OPERATING INSTRUCTIONS

For Wood Burning:

1. **Add Wood:** Place small, dry wood chunks onto the bottom grate. Do not overfill; ensure air can circulate.
2. **Ignite:** Use a long lighter or match to ignite the wood. The specially designed grate allows for fast lighting.
3. **Maintain Fire:** Add small wood pieces as needed to maintain the desired flame.

For Pellet Burning:

1. **Insert Pellet Chimney:** Place the included pellet chimney onto the grate.
2. **Fill with Pellets:** Fill the chimney with wood pellets.
3. **Ignite:** Ignite the pellets at the top of the chimney. Pellets provide a slow, steady burn.

Extinguishing the Fire:

Allow the fire to burn down naturally. Do not use water to extinguish the fire as this can damage the stainless steel. Once the flames have subsided and the fire pit has cooled, you can use the provided lid (if applicable) to cover the opening and further suppress embers, or simply let it cool completely.

2. **Ash Removal:** Once cool, remove the grate and carefully dump any ashes into a non-combustible container. The removable grate makes this process fast and easy.
3. **Cleaning:** Wipe down the stainless steel exterior with a damp cloth. Avoid abrasive cleaners or pads that could scratch the surface.
4. **Storage:** Store the clean and dry fire pit in the included nylon carry bag in a dry location when not in use.
