## Walensee GT-CT008

# Walensee Rotary Cultivator Garden Tool

MODEL: GT-CT008

### Safety Information

---

**Always wear appropriate safety gear, including gloves and eye protection, when using this tool.** Be aware of your surroundings and other people nearby to avoid injury from moving parts or projected debris. Keep hands and feet away from the rotating cutter head and wheels. Always inspect the tool before use and clean it after each use to prevent rust and maintain its functionality. Never use this tool on hard or rocky surfaces to avoid damage to the tool and potential injury.

### Product Overview

---

The Walensee Rotary Cultivator is a versatile 2-in-1 garden tool designed for efficient soil preparation and weed removal. It features durable star-shaped rolling tines for breaking up compacted soil and a flexible weeding blade for precise weed extraction. The adjustable long handle ensures comfortable use without excessive bending.

## Features

- **Rotary Star Wheels:** Four interlocking star-shaped wheels with 9 sharp teeth each, designed for faster tilling, soil mixing, and improved aeration.
- **2-in-1 Weeder Blade:** Manganese steel weeding knife with a flexible angle for precision removal of weeds and roots in tight spaces.
- **Adjustable Long Handle:** Detachable stainless steel pole that adjusts to various heights, reducing strain and back pain during gardening.
- **Heavy-Duty Build:** Constructed with stainless steel and hardened cutter wheels for durability and rust resistance.
- **Multiple Uses:** Ideal for loosening soil, breaking clumps, improving water absorption, lawn aeration, and preparing seedbeds.

## Setup and Assembly

The Walensee Rotary Cultivator is designed for easy assembly. Follow these steps:

1. **Unpack Components:** Carefully remove all parts from the packaging. Verify all components are present: the cultivator head (with star wheels and weeding blade), multiple handle sections, and hardware (bolts, nuts, wrench).
2. **Attach Weeding Blade:** Secure the weeding blade component to the cultivator head using the provided bolts and nuts. Ensure it is attached correctly to allow for flexible movement.

3. **Assemble Handle:** The handle consists of multiple stainless steel sections. Screw the desired number of sections together to achieve your preferred working height. The top section has a soft rubber grip for comfort.
4. **Connect Handle to Cultivator Head:** Attach the assembled handle to the cultivator head using the remaining bolts and nuts. Ensure all connections are secure but allow the weeding blade to pivot freely.
5. **Final Check:** Before first use, ensure all bolts are tightened and the tool feels stable.

## Operating Instructions

The Walensee Rotary Cultivator can be used for various gardening tasks:

- **Soil Loosening and Cultivation:** Push and pull the tool over the soil. The star-shaped tines will rotate, breaking up compacted earth, mixing in amendments, and preparing the ground for planting or reseeding. This action improves soil aeration and water absorption.
- **Weed Removal:** Position the flexible weeding blade at an angle to target weeds. Push the tool forward to cut and dislodge surface weeds and their roots. The blade is effective in tight spaces and along edges.
- **Lawn Aeration:** For light aeration, use the star wheels to penetrate the lawn surface, creating small holes that allow air, water, and nutrients to reach grass roots more effectively.
- **Preparing Seedbeds:** Use the cultivator to create a fine, even soil bed before sowing seeds. This ensures good seed-to-soil contact for optimal germination.

## Maintenance

---

- **Cleaning:** After each use, remove any soil, debris, or plant matter from the tines and weeding blade. A stiff brush or hose can be used.
- **Drying:** Ensure the tool is thoroughly dry before storage to prevent rust, especially on the metal components.
- **Lubrication:** Periodically apply a light oil to the rotating parts of the star wheels to ensure smooth operation.
- **Storage:** Store the cultivator in a dry, protected area away from direct sunlight and moisture. The detachable handle allows for more compact storage if needed.
- **Inspection:** Regularly check for any loose bolts, damaged tines, or dull blades. Tighten loose fasteners and consider sharpening or replacing worn components if necessary.

## Troubleshooting

---

Problem	Possible Cause	Solution
Tool not effectively tilling soil.	Soil is too hard or dry; tines are dull.	Water the soil before use to soften it. Inspect tines for wear and consider replacement if excessively dull.
Weeding blade not cutting effectively.	Blade is dull or improperly angled.	Adjust the angle of the blade. Sharpen or replace the blade if it is dull.
Handle feels wobbly or loose.	Handle sections are not fully tightened or bolts are loose.	Ensure all handle sections are securely screwed together and all assembly bolts are tightened.

## Specifications

---

- **Brand:** Walensee
- **Model:** GT-CT008
- **Product Dimensions:** 5.5"D x 6"W x 73"H (fully extended)
- **Power Source:** Manual
- **Material:** Plastic, Stainless Steel, Steel
- **Item Weight:** 5.08 pounds (2.31 Kilograms)
- **Operation Mode:** Manual

## Warranty and Support

---

For warranty information, product support, or to purchase replacement parts, please contact Walensee customer service through their official website or the retailer where the product was purchased. Keep your proof of purchase for warranty claims.
