GUANFU 04

GUANFU Solar Garden Stakes Lights User Manual

Model: 04

INTRODUCTION

Thank you for choosing GUANFU Solar Garden Stakes Lights. This 4-pack of waterproof metal art stick flowers is designed to enhance the beauty of your outdoor spaces such as gardens, patios, yards, backyards, porches, and lawns. These lights are powered by solar energy, offering an eco-friendly and convenient lighting solution without the need for external wiring or power sources.

WHAT'S INCLUDED

- 4 x Metal Flower Garden Stakes (Assorted designs: Ladybug, Butterfly, Dragonfly, Hummingbird)
- 4 x Ground Stakes (for assembly)
- Integrated Solar Panels (one per flower)
- 1 x AAA battery (included per unit)

SETUP INSTRUCTIONS

1. Assembly:

Carefully screw the bottom ground stake into the base of each metal flower unit. Ensure it is securely fastened to provide stability when placed in the ground.

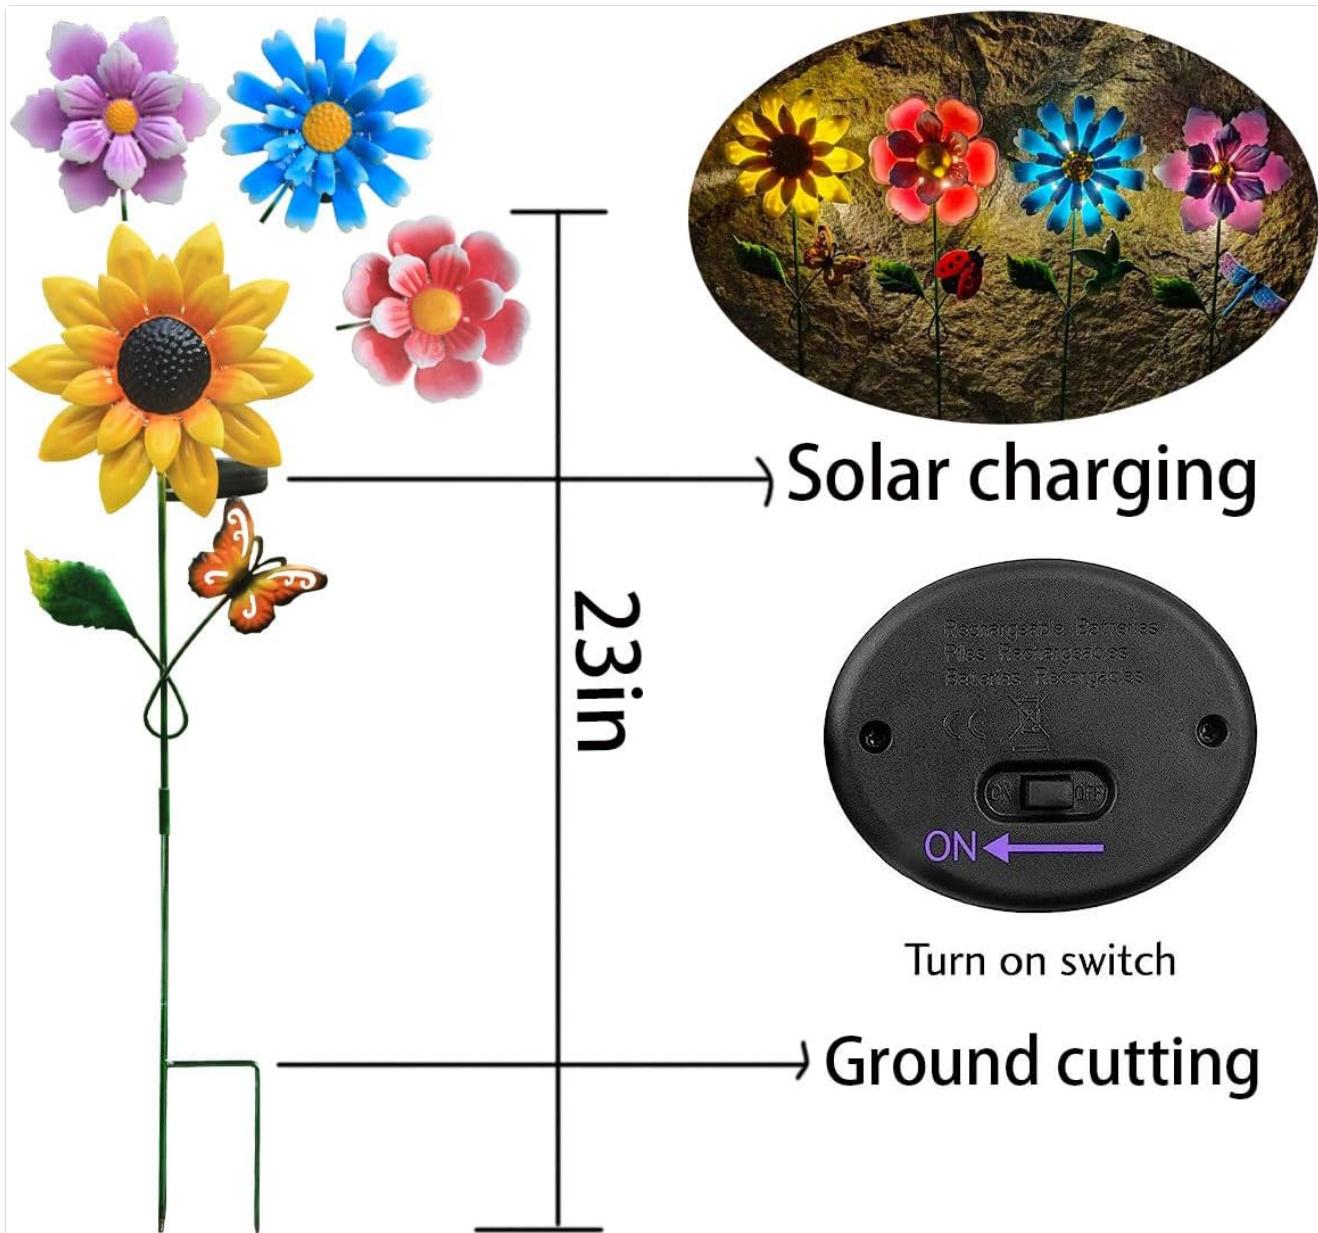

Figure 1: Assembly and Key Components. This image illustrates how to attach the ground stake to the flower unit and highlights the solar panel with its ON/OFF switch.

2. Activate the Solar Panel:

Locate the ON/OFF switch on the back of the solar panel, typically found on the underside of the flower. Slide the switch to the "ON" position. The lights will not charge or illuminate if the switch is in the "OFF" position.

3. Initial Charging:

For optimal performance, allow the solar lights to charge for a full day (at least 6-8 hours) in direct sunlight before their first use. This ensures the internal battery is fully charged and ready to provide illumination throughout the night.

4. Placement:

Choose a location in your garden, patio, or yard that receives direct sunlight for the majority of the day. Push the assembled stake firmly into the ground. Ensure the solar panel is unobstructed and facing upwards to maximize sun exposure.

Figure 2: Daytime placement of the solar garden stakes in a garden bed, showcasing their decorative appearance.

OPERATING INSTRUCTIONS

The GUANFU Solar Garden Stakes Lights are designed for automatic operation. Once fully charged and the switch is in the "ON" position:

- During the day, the integrated solar panel will absorb sunlight and convert it into electrical energy, charging the internal AAA battery. The lights will remain off.
- At dusk, a built-in light sensor will detect the decrease in ambient light and automatically turn on the LED lights within the flower, illuminating your garden.
