may need replacement (refer to Maintenance section).

Setting Time and Date

1. In normal time display mode, press the **MODE** button repeatedly until the seconds start flashing. This indicates you are in setting mode.
2. Press the **RESET** button to cycle through the settings: seconds, hour, minute, month, date, day of the week.
3. Use the **START** button to adjust the flashing value.

4. Once all settings are correct, press the **MODE** button to exit the setting mode and return to normal time display.

OPERATING INSTRUCTIONS

Mode Switching

Press the **MODE** button to cycle through the different functions:

- Normal Time Display
- Stopwatch Mode
- Alarm Setting Mode
- Countdown Timer Mode
- Dual Time Mode

Using the Stopwatch

1. From normal time display, press **MODE** until "CHRONO" or "STW" appears.
2. Press **START** to begin timing.
3. Press **START** again to pause.
4. Press **RESET** to reset the stopwatch to zero.

Setting the Alarm

1. From normal time display, press **MODE** until "ALARM" or "ALM" appears.
2. Press **RESET** to select the hour or minute to set.
3. Use **START** to adjust the flashing value.
4. Press **MODE** to exit alarm setting.
5. To turn the alarm on/off, in alarm mode, press **START**. An alarm icon will appear/disappear.

Using the EL Backlight

Press the **LIGHT** button (typically on the upper left side of the watch) to illuminate the display for a few seconds. This feature is useful in low-light conditions.

MAINTENANCE

Water Resistance

The SKMEI 1988 watch is rated for 50M (5 ATM) water resistance. This means it is suitable for daily use, such as handwashing, rain, and accidental splashes. It is *not* designed for swimming, diving, or prolonged submersion in water. Avoid pressing buttons underwater to prevent water ingress.

Image: The watch partially submerged in water, illustrating its water-resistant capabilities.

Cleaning Your Watch

To clean your watch, wipe it gently with a soft, damp cloth. Do not use harsh chemicals, solvents, or abrasive cleaners, as these can damage the case, band, or display. Ensure the watch is dry before storing.

Battery Replacement

The watch uses a CR2032 battery. When the display becomes dim or functions become erratic, it may be time to replace the battery. Battery replacement should ideally be performed by a qualified watch technician to ensure the water resistance seal is properly maintained.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Display is blank or dim.	Low battery or battery needs replacement.	Replace the CR2032 battery.
Buttons are unresponsive.	Temporary software glitch or low battery.	Try pressing all buttons firmly. If issue persists, replace battery.
Time is inaccurate.	Incorrect setting or low battery.	Re-set the time and date. Replace battery if necessary.

Problem	Possible Cause	Solution
Condensation inside display.	Water ingress due to seal compromise or extreme temperature changes.	Stop using the watch immediately. Seek professional repair to prevent further damage.
