VANTRUE N4 Pro

Vantrue N4 Pro 4K 3 Channel Dash Cam Instruction Manual

Model: N4 Pro | Brand: VANTRUE

INTRODUCTION

This manual provides comprehensive instructions for the setup, operation, maintenance, and troubleshooting of your Vantrue N4 Pro 4K 3 Channel Dash Cam. Please read this manual thoroughly before using the device to ensure optimal performance and safety.

WHAT'S IN THE BOX

- Vantrue N4 Pro Dash Cam
- Rear Camera
- GPS Mount
- Car Charger Adapter
- Crowbar
- Rear Camera Cable (20ft)
- Electrostatic Stickers (x2)
- 3M Adhesive Stickers
- Base for Magnetic Mount
- Type-C Car Charger Cable (11.5ft)
- Type-C USB Data Cable (3.3ft)
- Adhesion Promoter

Figure 1: Vantrue N4 Pro Dash Cam package contents. Includes the main dash cam unit, rear camera, various cables, mounts, and installation accessories.

SETUP AND INSTALLATION

Follow these steps to properly set up and install your Vantrue N4 Pro Dash Cam in your vehicle.

1. **Prepare the Windshield:** Clean the area on your windshield where you intend to mount the dash cam. Ensure it is free of dust and grease.
2. **Attach GPS Mount:** Secure the GPS mount to the windshield using the provided 3M adhesive stickers. For optimal adhesion, use the adhesion promoter.
3. **Mount the Dash Cam:** Attach the Vantrue N4 Pro Dash Cam to the GPS mount. The magnetic connection ensures easy attachment and removal.
4. **Connect Power:** Connect the Type-C Car Charger Cable to the dash cam and plug the car charger adapter into your vehicle's 12V power outlet.
5. **Install Rear Camera:** Mount the rear camera on your rear windshield. Route the Rear Camera Cable from the main dash cam unit to the rear camera, tucking the cable neatly along the vehicle's interior trim using the crowbar.
6. **Insert SD Card:** Insert a compatible microSD card (up to 512GB, U3/Class10/A2 recommended, not included) into the dash cam's SD card slot. Format the SD card via the dash cam's settings menu for first-time use.

Figure 2: Overview of the Vantrue N4 Pro Dash Cam and its components for installation. The main unit, rear camera, and GPS mount are shown.

Installation Video Guide

Your browser does not support the video tag.

Video 1: A detailed guide on how to install the Vantrue N4 Pro/N4 Pro S Dash Cam in your vehicle, covering cable routing and mounting.

OPERATING INSTRUCTIONS

3-Channel Recording

The N4 Pro offers true 4K 3-channel recording, simultaneously monitoring the front, interior, and rear of your car in 4K+1080P+1080P resolution. This provides comprehensive coverage for potential incidents.

Figure 3: Visual representation of the 3-channel recording capability, showing views from the front, cabin, and rear cameras simultaneously.

PlatePix™ Technology & HDR Night Vision

Vantrue's exclusive PlatePix™ technology accurately identifies license plate numbers with unmatched accuracy, even in challenging lighting conditions. Combined with STARVIS 2 IMX678 sensor and 4K HDR technology, it ensures excellent low-light performance and clarity, capturing details without blurring or color shading for optimal night shots.

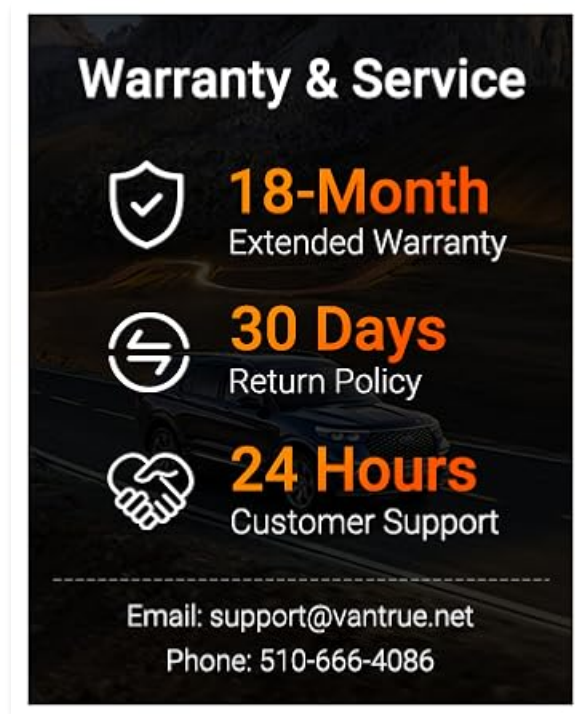

Figure 4: Comparison demonstrating the clarity of license plate capture using PlatePix™ technology in various lighting conditions.

Built-in 5GHz Wi-Fi & GPS

The built-in 5GHz Wi-Fi allows for faster data transfer, enabling you to easily access and download videos/photos to your phone via the "Vantrue" App. The integrated GPS records your driving route and location, embedding speed data into the video for additional evidence.

The illustration shows a dash cam at the top with a Wi-Fi signal icon and a callout bubble indicating "Speed: 30mph". Below the dash cam are three app download buttons: "Google play", "Download on the App Store", and "Vantrue APP". To the right, a hand holds a smartphone displaying a video of a car on a road, with social media sharing icons for Twitter, Facebook, YouTube, and Instagram. At the bottom left, a laptop screen shows the "Vantrue Player" software interface, which includes a video player, a speedometer showing 55 MPH, and a list of recorded video files. To the right of the laptop, text reads: "Track on Google Maps via the Vantrue App or the free Vantrue GPS Player on your PC (Windows and Mac)." The bottom of the image features a large orange banner with the text: "Built-in 5Ghz Wi-Fi & GPS" and "Easy to edit, preview, download videos and even share your great journey to social media through the app."