- At dawn, the lights will automatically turn off as the sun rises, and the charging cycle will begin again.

Figure 3: Day and Night appearance of the solar garden stake lights, demonstrating their automatic illumination feature.

Figure 4: The solar garden stake lights beautifully illuminating a garden pathway at night.

MAINTENANCE

These solar garden stakes are constructed from high-quality metal, hand-painted, and finished with a UV-proof coating, making them durable and weather-resistant for all seasons.

- **Cleaning:** Periodically wipe the solar panel and flower surfaces with a soft, damp cloth to remove dust, dirt, or debris. This ensures optimal sunlight absorption and maintains the aesthetic appeal of the lights.
- **Battery Replacement:** While the included AAA battery is rechargeable, its lifespan may vary. If the lights' performance diminishes over time, consider replacing the rechargeable AAA battery.
- **Seasonal Storage:** In areas with prolonged periods of severe weather (e.g., heavy snow or extreme cold), it is recommended to bring the lights indoors to prolong their lifespan.

TROUBLESHOOTING

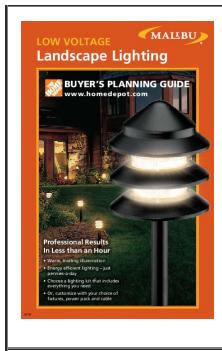

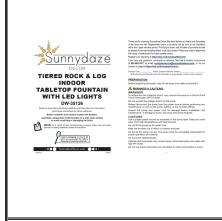

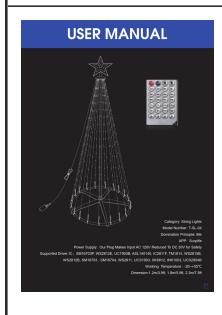

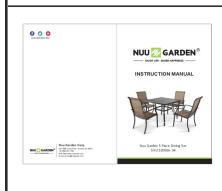

Problem	Possible Cause	Solution
Lights are dim or not turning on at night.	Switch is in "OFF" position. Insufficient sunlight for charging. Solar panel is dirty or obstructed. Battery is not fully charged or needs replacement.	Ensure the switch on the solar panel is set to "ON". Relocate the light to an area that receives direct sunlight for at least 6-8 hours daily. Clean the solar panel regularly with a soft, damp cloth to remove any dirt or debris. Allow the light to charge for a full day. If the problem persists, replace the rechargeable AAA battery.
Product appears slightly deformed upon arrival.	Minor deformation due to transportation.	Gently adjust the metal components by hand to restore them to their intended shape. The metal is designed to be slightly pliable for minor adjustments.

SPECIFICATIONS

Feature	Detail
Brand	GUANFU
Model Number	04
Item Weight	1.59 pounds (total for 4 pack)
Product Dimensions (each)	5.9 x 4.7 x 12.9 inches (L x W x H)
Frame Material	Metal
Light Color	Multicolor (Warm white LEDs)
Number of Light Sources	4 (one per stake)
Power Source	Solar Powered (1 AAA rechargeable battery included per unit)
Theme	Floral with insect accents
UPC	768443735797
