SETUP

Battery Installation

The remote control requires two (2) AAA batteries for operation. Batteries are not included with the remote and must be purchased separately.

1. Locate the battery compartment on the back of the remote control.
2. Slide the battery compartment cover downwards or outwards to open it.
3. Insert two AAA batteries, ensuring the positive (+) and negative (-) terminals align correctly with the markings inside the compartment. Incorrect insertion can prevent the remote from functioning.
4. Slide the battery compartment cover back into place until it clicks securely.
