4. Assembly Instructions

Each nanoblock kit includes detailed, step-by-step visual instructions to guide you through the building process. Follow these instructions carefully for optimal results.

4.1. General Building Tips

- **Organize Your Blocks:** Before starting, sort your blocks by color and size. This will make it easier to locate the correct pieces during assembly.
- **Follow Step-by-Step:** Adhere strictly to the provided instructions. Each step builds upon the previous one.
- **Use a Flat Surface:** Assemble your model on a clean, flat, and well-lit surface to prevent losing small pieces.
- **Precision is Key:** Due to the micro size of the blocks, precision is important for a stable and accurate model.

4.2. Difficulty Level

This nanoblock mininano Series kit is rated at a Level 2 difficulty on a scale of 1 to 5 (1 being easiest, 5 being most advanced). This indicates an entry-level challenge suitable for ages 8 and up, with detailed instructions provided.

5. Care and Maintenance

To ensure the longevity and appearance of your nanoblock models, follow these care guidelines:

- **Cleaning:** Use a soft, dry cloth or a small brush to gently remove dust from the assembled models. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store assembled models in a stable location away from direct sunlight, extreme temperatures, and high humidity to prevent discoloration or damage.
- **Handling:** Handle models carefully to avoid accidental disassembly, especially with intricate parts.

6. Troubleshooting

If you encounter issues during assembly, consider the following:

- **Missing Pieces:** Double-check the packaging and your work area thoroughly. Due to the small size, pieces can be easily overlooked. If pieces are genuinely missing, refer to the manufacturer's support information (if provided on the product packaging) for assistance.
- **Difficulty Connecting Blocks:** Ensure blocks are aligned correctly before applying gentle pressure. Avoid forcing blocks together, as this can damage them.
- **Model Instability:** Review the previous steps in the instructions to confirm all blocks are placed correctly and securely. A misplaced block can affect the stability of subsequent layers.