Speed: 30mph

Google play

Download on the App Store

Vantrue APP

Track on Google Maps via the Vantrue App or the free Vantrue GPS Player on your PC (Windows and Mac).

Built-in 5Ghz Wi-Fi & GPS

Easy to edit, preview, download videos and even share your great journey to social media through the app.

Figure 5: Illustration of the dash cam's Wi-Fi connectivity for app control and GPS functionality for tracking driving data.

Smart Voice Control

Control your dash cam hands-free using 12 voice commands, such as "take photo," "lock the video," "turn on/off Wi-Fi," "turn on/off screen," "turn on/off audio," and "show the front/rear camera." This enhances driving safety by minimizing distractions.

Smart Voice Control

Easily control your 3-way dash cam without taking your hands off the wheel to ensure safe driving.

Figure 6: Depiction of various voice commands available for controlling the dash cam without physical interaction.

Seamless Loop Recording

The dash cam supports seamless loop recording, automatically overwriting the oldest videos when the SD card is full. It supports memory cards up to 512GB (sold separately), allowing for extensive recording time.

Figure 7: Table illustrating recording durations for different SD card capacities across 1, 2, and 3 channel modes.

G-sensor & Mileage Statistics

When a collision is detected, the built-in G-sensor instantly locks and saves the video, ensuring critical evidence is not lost. The system can also generate mileage statistics, providing additional data for accident reconstruction or travel logs.

Figure 8: Display of G-sensor functionality and mileage statistics, useful for accident evidence and trip tracking.

Optional Accessories

Enhance your dash cam experience with optional accessories such as the CPL (Circular Polarizing Lens) to reduce glare and reflections, and a remote controller for quick photo capture and video locking.

Package Content

Packing Box

GPS Mount

Cable Clip*6

Adhesion Promoter

Electrostatic Stickers*2

3M Adhesive Stickers*2

Crowbar

Base for Magnetic Mount

Type-C Car Charger Cable(11.5ft)

Type-C USB Data Cable (3.3ft)

Rear Camera Cable (20ft)

Please note: Memory card is **Not Included** in the package. (Purchase separately)

Figure 9: Optional accessories including the CPL filter for glare reduction and a remote controller for convenient operation.

MAINTENANCE

SD Card Management

Regularly format your SD card (at least once a month) to ensure optimal performance and prevent data corruption. Always use a high-quality, compatible SD card as recommended in the specifications.

OTA Firmware Update

The N4 Pro supports Over-The-Air (OTA) firmware upgrades via the Vantrue App. This allows you to easily improve performance and update features without manual downloads. Upgrading to the latest firmware typically takes only about 20 seconds.

Figure 10: Steps for performing an OTA firmware update using the Vantrue mobile application.

Capacitor-Based Power

The dash cam uses dual capacitors as its power source, allowing it to withstand extreme temperatures from -14°F to 158°F without affecting performance. This design prevents the risk of overheating and enhances durability compared to traditional battery-based dash cams.

TROUBLESHOOTING

Parking Modes for 24/7 Protection

The N4 Pro offers 4 parking modes for 24/7 vehicle protection. To utilize parking mode, a hardwire kit (ASIN: B083XB8T7T, sold separately) is required.

- **Buffered Motion Detection:** Records 10 seconds before and 30 seconds after motion is detected. You can manually adjust the recording area to avoid trivial recordings.
- **Collision Detection:** Automatically records and saves video when a collision is detected.
- **Low Bitrate Mode:** Continuously records video at a low bitrate (1080P/720P@15FPS) to save SD card space.
- **Low Frame Rate Mode:** Records video at 1/5/10/15FPS, saving space and power.

Figure 11: Diagram illustrating the four different parking modes available with the Vantrue N4 Pro.

Low Light Night Vision in Parking Mode

The 3-way dash cam can diagnose surrounding brightness in real-time, recording 30% brighter and clearer images even in low-light and backlit parking environments.

Figure 12: Comparison of night vision performance in parking mode, showing improved brightness and clarity.

3 Ways to Lock Video

Multiple ways to ensure your emergency video is locked from being overwritten: manually adjust the recording area, use voice control ("Lock video"), or rely on the G-sensor to auto-detect and lock upon collision.

Figure 13: Three methods for locking video footage: automatic locking via G-sensor, voice control, and wireless remote.

SPECIFICATIONS

Feature	Detail
Model Name	N4 Pro
Product Dimensions	6.89 x 3.82 x 5.63 inches
Item Weight	1.98 pounds
Video Capture Resolution	2160p, 4K+1080P+1080P@30fps, 4K+1080P@30fps
Image Sensor	STARVIS 2, IMX678 Sensor
Special Features	PlatePix™, HDR Night Vision, Voice Control, 3-axis adjustable G-Sensor, OTA Firmware Update, Supercapacitor, Buffered Motion Detection, 24hrs parking mode, Support 512GB Card Max, 360 Degree, App Control, Built-In GPS
Connectivity Technology	Wi-Fi (5GHz), USB

Mounting Type	Windshield Mount
Color	Black

WARRANTY AND SUPPORT

Your Vantrue N4 Pro Dash Cam comes with an**18-Month Extended Warranty**. Vantrue is committed to providing genuine solutions and high-quality services.

- **Customer Support:** All emails will be answered within 24 hours.
- **Contact Email:** support@vantrue.net
- **Contact Phone:** 510-666-4086
- **Return Policy:** 30 Days Return Policy.
